[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from the **Department of Higher Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $756,000 in one-time costs, $204,000 in annual costs, and $658,000 in costs per election.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, version 2 (2020-106)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on August 8, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

INITIATIVE PETITION

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 3rd day of November, 2020, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

[OFFICIAL BALLOT TITLE]

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive an absentee ballot.

(6) Absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7) Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. A citizen who is at least 16 years old and otherwise meets all eligibility requirements of Section 2 shall be provided an opportunity to pre-register to vote as provided herein.

(1) Such individual may pre-register pursuant to the registration process in Section 5 of this Article; or

(2) Such individual may choose to register pursuant to any other registration procedure available under general election law.

(3) Notwithstanding pre-registration, such individual shall not be eligible to vote unless they will be 18 years of age or older on or before the day of the election in which they seek to cast a ballot.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-106)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received August 9, 2019)

Date

August 29, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact. Based on their interpretation of this legislation, they would be required to provide a list of citizens who are eligible to vote to the Secretary of State upon request. Their response of "no impact" is based on this assumption. Should their interpretation be incorrect and the legislation would require them to actively track, manage, or report information, a fiscal impact to the department is possible.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $83,483 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

IT Consultants	75	885.60	66,420

Section 5 (2)

The proposed constitutional amendment petition language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- Coordinate with OA-ITSD to develop a data pull process for defining records for submission to Secretary of State.
- Coordinate with OA-ITSD to develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.

- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.
- Implement MEDL changes to the signature collection and certification processes for all transactions to include updates related to automatic voter registration.
- Implement modifications to license verification statement or generated money receipt or temporary driving privilege document to include additional information related to automatic voter registration.

Section 27

An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article.

(2) Such individual may choose to register pursuant to any other registration procedure available under general election law.

The Department would be required to:

- Develop file generation edits to ensure driver license, nondriver license, and permit applicants age 16 and over are included in the new weekly file sent to the Secretary of State.
- Implement MEDL changes to enable voter questions and responses to any eligible applicant age 16 and older.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III	10 hrs. x $19.80 =	$198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	360 hrs. x $17.13 per hr. =	$6,166.80
Management Analyst Spec. II –	440 hrs. x $20.57 per hr. =	$9,050.80
Revenue Manager -	80 hrs. x $20.59 per hr. =	$1,647.20
		Total = $16,864.80

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Section 27
The Department assumes this minimum age applies to the file transfer to Secretary of State and will not change current voter registration application provisions which limit completion of an application to persons age 17 ½ years of age or older with a certification that they will be 18 years of age on or before election date.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue

derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting four new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

The proposal provides that an individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of

696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated the following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **18.7%** of the population is under **16** years old, which accounts for **54,515** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
PTH = Part-time Hire
AP = Annual Pay

291,923 R's – 50,415 R's under **16 yrs** = **241,508 R's 16 yrs** or older

241,508 R's 16 yrs or older – **190,000 RV's = 51,508 PV's**

51,508 PV's x .50 MC = $20,000 + fees **= $25,754**

51,508 PV x 1.06 CPC2P = $54,598.48

If they have approximately **51,508 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$25,754 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$54,598.48** to the cost when it is multiplied by the estimated **51,508** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** and **1 PTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost per **FTH** will be **$24,689.60** per hire for their annual pay and **$12,026.90** annual pay for the **PTH**. The total annual cost for two fulltime hires will be **$49,379.20.**

51,508 PV's x .50 MC	**= $25,754**
51,508 PV x 1.06 CPC2	**= $54,598.48**
2 FTH x $24,689.60 AP	**= $49,379.20**
1 PTH x $12,026.90 AP	**= $12,026.90**
Total:	= **$141,758.58**

The total estimated initial cost for Greene County for **IP 20-106** proposing to amend Article VIII, version 2, will cost Greene County **$141,758.58** with a minimum ongoing cost of **$61,406.10** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from **St. Louis County** indicated this initiative petition does not appear as though it would have a direct fiscal impact on St. Louis County Government. However, there is the possibility that the St. Louis County Board of Elections would incur additional operational expenses and would seek additional appropriations from the County General Fund to cover the expenses. The Board of Elections intends to make a separate reply.

Officials from the **City of Kansas City** indicated this will have no fiscal impact on their city.

Officials from the **City of St. Louis/Board of Election Commissioners City of St. Louis** indicated this initiative petition would have a negative fiscal impact.

The Board of Election Commissioners is supportive of this initiative, but believes that the increase in costs would be hard to manage as a result of this amendment. Following are rough estimates for expected increases:

1) Hiring 2 full-time employees at $32,000 each.
2) Hiring 4-6 temporary staff members in the Absentee department for 10 40-hour work weeks at $15.00 an hour.
3) Printing and postal costs for applications and ballots will triple in the Absentee department, increasing expenses by $305,000.
4) Printing and postal costs for missing information letters and ENC notices will triple in the Registration department, increasing expenses by $1,205.
5) Increase in Business Reply Mail Return costs for absentee application and ballots will increase by $75,000.

6) Election day absentee ballot counters will triple in size, increasing costs by $15,000.
7) Ballot order will increase due to the increase in registrations, but the fiscal impact is tough to estimate.
8) Registration overtime costs will increase for data entry of new registrations but fiscal impact is tough to estimate.
9) Cost of supplies, such as paper, pens, etc. would increase by about $5,000.

The Director of Board of Election Commissioners noted that these are merely rough estimates and the actual fiscal impact is hard to determine.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see any fiscal impact of these petitions that is unique to their district. Any costs related to these may come out of general revenue which will have a negative impact to some degree on all state funded entities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Kansas City Election Board** indicated if this initiative petition is passed, election costs definitely increase at least $50,000 per election for additional postage, printing, training, staff overtime, temporary employees, legal notices and location rentals to process these additional services. Additionally, at least 2 to 4 permanent staff would need to be hired at $35,000 each, including benefits.

Officials from the **Platte County Election Board** indicated the additional hours proposed in the petition would add about $5,000 to the cost of an election.

Officials from the **State Auditor's office** indicated the proposed language, if implemented, should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Andrew Bergerson and Jared Wight provided the following information:

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from the **Department of Higher Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $756,000 in one-time costs, $204,000 in annual costs, and $658,000 in costs per election.

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, version 1 (2020-105)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on August 8, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

INITIATIVE PETITION

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 3rd day of November, 2020, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting three new sections to be known as Article VIII, Sections 24, 25, and 26.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting three new sections to be known as Article VIII, Sections 24, 25, and 26 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive an absentee ballot.

(6) Absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7) Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-105)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received August 9, 2019)

Date

August 29, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact. Based on their interpretation of this legislation, they would be required to provide a list of citizens who are eligible to vote to the Secretary of State upon request. Their response of "no impact" is based on this assumption. Should their interpretation be incorrect and the legislation would require them to actively track, manage, or report information, a fiscal impact to the department is possible.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $64,852 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

IT Consultants	75	708.48	53,136

Section 5 (2)

The proposed language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.

- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021
Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021
Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager -	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD

	Total		53,136	-	-

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting three new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated the following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **20.9%** of the population is under **18** years old, which accounts for **60,957** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
AP = Annual Pay

291,923 R's – 60,957 R's under **18 yrs** = **230,966 R's 18 yrs** or older

230,966 R's 18 yrs or older – **190,000 RV's = 40,966 PV's**

40,966 PV's x .50 MC = $20,483

40,966 PV x 1.06 CPC2P = $43,423.96

If they have approximately **40,966 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$20,483 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$43,423.96** to the cost when it is multiplied by the estimated **40,966** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost will be **$24,689.60** per hire for their annual pay. The total annual cost for two fulltime hires will be **$49,379.20.**

40,966 PV's x .50 MC	**= $20,483**
40,966 PV's x 1.06 CPC2P	**= $43,423.96**
2 FTH x $24,689.60 AP	**= $49,379.20**
Total:	**= $113,286.16**

The total estimated initial cost for Greene County for **IP 20-105** proposing to amend Article VIII, version 1, will cost Greene County **$113,286.16** with a minimum ongoing cost of **$49,379.20** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from **St. Louis County** indicated this initiative petition does not appear as though it would have a direct fiscal impact on St. Louis County Government. However, there is the possibility that the St. Louis County Board of Elections would incur additional operational expenses and would seek additional appropriations from the County General Fund to cover the expenses. The Board of Elections intends to make a separate reply.

Officials from the **City of Kansas City** indicated this will have no fiscal impact on their city.

Officials from the **City of St. Louis/Board of Election Commissioners City of St. Louis** indicated this initiative petition would have a negative fiscal impact.

The Board of Election Commissioners is supportive of this initiative, but believes that the increase in costs would be hard to manage as a result of this amendment. Following are rough estimates for expected increases:

1) Hiring 2 full-time employees at $32,000 each.
2) Hiring 4-6 temporary staff members in the Absentee department for 10 40-hour work weeks at $15.00 an hour.
3) Printing and postal costs for applications and ballots will triple in the Absentee department, increasing expenses by $305,000.
4) Printing and postal costs for missing information letters and ENC notices will triple in the Registration department, increasing expenses by $1,205.
5) Increase in Business Reply Mail Return costs for absentee application and ballots will increase by $75,000.
6) Election day absentee ballot counters will triple in size, increasing costs by $15,000.
7) Ballot order will increase due to the increase in registrations, but the fiscal impact is tough to estimate.
8) Registration overtime costs will increase for data entry of new registrations but fiscal impact is tough to estimate.
9) Cost of supplies, such as paper, pens, etc. would increase by about $5,000.

The Director of Board of Election Commissioners noted that these are merely rough estimates and the actual fiscal impact is hard to determine.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see any fiscal impact of these petitions that is unique to their district. Any costs related to these may come out of general revenue which will have a negative impact to some degree on all state funded entities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Kansas City Election Board** indicated if this initiative petition is passed, election costs definitely increase at least $50,000 per election for additional postage, printing, training, staff overtime, temporary employees, legal notices and location rentals to process these additional services. Additionally, at least 2 to 4 permanent staff would need to be hired at $35,000 each, including benefits.

Officials from the **Platte County Election Board** indicated the additional hours proposed in the petition would add about $5,000 to the cost of an election.

Officials from the **State Auditor's office** indicated the proposed language, if implemented, should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from the **Department of Higher Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $745,000 in one-time costs, $192,000 in annual costs, and $658,000 in costs per election.

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III (2020-104)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on July 31, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by amending Section 52(b) to read as follows:

Section 52(b). The veto power of the governor shall not extend to measures referred to the people. All elections on measures referred to the people shall be had at the general state elections, except when the general assembly shall order a special election. Any measure referred to the people shall take effect when approved by a majority of the votes cast thereon, and not otherwise. This section shall not be construed to deprive any member of the general assembly of the right to introduce any measure. However, any measure passed by the general assembly that alters, amends, or repeals a statute proposed through the initiative and subsequently approved by a majority of the votes cast thereon shall not take effect unless and until it is also approved by the people.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-103)

Subject

Initiative petition from Winston Apple regarding a proposed constitutional amendment to Article III. (Received July 26, 2019)

Date

August 15, 2019

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November, 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this initiative petition will be no impact to their department.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated they see this initiative petition to have no impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their agency.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition would have no fiscal impact on their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article III of the Constitution of Missouri by requiring that any measure passed by the General Assembly that alters, amends, or repeals a statute proposed through initiative and subsequently approved by the people shall not take effect unless and until it is also approved by the people.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In (fiscal year) FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these

requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have a significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact of this petition on their school.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

Officials from **Metropolitan Community College** indicated no impact.

The State Auditor's office did not receive a response from the **Department of Higher Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State and local governmental entities estimate no costs or savings from this proposal.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Sections 10 and 14 and amending Sections 3, 5, 6, 7, 9, 11 and 20(d), to read as follows:

Article III Section 3. [(a) There is hereby established the post of "Nonpartisan State Demographer". The nonpartisan state demographer shall acquire appropriate information to develop procedures in preparation for drawing legislative redistricting maps on the basis of each federal census for presentation to the house apportionment commission and the senatorial apportionment commission.]

[(b) The nonpartisan state demographer shall be selected through the following process. First, state residents may apply for selection to the state auditor using an application developed by the state auditor to determine an applicant's qualifications and expertise relevant to the position. Second, the state auditor shall deliver to the majority leader and minority leader of the senate a list of at least three applicants with sufficient expertise and qualifications, as determined by the state auditor, to perform the duties of the nonpartisan state demographer. Third, if the majority leader and minority leader of the senate together agree that a specific applicant should be selected to be the nonpartisan state demographer, that applicant shall be selected and the selection process shall cease. Fourth, if the majority leader and minority leader of the senate cannot together agree on an applicant, they may each remove a number of applicants on the state auditor's list equal to one-third of the total number of applicants on that list, rounded down to the next integer, and the state auditor shall then conduct a random lottery of the applicants remaining after removal to select the nonpartisan state demographer. The state auditor shall prescribe a time frame and deadlines for this application and selection process that both encourages numerous qualified applicants and avoids delay in selection. The nonpartisan state demographer shall serve a term of five years and may be reappointed. To be eligible for the nonpartisan state demographer position, an individual shall not have served in a partisan, elected position for four years prior to the appointment. The nonpartisan state demographer shall be disqualified from holding office as a member of the general assembly for four years following the date of the presentation of his or her most recent legislative redistricting map to the house apportionment commission or the senatorial apportionment commission.]

[(c)] The house of representatives shall consist of [one hundred sixty-three] twenty members from each congressional district elected at each general election [and apportioned as provided in this section] for a term of two years.

[(1) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer shall begin the preparation of legislative districting plans and maps using the following methods, listed in order of priority:

a. Districts shall be established on the basis of total population. Legislative districts shall each have a total population as nearly equal as practicable to the ideal population for such districts, determined by dividing the number of districts to be established into the total population of the state reported in the federal decennial census;

b. Districts shall be established in a manner so as to comply with all requirements of the United States Constitution and applicable federal laws, including, but not limited to, the Voting Rights Act of 1965 (as amended). Notwithstanding any other provision of this Article, districts shall not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminishing their ability to elect representatives of their choice, whether by themselves or by voting in concert with other persons.

Districts shall be designed in a manner that achieves both partisan fairness and, secondarily, competitiveness. **"Partisan fairness"** means that parties shall be able to translate their popular support into legislative representation with approximately equal efficiency. **"Competitiveness"** means that parties' legislative representation shall be substantially and similarly responsive to shifts in the electorate's preferences.

To this end, the nonpartisan state demographer shall calculate the average electoral performance of the two parties receiving the most votes in the three preceding elections for governor, for United States Senate, and for President of the United States. This index shall be defined as the total votes received by each party in the three preceding elections for governor, for United States Senate, and for President of the United States, divided by the total votes cast for both parties in these elections. Using this index, the nonpartisan state demographer shall calculate the total number of wasted votes for each party, summing across all of the districts in the plan. **"Wasted votes"** are votes cast for a losing candidate or for a winning candidate in excess of the fifty percent threshold needed for victory. In any plan of apportionment and map of the proposed districts submitted to the respective apportionment commission, the nonpartisan state demographer shall ensure the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

To promote competitiveness, the nonpartisan state demographer shall use the electoral performance index to simulate elections in which the hypothetical statewide vote shifts by one percent, two percent, three percent, four percent, and five percent in favor of each party. The vote in each individual district shall be assumed to shift by the same amount as the statewide vote. The nonpartisan state demographer shall ensure that, in each of these simulated elections, the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable;

c. Subject to the requirements of paragraphs a. and b. of this subdivision, districts shall be composed of contiguous territory. Areas which meet only at the points of adjoining corners are not contiguous;

d. To the extent consistent with paragraphs a. to c. of this subdivision, district boundaries shall coincide with the boundaries of political subdivisions of the state. The number of counties and cities divided among more than one district shall be as small as possible. When there is a choice between dividing local political subdivisions, the more populous subdivisions shall be divided before the less populous, but this preference shall not apply to a legislative district boundary drawn along a county line which passes through a city that lies in more than one county;

e. Preference shall be that districts are compact in form, but the standards established by paragraphs a. to d. of this subdivision take precedence over compactness where a conflict arises between compactness and these standards. In general, compact districts are those which are square, rectangular, or hexagonal in shape to the extent permitted by natural or political boundaries.]

[(2) Within sixty days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days that such a ruling has been made, the congressional district committee of each of the two parties casting the highest vote for governor at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state legislative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this Article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.]

[(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall make public and file with the secretary of state and with the house apportionment commission a tentative plan of apportionment and map of the proposed districts, as well as all demographic and partisan data used in the creation of the plan and map.

The commissioners so selected shall, within ten days of receiving the tentative plan of apportionment and map of the proposed districts, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months of receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

Article III Section 5. The senate shall consist of thirty-four members elected by the qualified voters of the [senatorial districts] state of Missouri for a term of four years. [Senatorial districts shall be apportioned as provided for in Article III, Section 7.]

Article III Section 6. Each senator shall be thirty years of age, and next before the day of his election shall have been a qualified voter and a resident of the state for [three] two years [and a resident of the district which he is chosen to represent for one year, if such district shall have been so long established, and if not, then of the district or districts from which the same shall have been taken].

Article III Section 7. [(a) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer authorized in Article III, Section 3 shall begin the preparation of senatorial districting plans and maps using the same methods and criteria as those required by Article III, Section 3 for the establishment of districts for the house of representatives.

(b) Within sixty days after the population of this state is reported to the President for each decennial census of the United States, or within sixty days after a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

(c) Within six months after the population of this state is reported to the President for each decennial census of the United States or in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall file with the secretary of state and with the senatorial apportionment commission a tentative plan of apportionment and map of the proposed districts.

The commissioners so selected shall within ten days of receiving the tentative plan of apportionment and map of the proposed districts required by this subsection, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable. The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and the methods and criteria required by Section 3 of this Article for the establishment of districts for the house of representatives and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months after receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

(a) An ordered list of candidates, ranked by number of votes received, from most to least, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, the number of representatives to be elected from a congressional district, and senators to be elected state-wide. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

(b) A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions are to be delivered to the secretary of state no later than ninety days preceding the primary election.

(c) The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

(d) In each general election, each voter will cast a single vote for the election of representatives and a single vote for the election of senators, in each case voting for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

(e) To determine how many candidates in the house of representatives and the senate will be elected from each political party and which independent or write-in candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate will then be divided by that number and that number of candidates from each party is elected, with any remaining votes for each party above the number needed to elect that many candidates calculated as "surplus votes" for that party. Any independent candidate or valid write-in candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

(f) The number of candidates thus elected is calculated and subtracted from the total number of candidates to be elected. If additional candidates remain to be elected, the highest ordered remaining candidate from the party list or independent candidate with the highest number of surplus votes, is elected. The number of surplus votes required to be elected is then deducted from that party's or candidate's total votes and the process repeated until the requisite number of candidates has been elected.

(g) A political party or independent candidate having surplus votes, but not having enough surplus votes to win an additional seat, or a seat, may have those surplus votes transferred to another political party or independent candidate by notifying the Secretary of State in writing at least fourteen days before the date of the general election, specifying the political party or independent candidate that is to receive their surplus votes, under these conditions.

(h) In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

(i) If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate who would have been elected had there been one more member elected using the prescribed method for tabulating votes.

Article III Section 9. Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965. Beginning with the election of representatives in the primary and general elections to be held in the year two thousand and twenty-two the House of Representatives shall consist of twenty members elected from each congressional district. In the event that members of Congress from Missouri are elected at large, congressional district boundaries will still be drawn and used in the election of members of the Missouri House of Representatives.

[Article III Section 10. The last decennial census of the United States shall be used in apportioning representatives and determining the population of senatorial and representative districts. Such districts may be altered from time to time as public convenience may require.]

Article III Section 11. The first election of senators and representatives under this constitution, shall be held at the general election in the year one thousand nine hundred and forty-six when the whole number of representatives and the senators from the districts having even numbers, who shall compose the first class, shall be elected, and two years thereafter the whole number of representatives and the senators from districts having odd numbers, who shall compose the second class, shall be elected, and so on at each succeeding general election. Beginning with the primary and general elections to be held in the year two thousand and twenty-two senators will continue to be divided into two classes, with senators from each class, as the term of that class expires, to be elected at large on a state-wide basis.

[Article III Section 14. Writs of election to fill vacancies in either house of the general assembly shall be issued by the governor.]

Article III Section 20(d). If any provision of sections 2, 3, 5, 6, 7, 9, 11, 19, or 20(c) or the application thereof to anyone or to any circumstance is held invalid, the remainder of those provisions and the application of such provisions to others or other circumstances shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-102)

Subject

Initiative petition from Winston Apple regarding a proposed constitutional amendment to Article III. (Received July 25, 2019)

Date

August 14, 2019

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated:

This initiative petition's impact will not be realized until fiscal year (FY) 23 (102nd General Assembly). The estimated annual savings from the reduction of 3 members (8 congressional districts x 20 = 160) in today's values is $253,021. The impact to FY 23, given a start date in the middle of the fiscal year, would include only half the salaries of the three members and legislative assistants and half the expense account funding as well (so $142,299).

Member salary = 3 x $35,915 = $107,745
Member expense accounts = 3 x $8,400 = $25,200
Session mileage = 3 x 267 (average weekly roundtrip mileage) x .43 x 19 (weeks of session) = $6,544
Session per diem = 3 x $119.20 x 70 (days of session) = $25,032
Legislative Assistant salary = 3 x $29,500 = $88,500.
TOTAL = $253,021

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition is anticipated to have no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article III of the Missouri Constitution by repealing Sections 10 and 14 and amending Sections 3, 5, 6, 7, 9, 11 and 20(d).

The proposed amendment would:

- Amend Section 3 by:
  - Removing language relating to the establishment of the post of non-partisan state demographer;
  - Removing provisions concerning the number of State House members (163);
  - Requiring that the House of Representatives consist of twenty members from each of the State's Congressional districts; and
  - Removing language creating the House and Senatorial Apportionment Commissions.
- Amend Section 5 by:
  - Removing the requirement for senatorial districts; and
  - Striking the language voters of the "districts" and adding voters of the "state."
- Amend Section 6 by adding the requirement that state senatorial candidates be a resident of the State and changing the minimum duration from three years to two.

- Amend Section 7 by:
  - Striking all of the language referring to the drawing of legislative districts; and
  - Adding language that changes the election process and process to fill vacancies for State Representatives and Senators.
- Amend Section 9 by adding language starting the new election process in the year 2022 and requiring twenty House members be elected from each U.S. Congressional district.
- Repeal Section 10, which requires that Census data be used in redistricting and which allows that "districts may be altered from time to time as public convenience may require."
- Amend Section 11 by adding language making clear that the Senate will have two classes with staggered elections beginning in the year 2022.
- Repeal Section 14, which grants the Governor the authority to issue writs of election to fill vacancies in either house of the general assembly.
- Amend Section 20(d) by adding Sections 5, 6, 9 and 11 to the list of applicable sections of Article III.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated petition 2020-102 would change the composition of the General Assembly and cause representatives to be elected by congressional district and senators on a statewide basis. At each primary election, voters would see a list of all representative candidates in their congressional district and a list of all senate candidates from the state, with the ability to vote for one candidate from each list. This consolidation into congressional districts may incur the following costs:

Re-programming voting machines: Voting machines in Missouri are currently programmed to accept only single-page ballots – each of these machines would need to be reprogrammed to accept multiple-page ballots due to the potential for large numbers of candidates to file for each congressional district's seats (at both the primary and general elections).

Postage Costs: mailing envelopes used to return absentee ballots are printed with business reply permits – pursuant to RSMo 115.285. Local Election Authorities are reimbursed for these costs by the Missouri Secretary of State's Office at a current cost of $1.80 per envelope based on the current size and weight of the envelope and ballot; multiple-page ballots would increase these costs.

Ballot printing costs: Local Election Authorities bear the cost of printing ballots for each election – paying to print multiple page ballots would substantially increase printing costs.

Due to situational variables, it is not possible to determine a concrete amount of fiscal impact to this measure. However, the costs to the state and to local election authorities could be significant.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this initiative petition will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see a fiscal impact of this petition specific to their school; however, it does look like it will cost the state as a whole some money, which has the potential to impact all state funded services.

Officials from **Metropolitan Community College** indicated no impact.

Officials from the **St. Louis County Board of Elections indicated** they estimate this petition to have a fiscal note of about $30,000. They would have to upgrade their election software to include a system for ranked-choice voting, and they predict this would cost the above amount.

Officials from **Platte County Board of Elections** indicated they expect no fiscal impact from the petition.

The State Auditor's office did not receive a response from the **Department of Higher Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State government legislative operating costs are estimated to decrease by approximately $250,000 annually. State and local governments could incur additional election-related costs that could be significant, including at least $30,000 in one-time costs and ongoing costs of an unknown amount.

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article VIII (2020-101)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on July 25, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article VIII, Section 24 of the Constitution is enacted to read as follows:

Article VIII, Section 24. In general elections for the offices of United States Senator, Governor, Lieutenant Governor, Secretary of State, Attorney General, State Treasurer, and State Auditor, voters will be given the opportunity to rank candidates in order of preference.

For offices elected by this method of ranked-choice voting, the ballot must be simple and easy to understand and allow a voter to rank up to five candidates for an office in order of preference. A voter may include no more than one write-in candidate among that voter's ranked choices for each office.

For all offices elected by ranked-choice voting, the Secretary of State shall tabulate the votes according to the following method: Tabulation proceeds in sequential rounds. In the first round, only first choice votes are tabulated. If a candidate receives a majority of the votes (fifty percent of the total votes cast, plus one vote) that candidate is elected. If no candidate receives a majority of the first-choice votes cast, the candidate with the lowest number of votes is eliminated and the candidates listed as the second choice on ballots cast for the candidate being eliminated are distributed among the remaining candidates. In subsequent rounds, a voter's third, fourth, or fifth choice may be utilized, in order, as needed. Ballots that do not rank any continuing candidate, that contain votes for more than one candidate at the same ranking, or in which a voter has left a ranking blank once that ranking would have been utilized, will be considered to be "exhausted ballots" and will not be counted in that round, or subsequent rounds. This process is repeated in as many rounds as needed until one candidate wins election by receiving at least fifty percent plus one of the total valid votes tabulated in that round.

Election officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-101)

Subject

Initiative petition from Winston Apple regarding a proposed constitutional amendment to Article VIII. (Received July 25, 2019)

Date

August 14, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Health and Senior Services** indicated this petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their agency.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition would have no anticipated impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration (OA)** indicated this proposal amends Article VIII of the Constitution of Missouri by creating a ranked-choice system for election of the offices of United States Senator, Governor, Lieutenant Governor, Secretary of State, Attorney General, State Treasurer, and State Auditor. Voters would be allowed to rank up to five candidates for an office in order of preference. The Secretary of State is responsible for tabulating the votes according to the specified method.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated petition 2020-101 would institute a policy of ranked-choice voting to elect United States Senators and all statewide officers. This would require all voting machines statewide to either be coded to accept ranked-choice voting (which may require reprogramming) or to be replaced with new machines which do allow ranked-choice voting.

As of the 2017 voting systems survey conducted by the Secretary of State's Office, local election authorities reported that they possessed 7,565 voting machines. The estimated cost for each new voting machine is $5,000. The total cost to the state will vary depending on the number of machines which are ready to accept ranked-choice votes or can be reprogrammed to do so. However, using total replacement of all machines as a maximum cost, ranked-choice voting may result in a total impact to general revenue ranging from $0 up to $37,825,000.

Although this is a proposed constitutional amendment, a conservative assumption includes the possibility that Article X, section 21 may apply, which would require the state to pay for new local activities mandated by the state.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2

RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have a significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this initiative petition will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see a fiscal impact of this petition specific to their school, however it does look like it will cost the state as a whole some money, which has the potential to impact all state funded services.

Officials from **Metropolitan Community College** indicated no impact.

Officials from the **St. Louis County Board of Elections** indicated they predict this petition would have a fiscal note of about $30,000, with an additional $25,000 per statewide election. Adding a ranked-choice voting upgrade to their system would be an estimated $30,000. With the ranked-choice voting, there is a significant chance of there being a two-page ballot, which is estimated to cost $25,000 per election. Their office would like to note that there is no practical way for the Secretary of State's office to tabulate the rounds of ranked-choice voting, as every election authority has different election software.

Officials from the **Platte County Election Board** indicated this petition would have no fiscal impact on their Board of Elections.

The State Auditor's office did not receive a response from the **Department of Higher Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

Local governmental entities are estimated to have total one-time costs to upgrade or replace voting machines ranging from $0 to $37.8 million, and costs per election of an unknown amount totaling at least $25,000. State governmental entities estimate no savings and possible costs of an unknown amount.

RE: Petition approval request from Charles Hurth regarding a proposed constitutional amendment to Article VIII (2020-100)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Charles Hurth on July 18, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

ARTICLE VIII

Section 2. Qualifications of voters – disqualifications. – [All citizens] Only a citizen of the United States, including occupants of soldiers' and sailors' homes, over the age of eighteen who are residents of this state and of the political subdivision in which they offer to vote are entitled to vote at all elections by the people, if the election is one for which registration is required if they are registered within the time prescribed by law, or if the election is one for which registration is not required, if they have been residents of the political subdivision in which they offer to vote for thirty days next preceding the election for which they offer to vote: Provided however, no person who has a guardian of his or her estate or person by reason of mental incapacity, appointed by a court of competent jurisdiction and no person who is involuntarily confined in a mental institution pursuant to an adjudication of a court of competent jurisdiction shall be entitled to vote, and persons convicted of felony, or crime connected with the exercise of the right of suffrage may be excluded by law from voting.

Be it resolved by the People of the State of Missouri that the Constitution be amended:

Article VIII Section 2. <u>Qualifications of voters- Disqualification</u> is revised by deleting the single word " All" and replacing said word with "Only A" such that the first sentence of said section shall read:

[All Citizens] <u>Only A citizen</u> of the United States, including occupants of soldiers' and sailors' homes over the age of eighteen who are residents of this state and of the political subdivision in which they offer to vote are entitled to vote at all elections by the people, if the election is one for which registration is required if they are registered within the time prescribed by law, or if the election is one for which registration is not required, if they have been residents of the political subdivision in which they offer to vote for thirty days next preceding the election for which they offer to vote: Provided however, no person who has guardian of his or her estate or person by reason of mental incapacity, appointed by a Court of competent jurisdiction and no person who is involuntarily confined in a mental institution pursuant to an adjudication of a Court of competent jurisdiction shall be entitled to vote, and persons convicted of felony, or crime connected who the exercise of the right of suffrage may be excluded by law from voting.

Be it enacted by the people of the state of Missouri:

Two new sections of the Missouri Revised Statutes, to be known as sections 130.230 and 143.990, are enacted to read as follows:

130.230. 1. "The Missouri Elections Trust Fund" is hereby created, as a dedicated fund within the Missouri Department of Revenue, to provide public financing in the form of matching funds for candidates for office in Missouri who agree to, accept, and subsequently meet, the following conditions:
(1) Not to accept contributions from corporations or political action committees that accept corporate contributions; and
(2) That at least one-half of the total money raised, including in-kind contributions, by the candidate will come from individual contributors who contribute a total of $200.00 or less to the candidate during an election cycle. Primary elections and general elections constitute separate election cycles.
2. Candidates must indicate at time of filing to run for office that they intend to meet and comply with the conditions for receiving matching funds. A candidate electing to receive matching funds for the primary election cycle must also agree to comply with the conditions for receiving matching funds during the general election.
3. If it is determined at any time that a candidate who received matching funds was not in compliance with the conditions required for receiving matching funds or fell out of compliance at a later date, said candidate must return any matching funds received within 45 days of the date that it was determined that she or he failed to comply with the conditions for receiving matching funds.
4. A candidate failing to meet the conditions for the primary election cycle, may not receive matching funds as part of the general election cycle.
5. The ratio of the match relative to the amount of money raised by candidates will be determined by the Department of Revenue based on the total amount of money raised during the designated periods by all candidates who have elected to accept matching funds and the designated amount of money available from the fund during each election cycle.
6. Only contributions made during the designated periods by individual contributors, totaling $200 or less per contributor per election cycle, will be eligible for matching funds. Contributions from businesses other than sole proprietorships, political action committees and other organizations, including other campaign committees, are not eligible for matching funds. Anonymous contributions are not eligible for matching funds. In-kind contributions are not eligible for matching funds.
7. For purposes of qualifying for matching funds and determining the amount of matching funds to be distributed to each candidate the primary election cycle will begin with the date each non-incumbent candidate officially formed a campaign finance committee through the Missouri Ethics Commission; an incumbent candidate with an ongoing campaign finance committee filed for re-election with the Missouri Secretary of State; or an incumbent candidate amended her or his campaign committee by notifying the Missouri Ethics Commission of her or his intention to seek an office other than the office currently held by that candidate. The primary election cycle for purposes of distributing matching funds will end on June 30 of each election year.
8. One-third of the balance of funds in the Missouri Elections Trust Fund will be distributed as expeditiously as possible after each candidate files the required campaign finance report with the Missouri Ethics Commission for the period ending on June 30 of each election year, but no later than seven business days after the date each candidate's report was filed with the Missouri Ethics Commission.
9. Candidates losing a primary election will not receive matching funds for otherwise qualified contributions made between July 1 and the date of the primary election and must return any unused matching funds no later than 45 days after the date of the primary election.
10. For purposes of qualifying for matching funds and determining the amount of matching funds to be distributed to each candidate, the general election cycle will begin on July 1 of each election year and end on September 30 of each election year. Contributions made after September 30 of each election year will not be eligible for matching funds.
11. The full remaining balance of funds in the Missouri Elections Trust Fund will be distributed during the general election cycle to qualified candidates. This distribution of matching funds will be made as expeditiously as possible after a candidate files a campaign finance report with the Missouri Ethics Commission for the period ending on September 30 of each election year, but no later than seven business days after the date each report was filed with the Missouri Ethics Commission.
12. Candidates will not receive matching funds for otherwise qualified contributions made between October 1 and the date of the general election.
13. When a candidate losing a general election files a termination statement and disclosure report with the Missouri Ethics Commission, any and all funds remaining after repaying any debts owed by the campaign committee are to be paid over to the Missouri Elections Trust Fund, up to and including an amount equal to the full amounts of matching funds received by said candidate.
14. The Missouri Elections Trust Fund will be administered by the Missouri Department of Revenue based on reports filed with the Missouri Ethics Commission.
15. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

143.990. 1. In each taxable year beginning on or after January 1, 2021, each individual or corporation having paid state income taxes in the amount of twenty-five dollars or more may designate that five dollars of the tax paid shall be paid over to the Missouri elections trust fund as provided in section 130.230. In the case of a husband and wife with a filing status of married filing combined having paid state income tax in the amount of fifty dollars or more, each spouse may separately designate that five dollars shall be paid to the fund.
2. The option to contribute to this fund, as authorized by this section, shall be clearly and unambiguously printed on the same page of each income tax return form provided by the state upon which the amount of the amount of tax owed is indicated, and shall include the following statement: "Contributing to the Missouri Elections Trust Fund will not increase the amount of tax owed or reduce the amount of overpayment to be refunded."
3. The department of revenue shall deposit the contributions made pursuant to this statute into the Missouri Election Trust Fund as created in section 130.230.
4. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-099)

Subject

Initiative petition from Winston Apple regarding a proposed amendment to Chapters 130 and 143 of the Revised Statutes of Missouri. (Received July 1, 2019)

Date

July 22, 2019

Description

This proposal would amend Chapters 130 and 143 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** and the **Missouri Ethics Commission.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated they report no cost for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated they see this initiative petition as having a positive impact to the Missouri Elections Trust Fund of $0 - $15.1 million. This in turn would reduce General Revenue by $0 - $15.1 million.

Officials from the **Department of Public Safety-Director's Office** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition; however, general revenue could be impacted.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition is not expected to have a fiscal impact on their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal creates the Missouri Elections Trust Fund to provide public financing in the form of matching funds for candidates for office in Missouri who agree to, accept, and meet specified conditions. The Missouri Elections Trust Fund is to be administered by Department of Revenue.

This proposal would allow individuals and corporations to donate $5 of their tax liability to the Missouri Elections Trust Fund beginning with tax year 2021. Individuals with a filing status of single or head-of-household must have paid $25 in state income tax in order to donate. Individuals with a filing status of married filing joint must have paid $50 in state income tax and each spouse may contribute $5. Corporations that have paid $25 in state income tax may also contribute $5 to the fund.

OA Budget and Planning (B&P) notes that both individual and corporate income tax collections are deposited into the state General Revenue fund. B&P further notes that the proposal would direct $5 or $10 per donor to the newly created Missouri Elections Trust Fund. Therefore, for every $5 or $10 donation into the new fund, General Revenue will be reduced by $5 or $10.

B&P does not have the ability to determine the exact number of individuals and corporations that would choose to donate to the Missouri Elections Trust Fund. However, B&P can estimate the maximum potential impact. B&P further notes that while donations could begin for tax year 2021 income tax liabilities, such liabilities are not calculated until April of 2022. Therefore, donations to the new fund would not begin until FY 2022.

B&P estimates that up to 1,160,981 individuals with a filing status of single or head-of-household could choose to donate $5 of their income tax liability to the new fund for a maximum total donation to the fund of $5,804,905. In addition, up to 1,028,637 individuals with a filing status of married filing joint could choose to donate up to $10 of their income tax liability for a maximum total donation to the fund of $10,286,370. In addition, up to 118,129 corporations could choose to donate $5 to the new fund for a maximum total

donation of $90,643. Therefore, B&P estimates that this proposal could generate donations of $0 to $16,181,918 to the Missouri Elections Trust Fund, beginning with FY 2022. This proposal could also reduce General Revenue by $0 to $16,181,918, beginning with FY 2022.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In (fiscal year) FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office, but it could have a significant fiscal impact to the state General Revenue Fund.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this initiative petition has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated if limited to a maximum of $5.00 per tax payer (who owes income tax to the state) they believe this will have a very small negative impact on all state funded operations, including their school.

Officials from the **Missouri Ethics Commission** indicated the proposed petition does not have fiscal impact on their office.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State governmental entities anticipate decreased revenues in the General Revenue Fund of up to $16.1 million annually by 2022 and anticipate corresponding increased annual revenues in the Missouri Elections Trust Fund. Local governmental entities expect no costs or savings from this proposal.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 2 (2020-098)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 27, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7) Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article; or

(2) Such individuals may choose to register pursuant to any other registration procedure available under general election law.

2. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

Section 28. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-098)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 27, 2019)

Date

July 17, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary costs and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed constitutional amendment petition language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States

citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.
- MEDL changes to the signature collection and certification processes for all transactions to include updates related to automatic voter registration.
- Possible modifications to license verification statement or generated money receipt or temporary driving privilege document to include additional information related to automatic voter registration.

Section 27

An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article.

The Department would be required to:

- Develop file generation edits to ensure driver license, nondriver license, and permit applicants age 16 and over are included in the new weekly file sent to the Secretary of State.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00
		Total = $11,517.60

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, or nondriver license. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

For purpose of this fiscal note, the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a new, renewal, or duplicate instruction permit, or commercial learners permit. If it is not the sponsor's intent to include instruction permit or commercial learners permit transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Section 27
The Department assumes this minimum age applies to the file transfer to Secretary of State and will not change current voter registration application provisions which limit completion of an application to persons age 17 ½ years of age or older with a certification that they will be 18 years of age on or before election date.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting five new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast

a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

The proposal provides that an individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **18.7%** of the population is under **16** years old, which accounts for **54,515** residents. They have on average **190,000** registered voters, of which about **30,000 (16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
PTH = Part-time Hire
AP = Annual Pay

291,923 R's – 50,415 R's under **16 yrs = 241,508 R's 16 yrs** or older

241,508 R's 16 yrs or older – **190,000 RV's = 51,508 PV's**

51,508 PV's x .50 MC = $20,000 + fees **= $25,754**

51,508 PV x 1.06 CPC2P = $54,598.48

If they have approximately **51,508 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$25,754 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$54,598.48** to the cost when it is multiplied by the estimated **51,508** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** and **1 PTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost per **FTH** will be **$24,689.60** per hire for their annual pay and **$12,026.90** annual pay for the **PTH**. The total annual cost for two fulltime hires will be **$49,379.20**.

51,508 PV's x .50 MC	**= $25,754**
51,508 PV x 1.06 CPC2	**= $54,598.48**
2 FTH x $24,689.60 AP	**= $49,379.20**
1 PTH x $12,026.90 AP	**= $12,026.90**
Total:	**= $141,758.58**

The total estimated initial cost for Greene County for **IP 20-098** proposing to amend Article VIII, version 1, will cost Greene County **$141,758.58** with a minimum ongoing cost of **$61,406.10** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this initiative petition would have a small negative fiscal impact on their city because some of the costs of opening up locations for early voting would be passed from the election authority to their city.

Officials from **Wellsville-Middletown R-1 School District** indicated the fiscal impact of this petition will be dependent on the cost to the state to implement the provisions contained in the petition and where the state finds the money. Any dilution of general revenue funds is likely to negatively impact all public schools to some extent.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $37,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend, and at a rate of $5,000 per every 8 hours, this would cost $7,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is

important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated the additional times for absentee voting would increase the cost per election by $1,500.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $756,000 in one-time costs, $61,000 in annual costs, and $82,000 in costs per election.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 1 (2020-097)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 27, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7) Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article; or

(2) Such individuals may choose to register pursuant to any other registration procedure available under general election law.

2. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

Section 28. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-097)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 27, 2019)

Date

July 17, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary costs and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed constitutional amendment petition language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States

citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.
- MEDL changes to the signature collection and certification processes for all transactions to include updates related to automatic voter registration.
- Possible modifications to license verification statement or generated money receipt or temporary driving privilege document to include additional information related to automatic voter registration.

Section 27

An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article.

The Department would be required to:

- Develop file generation edits to ensure driver license, nondriver license, and permit applicants age 16 and over are included in the new weekly file sent to the Secretary of State.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III	10 hrs. x $19.80 =	$198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00
		Total = $11,517.60

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, or nondriver license. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

For purpose of this fiscal note, the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a new, renewal, or duplicate instruction permit, or commercial learners permit. If it is not the sponsor's intent to include instruction permit or commercial learners permit transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Section 27
The Department assumes this minimum age applies to the file transfer to Secretary of State and will not change current voter registration application provisions which limit completion of an application to persons age 17 ½ years of age or older with a certification that they will be 18 years of age on or before election date.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting five new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast

a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

The proposal provides that an individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **18.7%** of the population is under **16** years old, which accounts for **54,515** residents. They have on average **190,000** registered voters, of which about **30,000 (16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
PTH = Part-time Hire
AP = Annual Pay

291,923 R's – 50,415 R's under **16 yrs = 241,508 R's 16 yrs** or older

241,508 R's 16 yrs or older – **190,000 RV's = 51,508 PV's**

51,508 PV's x .50 MC = $20,000 + fees **= $25,754**

51,508 PV x 1.06 CPC2P = $54,598.48

If they have approximately **51,508 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$25,754 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$54,598.48** to the cost when it is multiplied by the estimated **51,508** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** and **1 PTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost per **FTH** will be **$24,689.60** per hire for their annual pay and **$12,026.90** annual pay for the **PTH**. The total annual cost for two fulltime hires will be **$49,379.20**.

51,508 PV's x .50 MC	**= $25,754**
51,508 PV x 1.06 CPC2	**= $54,598.48**
2 FTH x $24,689.60 AP	**= $49,379.20**
1 PTH x $12,026.90 AP	**= $12,026.90**
Total:	**= $141,758.58**

The total estimated initial cost for Greene County for **IP 20-097** proposing to amend Article VIII, version 1, will cost Greene County **$141,758.58** with a minimum ongoing cost of **$61,406.10** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this initiative petition would have a small negative fiscal impact on their city because some of the costs of opening up locations for early voting would be passed from the election authority to their city.

Officials from **Wellsville-Middletown R-1 School District** indicated the fiscal impact of this petition will be dependent on the cost to the state to implement the provisions contained in the petition and where the state finds the money. Any dilution of general revenue funds is likely to negatively impact all public schools to some extent.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $37,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend, and at a rate of $5,000 per every 8 hours, this would cost $7,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is

important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated the additional times for absentee voting would increase the cost per election by $1,500.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $756,000 in one-time costs, $61,000 in annual costs, and $82,000 in costs per election.

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Winston Apple regarding a proposed statutory amendment to Chapter 192 (2020-096)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Winston Apple on June 27, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri:

One new section of the Revised Missouri Statutes is enacted, to be known as section 192.008, to read as follows:

192.008. 1. "The Missouri Health Insurance Cooperative" (hereinafter referred to as "MHIC") is hereby created, within the department of health and senior services, to provide health insurance for citizens of Missouri who wish to become members of the cooperative.

2. The MHIC shall be administered by the director of the department of health and senior services. The department of health and senior services shall, within one (1) calendar year of the effective date of this section, promulgate rules necessary for the administration of this section.

3. The state of Missouri is authorized to issue bonds to cover the start-up costs for the MHIC, as well as any shortages of funds needed to pay authorized benefits until the funds received from membership dues are sufficient to cover those expenses. Membership dues and out-of-pocket maximums for members are to be set and then adjusted as soon as practicable to fully cover administrative expenses and benefits paid with money collected from premiums paid by members.

4. Memberships in the MHIC shall be available beginning no later than January 1, 2022.

5. Enrollment in the MHIC shall be voluntary and limited to citizens of the state of Missouri.

6. The MHIC shall be revenue-neutral. The percentages of income established for membership dues and out-of-pocket maximums shall be adjusted annually and set at levels that will insure that revenues are sufficient to cover all costs, including amounts paid out to members for health care expenses in excess of their out-of-pocket maximum and all administrative expenses; as well as the funds necessary to pay principal and interest on bonds issued to fund start-up costs for MHIC.

7. Membership dues for coverage through MHIC, as well as the annual out-of-pocket maximum for members will be based on percentages of each member's gross annual income, as determined by the board. Membership dues are to be set as low as possible and out-of-pocket maximums set no higher than necessary to maintain the revenue neutral status of the MHIC, while making membership as affordable as possible.

8. Only treatments and procedures deemed medically necessary, as determined by the department of health and senior services shall be covered through the MHIC.

9. The amount of payments made to health care providers for procedures and services will be determined by the department of health and senior services, shall not be excessive. The amounts paid to health care providers by Medicare and Medicaid shall serve as a general guide for pricing procedures and services.

10. Members of the MHIC and health care providers in the state of Missouri, are responsible for keeping records and receipts for covered health care, to be furnished to the MHIC if expenses for needed health care exceed the out-of-pocket maximum for a given calendar year and reimbursement is thereby requested. Receipts must be provided to the MHIC upon request.

11. All subsections and all clauses of this statute, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-096)

Subject

Initiative petition from Winston Apple regarding a proposed amendment to Chapter 192 of the Revised Statutes of Missouri. (Received June 27, 2019)

Date

July 17, 2019

Description

This proposal would amend Chapter 192 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** (DHSS) indicated expenses of $0.

An unknown number of staff to oversee the Missouri Health Insurance Cooperative program would require rental space, located in Jefferson City.

Unknown Information Technology costs or savings related to this proposal.

Section 192.008:

This initiative petition creates a new health insurance program, The Missouri Health Insurance Cooperative (MHIC), with oversight by the Department of Health and Senior Services (DHSS). MHIC is to be available no later than January 1, 2022 which is six months of fiscal year 2022.

The program is to be self-supporting by annually adjusting premiums and out-of-pocket maximums to ensure that revenues support all program and administrative costs, as well as principal and interest on bonds issued to fund start-up costs for the MHIC.

They are unable to determine the number of individuals who would participate in MHIC. In addition, the premium rates charged by MHIC could be affected by such items as: (1) costs for covered services, (2) the scope of benefits that are included, (3) the plan's cost-sharing requirements, and (4) the health status of the plan's enrollees. Also, the MHIC's oversight responsibilities and costs would be directly impacted by the size of the program (i.e., number of participants, list of covered services, etc.) The Office of Administration could issue bonds for startup costs and cover initial shortages. They are not able to determine the amount of startup cost, premium rate, etc. They do not administer a similar

program of any kind, so significant unknown staffing or contractual costs would be necessary. Due to the numerous unknown factors, they are submitting an Unknown Expense equal to an Unknown Revenue (Revenue Neutral – zero impact) fiscal note.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition seeks to establish a public health insurance option in the state of Missouri. Though many of this plan's specifics are unclear at this time, they believe that at least some of their medical plan's current subscribers would switch to the public option. This would result in a savings to their department, since they pay a large portion of each employee's healthcare premiums. The fewer employees subscribed to the medical plan, the less their department will have to pay in premiums.

Considering simply the short term impact, enacting the public option laid out in this initiative petition would result in an unknown positive fiscal impact to their department. The actual savings would be contingent upon consumer behavior.

Officials from the **Office of Administration** indicated this proposal creates the Missouri Health Insurance Cooperative (MHIC), housed in and administered by the Department of Health and Senior Services, to provide health insurance for Missouri citizens who wish to become members of the cooperative. Membership in the MHIC is to be available beginning no later than January 1, 2022 and enrollment is to be voluntary. The MHIC is to be revenue neutral, with dues and out-of-pocket maximums adjusted annually to ensure that revenues are sufficient to cover all costs. The State of Missouri is authorized to issue bonds to cover the start-up costs for the MHIC, as well as any shortages of funds needed to pay authorized benefits until the funds received from membership dues are sufficient to cover those expenses.

It should be noted that it is unclear if the State of Missouri would have the authority to issue bonds for a health insurance cooperative. Their office defers to the Department of Health and Senior Services on the fiscal impact of this initiative petition.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. Their office estimates $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have a significant impact on their office.

Officials from the **State Treasurer's office** indicated this appears to have no fiscal impact to their office, but it is unclear. There is no discussion of the fund that will manage the costs of the MHIC, how it will operate and if the fund will be held in the treasury. There is a provision for bonds to be issued to cover start-up costs. There is no maximum authorized amount, nor any requirements noted or funding for repayment of principal and interest. There is the potential that the Treasurer would have to sign any bond documents.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this petition will have a positive fiscal impact on their city because it will increase the pool of insured citizens in the city. Large portions of Kansas City's Health Levy and other city dollars are spent on providing services to the underinsured and uninsured, either through direct services or through contracts with safety net providers.

Officials from **Wellsville-Middletown R-1 School District** indicated depending on how this petition would be implemented (rules and regs) this has the potential to have a substantial fiscal impact on their school in that the cost of health insurance for their employees is a large chunk of their annual budget and is ever-increasing, much faster than their increase in funding from all sources. If the cost of this insurance would be less than what their district currently pays and a process for public schools to access this program on behalf of their employees is implemented, than there could be a positive fiscal impact for their school. Right now their insurance package for their staff runs a shade over $7,200.00 per year.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State governmental entities expect no costs from this proposal and may have savings of an unknown amount if some state employees switch health care coverage to this new health insurance plan. Local governmental entities expect no costs from this proposal and expect savings of an unknown amount.

RE: Petition approval request from Winston Apple regarding a proposed statutory amendment to Chapters 130 & 143 (2020-095)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Winston Apple on June 27, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

My commission expires: _____

Be it enacted by the people of the state of Missouri:

Two new sections of the Missouri Revised Statutes, to be known as sections 130.230 and 143.990, are enacted to read as follows:

130.230. 1. "The Missouri Elections Trust Fund" is hereby created to provide public financing for candidates for office in Missouri who agree to, accept, and subsequently meet, the following conditions:
(1) Not to accept contributions from corporations or political action committees that accept corporate contributions; and
(2) That at least one-half of the money raised, or in-kind contributions received, by the candidate will come from individual contributors who contribute a total of $200.00 or less to the candidate during an election cycle.
2. The funding provided to eligible candidates will be in the form of matching funds, with the ratio of the match relative to the amount of money raised by candidates to be determined by the commission based on the total amount of money raised by all candidates who have elected to accept public funds and the total amount of money available from the fund during each election year.
(1) Thirty-five percent of the funds available shall be distributed on the first day of June of each general election year, based on total monetary contributions received during the election cycle up to the date of the quarterly report filed with the Missouri Ethics Commission for the quarter ending on the thirty-first day of March. (In-kind contributions are not eligible for matching funds.)
(2) The balance of available funds shall be distributed on the third Monday in September of each general election year to eligible candidates in the general election, based on total monetary contributions received and reported through the thirtieth day of August.
3. When a candidate or committee files a termination statement and disclosure report with the Missouri Ethics Commission, any and all funds remaining after repaying any debts owed by the campaign committee are to be paid over to the Missouri Elections Trust Fund, up to and including an amount equal to the full amounts of matching funds received by said candidate.
4. The Missouri Elections Trust Fund will be administered by a board, to be known as the "Missouri Elections Trust Fund Commission" consisting of seven members, to be nominated by the governor and approved by the senate. The Missouri Electors Trust Fund Commission shall, within one (1) calendar year of the effective date of this section, promulgate rules necessary for the administration of this section, including a method for the expenditure of the funds collected.
(1) No individual may be appointed to the Missouri Elections Trust Fund Commission who is:
(a) a government employee;
(b) a registered lobbyist, or who has been a registered lobbyist at any time during the 5-year period preceding their appointment to the commission;
(c) an officer or employee of a political party or political campaign;
(d) an elected official, senator, or representative.
(2) Members of the Missouri Elections Trust Fund Commission shall be appointed for a term of five years; except the second and third classes of the first seven members to be appointed, who shall be divided into three classes, as follows;
(a) The first three initial members to be confirmed shall serve a full five-year term;
(b) The fourth and fifth initial members to be confirmed shall serve a three-year term;
(c) The sixth and seventh initial members to be confirmed shall serve a one-year term.
(3) Members of the commission may be removed from office if convicted of fraud or mismanagement of funds administered by the commission, or conviction of a felony.
5. Members of the commission will be reimbursed for travel and other expenses at the prevailing rate for other employees and officers of the state of Missouri.
6. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

143.990. 1. In each taxable year beginning on or after January 1, 2021, each individual or corporation having paid state income taxes in the amount of twenty-five dollars or more may designate that five dollars of the tax paid shall be paid over to the Missouri elections trust fund as provided in section 130.230. In the case of a husband and wife with a filing status of married filing combined having paid state income tax in the amount of fifty dollars or more, each spouse may separately designate that five dollars shall be paid to the fund.
2. The option to contribute to this fund, as authorized by this section, shall be clearly and unambiguously printed on the same page of each income tax return form provided by the state upon which the amount of the amount of tax owed is indicated, and shall include the following statement: "Contributing to the Missouri Elections Trust Fund will not increase the amount of tax owed or reduce the amount of overpayment to be refunded."
3. The department of revenue shall deposit the contributions made pursuant to this statute into the Missouri Election Trust Fund as created in section 130.230.
4. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by amending Section 52(b) to read as follows:

Section 52(b). The veto power of the governor shall not extend to measures referred to the people. All elections on measures referred to the people shall be had at the general state elections, except when the general assembly shall order a special election. Any measure referred to the people shall take effect when approved by a majority of the votes cast thereon, and not otherwise. This section shall not be construed to deprive any member of the general assembly of the right to introduce any measure, except that any measure introduced by a member of the general assembly and passed by the general assembly that alters, amends, or repeals a statute proposed through the initiative and subsequently approved by the people shall not take effect unless and until it is also approved by the people.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by amending Section 39 to read as follows:

Section 39. The general assembly shall not have power:
(1) To give or lend or to authorize the giving or lending of the credit of the state in aid or to any person, association, municipal or other corporation;
(2) To pledge the credit of the state for the payment of the liabilities, present or prospective, of any individual, association, municipal or other corporation;
(3) To grant or to authorize any county or municipal authority to grant any extra compensation, fee or allowance to a public officer, agent, servant or contractor after service has been rendered or a contract has been entered into and performed in whole or in part;
(4) To pay or to authorize the payment of any claim against the state or any county or municipal corporation of the state under any agreement or contract made without express authority of law;
(5) To release or extinguish or to authorize the releasing or extinguishing, in whole or in part, without consideration, the indebtedness, liability or obligation of any corporation or individual due this state or any county or municipal corporation;
(6) To make any appropriation of money for the payment, or on account of or in recognition of any claims audited or that may hereafter be audited by virtue of an act entitled "An Act to Audit and Adjust the War Debts of the State," approved March 19, 1874, or any act of a similar nature, until the claim so audited shall have been presented to and paid by the government of the United States to this state;
(7) To act, when convened in extra session by the governor, upon subjects other than those specially designated in the proclamation calling said session or recommended by special message to the general assembly after the convening of an extra session;
(8) To remove the seat of government from the City of Jefferson;
(9) Except as otherwise provided in section 39(b), section 39(c), section 39(e) or section 39(f) of this article, to authorize lotteries or gift enterprises for any purpose, and shall enact laws to prohibit the sale of lottery or gift enterprise tickets, or tickets in any scheme in the nature of a lottery; except that, nothing in this section shall be so construed as to prevent or prohibit citizens of this state from participating in games or contests of skill or chance where no consideration is required to be given for the privilege or opportunity of participating or for receiving the award or prize and the term "lottery or gift enterprise" shall mean only those games or contests whereby money or something of value is exchanged directly for the ticket or chance to participate in the game or contest. The general assembly may, by law, provide standards and conditions to regulate or guarantee the awarding of prizes provided for in such games or contests under the provision of this subdivision;
(10) To impose a use or sales tax upon the use, purchase or acquisition of property paid for out of the funds of any county or other political subdivision.
(11) To prohibit, restrict, limit, or impair, by existing or future law or ordinance of the state, the right of any county, city, town, or village, to establish, mandate or require an employer to provide to an employee a minimum wage rate or employment benefit that exceeds the requirements of federal or state laws, rules, or regulations.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-093)

Subject

Initiative petition from Winston Apple regarding a proposed constitutional amendment to Article III. (Received June 27, 2019)

Date

July 17, 2019

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated there is no impact for their department regarding this initiative petition.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their agency.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article III of the Constitution of Missouri by specifying that the General Assembly shall not have the power to prohibit, restrict, limit, or impair the right of any county, city, town, or village to establish, mandate or require an employer to provide an employee a minimum wage rate or employment benefit that exceeds the requirements of federal or state laws, rules, or regulations.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. Their office estimates $65,000 per page for the costs of

publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have an impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office, unless Jefferson City raises its minimum wage. Any such increase could have a potential fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated it is impossible to determine the fiscal impact of this proposed change since it is dependent on any bill/law/petition by the people that it is applied to. Though if a local community chooses to levy a local tax to support local services the state should have no power to interfere with it.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

State and local governmental entities estimate no costs or savings from this proposal.

PROPOSED MEASURE

Be it enacted by the *people of the state of Missouri:*

Section 558.019, RSMo, subsection 3 would be repealed. In lieu of it a new subsection relating to prison commitment terms for first-time dangerous felony offenders and offenders with multiple convictions of dangerous felonies. The current law reads as follows (with the matter to be deleted in [brackets], and the new matter shown underlined):

§ 558.019. 1. This section shall not be construed to affect the powers of the governor under article IV, section 7, of the Missouri Constitution. This statute shall not affect those provisions of section 565.020, section 566.125, or section 571.015, which set minimum terms of sentences, or the provisions of section 559.115, relating to probation.

2. The provisions of subsections 2 to 5 of this section shall be applicable to all classes of felonies except those set forth in chapter 579, or in chapter 195 prior to January 1, 2017, and those otherwise excluded in subsection 1 of this section. For the purposes of this section, "prison commitment" means and is the receipt by the department of corrections of an offender after sentencing. For purposes of this section, prior prison commitments to the department of corrections shall not include an offender's first incarceration prior to release on probation under sections 217.362 or 559.115. Other provisions of the law to the contrary notwithstanding, any offender who has been found guilty of a felony other than a dangerous felony as defined in section 556.061 and is committed to the department of corrections shall be required to serve the following minimum prison terms:

(1) If the offender has one previous prison commitment to the department of corrections for a felony offense, the minimum prison term which the offender must serve shall be forty percent of his or her sentence or until the offender attains seventy years of age, and has served at least thirty percent of the sentence imposed, whichever occurs first;

(2) If the offender has two previous prison commitments to the department of corrections for felonies unrelated to the present offense, the minimum prison term which the offender must serve shall be fifty percent of his or her sentence or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first;

(3) If the offender has three or more previous prison commitments to the department of corrections for felonies unrelated to the present offense, the minimum prison term which the offender must serve shall be eighty percent of his or her sentence or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first.

[3. Other provisions of the law to the contrary notwithstanding, any offender who has been found guilty of a dangerous felony as defined in section 556.061 and is committed to the department of corrections shall be required to serve a minimum prison term of eighty-five percent of the sentence imposed by the court or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first.]

3. Other provisions of the law to the contrary notwithstanding, any offender who has more than once been found guilty of a dangerous felony as defined in section 556.061 and is committed to the department of corrections shall be required to serve a minimum prison term of eighty-five percent of the sentence imposed by the court or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first.:

(1) If the offender has one previous prison commitment to the department of corrections for a dangerous felony offense, the minimum prison term which the offender must serve shall be fifty percent of their sentence or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first. If the offender has maintained the best possible institutional score for the year prior to their scheduled parole hearing date, then parole shall be granted. If parole is denied, a hearing shall be scheduled every two years until the offender is paroled. The first-time conviction exception of this subsection shall be applicable to all dangerous felonies, except for rape and child molestation, occurring on or after August 28, 1994.

4. For the purpose of determining the minimum prison term to be served, the following calculations shall apply:

(1) A sentence of life shall be calculated to be thirty years;

(2) Any sentence either alone or in the aggregate with other consecutive sentences for offenses committed at or near the same time which is over seventy-five years shall be calculated to be seventy-five years.

5. For purposes of this section, the term "minimum prison term" shall mean time required to be served by the offender before he or she is eligible for parole, conditional release or other early release by the department of corrections.

6. (1) A sentencing advisory commission is hereby created to consist of eleven members. One member shall be appointed by the speaker of the house. One member shall be appointed by the president pro tem of the senate. One member shall be the director of the department of corrections. Six members shall be appointed by and serve at the pleasure of the governor from among the following: the public defender commission; private citizens; a private member of *the* Missouri Bar; the board of probation and parole; and a prosecutor. Two members shall be appointed by the supreme court, one from a metropolitan area and one from a rural area. All members shall be appointed to a four-year term. All members of the sentencing commission appointed prior to August 28, 1994, shall continue to serve on the sentencing advisory commission at the pleasure of the governor.

(2) The commission shall study sentencing practices in the circuit courts throughout the state for the purpose of determining whether and to what extent disparities exist among the various circuit courts with respect to the length of sentences imposed and the use of probation for offenders convicted of the same or similar offenses and with similar criminal histories. The commission shall also study and examine whether and to what extent sentencing disparity among economic and social classes exists in relation to the sentence of death and if so, the reasons therefor, if sentences are comparable to other states, if the length of the sentence is appropriate, and the rate of rehabilitation based on sentence. It shall compile statistics, examine cases, draw conclusions, and perform other duties relevant to the research and investigation of disparities in death penalty sentencing among economic and social classes.

(3) The commission shall study alternative sentences, prison work programs, work release, home-based incarceration, probation and parole options, and any other programs and report the feasibility of these options in Missouri.

(4) The governor shall select a chairperson who shall call meetings of the commission as required or permitted pursuant to the purpose of the sentencing commission.

(5) The members of the commission shall not receive compensation for their duties on the commission, but shall be reimbursed for actual and necessary expenses incurred in the performance of these duties and for which they are not reimbursed by reason of their other paid positions.

(6) The circuit and associate circuit courts of this state, the office of the state courts administrator, the department of public safety, and the department of corrections shall cooperate with the commission by providing information or access to information needed by the commission. The office of the state court administrator will provide needed staffing resources.

7. Courts shall retain discretion to lower or exceed the sentence recommended by the commission as otherwise allowable by law, and to order restorative justice methods, when applicable.

8. If the imposition or execution of a sentence is suspended, the court may order any or all of the following restorative justice methods, or any other method that the court finds just or appropriate:

(1) Restitution to any victim or a statutorily created fund for costs incurred as a result of the offender's actions;

(2) Offender treatment programs;

(3) Mandatory community service;

(4) Work release programs in local facilities; and

(5) Community-based residential and nonresidential programs.

9. The provisions of this section shall apply only to offenses occurring on or after August 28, 2003.

10. Pursuant to subdivision (1) of subsection 8 of this section, the court may order the assessment and payment of a designated amount of restitution to a county law enforcement restitution fund established by the county commission pursuant to section 50.565. Such contribution shall not exceed three hundred dollars for any charged offense. Any restitution moneys deposited into the county law enforcement restitution fund pursuant to this section shall only be expended pursuant to the provisions of section 50.565.

11. A judge may order payment to a restitution fund only if such fund had been created by ordinance or resolution of a county of the state of Missouri prior to sentencing. A judge shall not have any direct supervisory authority or administrative control over any fund to which the judge is ordering a person to make payment.

12. A person who fails to make a payment to a county law enforcement restitution fund may not have his or her probation revoked solely for failing to make such payment unless the judge, after evidentiary hearing, makes a finding supported by a preponderance of the evidence that the person either willfully refused to make the payment or that the person willfully, intentionally, and purposefully failed to make sufficient bona fide efforts to acquire the resources to pay.

13. Nothing in this section shall be construed to allow the sentencing advisory commission to issue recommended sentences in specific cases pending in the courts of this state.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-092)

Subject

Initiative petition from Shetova Hayes regarding a proposed amendment to Chapter 558 of the Revised Statutes of Missouri. (Received June 20, 2019)

Date

July 10, 2019

Description

This proposal would amend Chapter 558 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated this initiative petition proposes changes in section 558.019, RSMo subsection 3 as follows:

Section 558.019 subsection 3, requiring a minimum prison term of eighty-five percent for a dangerous felony, is repealed to add the term, "*Any offender who has more than once been found guilty of a dangerous felony*" instead of "*Any offender who has been found guilty of a dangerous felony.*" Thus, the requirement of completion of eighty five percent of prison term before attaining seventy years is amended to be applicable to offenders who are found more than once guilty of a dangerous felony under section 556.061.

Although section 558.019, subsection 3(1) sets the minimum prison term to fifty percent for offenders who have one previous prison commitment to the department of corrections for a dangerous felony, it is assumed that the intent of the legislation is to be that offenders

with no prior incarceration for a dangerous felony will serve a minimum prison term of 50%. The subsection also sets parole hearing guidelines for such offenders. The legislation will apply to offenders serving new sentences and to offenders incarcerated and serving a minimum prison term of 85%.

Calculating how long offenders will serve if the minimum prison term (MPT) is reduced to 50% is difficult because dangerous felonies are serious offenses and the parole board has historically required offenders to serve a significant portion of the sentence before parole. If the MPT is reduced to 50%, then the time served can be from 50% to the conditional release date.

It is unknown how the Parole Board will determine the release dates for offenders serving dangerous felonies. Therefore, the fiscal impact to their department with the passage of this bill would be unknown ($0) to an unknown cost avoidance (savings), as nothing in the petition would require them to hold offenders longer, but would rather allow for the potential early release of qualifying offenders.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety-Director's Office** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Public Safety - Missouri State Highway Patrol** indicated no impact for this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition is projected to have no fiscal impact on their office/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Section 558.019 by modifying minimum prison terms for offenders found guilty of a dangerous felony. Current law provides that offenders who have been found guilty of a dangerous felony shall be required to serve a minimum prison term of 85% of the sentence or until the offender attains 70 years of age and has served at least 40% of the sentence imposed.

This proposal modifies current law to require that offenders who have been more than once found guilty of a dangerous felony shall be required to serve a minimum prison term of 85% of the sentence or until the offender attains 70 years of age and has served at least 40% of the sentence imposed. Offenders who have one previous prison commitment for a dangerous felony shall be required to serve a minimum prison term of 50% of the sentence or until the offender attains 70 years of age and has served at least 40% of the sentence imposed. A parole hearing for such offenders shall be scheduled every two years and parole shall be granted if the offender has maintained the best possible institutional score for the year prior to their parole hearing. The first-time conviction exception shall be applicable to dangerous felonies, except for rape and child molestation, occurring on or after August 28, 1994.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have a significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact of this petition on their school.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State governmental entities estimate no additional costs, and possible savings of an unknown amount. Local governmental entities expect no costs or savings.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 4 (2020-091)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 17, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article; or

(2) Such individuals may choose to register pursuant to any other registration procedure available under general election law.

2. Such individuals are prohibited from casting a ballot untilt he meet all voter eligibility requirements.

Section 28. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 3 (2020-090)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 17, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article; or

(2) Such individuals may choose to register pursuant to any other registration procedure available under general election law.

2. Such individuals are prohibited from casting a ballot untilt he meet all voter eligibility requirements.

Section 28. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

FISCAL NOTE (20-089)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 18, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the state of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who,

based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend or discontinue current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021
Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021
Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)

For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting four new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to

an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **20.9%** of the population is under **18** years old, which accounts for **60,957** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
AP = Annual Pay

291,9235 R's – 60,957 R's under **18 yrs** = **230,966 R's 18 yrs** or older

230,966 R's 18 yrs or older – **190,000 RV's = 40,966 PV's**

40,966 PV's x .50 MC = $20,483

40,966 PV x 1.06 CPC2P = $43,423.96

If they have approximately **40,966 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$20,483 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$43,423.96** to the cost when it is multiplied by the estimated **40,966** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost will be **$24,689.60** per hire for their annual pay. The total annual cost for two fulltime hires will be **$49,379.20.**

40,966 PV's x .50 MC	**= $20,483**
40,966 PV's x 1.06 CPC2P	**= $43,423.96**
2 FTH x $24,689.60 AP	**= $49,379.20**
Total:	**= $113,286.16**

The total estimated initial cost for Greene County for **IP 20-089** proposing to amend Article VIII, version 2, will cost Greene County **$113,286.16** with a minimum ongoing cost of **$49,379.20** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Andrew Bergerson and Jared Wight provided the following information:

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $745,000 in one-time costs, $49,000 in annual costs, and $181,000 in costs per election.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 1 (2020-088)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 17, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman

INITIATIVE PETITION

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 3rd day of November, 2020, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-088)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 18, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the state of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who,

based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend or discontinue current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021
Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021
Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)

For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting four new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to

an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **20.9%** of the population is under **18** years old, which accounts for **60,957** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
AP = Annual Pay

291,9235 R's – 60,957 R's under **18 yrs** = **230,966 R's 18 yrs** or older

230,966 R's 18 yrs or older – **190,000 RV's = 40,966 PV's**

40,966 PV's x .50 MC = $20,483

40,966 PV x 1.06 CPC2P = $43,423.96

If they have approximately **40,966 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$20,483 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$43,423.96** to the cost when it is multiplied by the estimated **40,966** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost will be **$24,689.60** per hire for their annual pay. The total annual cost for two fulltime hires will be **$49,379.20.**

40,966 PV's x .50 MC	**= $20,483**
40,966 PV's x 1.06 CPC2P	**= $43,423.96**
2 FTH x $24,689.60 AP	**= $49,379.20**
Total:	**= $113,286.16**

The total estimated initial cost for Greene County for **IP 20-088** proposing to amend Article VIII, version 1, will cost Greene County **$113,286.16** with a minimum ongoing cost of **$49,379.20** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Andrew Bergerson and Jared Wight provided the following information:

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $745,000 in one-time costs, $49,000 in annual costs, and $181,000 in costs per election.

JOHN R. ASHCROFT
SECRETARY OF STATE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RECEIVED
JUN 17 2019
STATE AUDITORS OFFICE

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 16 (2020-087)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

INITIATIVE PETITION

RECEIVED
2019 JUN 14 PM 3:20

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 3rd day of November, 2020, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

[OFFICIAL BALLOT TITLE]

CIRCULATOR'S AFFIDAVIT

STATE OF MISSOURI, COUNTY OF _____ I,_____ being first duly sworn, say (print names of signers)

NAME (Signature)	DATE Signed	REGISTERED VOTING ADDRESS (Number)(Street), (City, Town Or Village)	ZIP CODE	CONG. DIST.	FIRST NAME (Printed or Typed)	MIDDLE NAME (Printed or Typed)	LAST NAME (Printed or Typed)

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 15 (2020-086)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

Section 28. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 13 (2020-084)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

Section 28. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-083)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 17, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the state of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who,

based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend or discontinue current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021
Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021
Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)

For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting four new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **20.9%** of the population is under **18** years old, which accounts for **60,957** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
AP = Annual Pay

291,9235 R's – 60,957 R's under **18 yrs** = **230,966 R's 18 yrs** or older

230,966 R's 18 yrs or older – **190,000 RV's = 40,966 PV's**

40,966 PV's x .50 MC = $20,483

40,966 PV x 1.06 CPC2P = $43,423.96

If they have approximately **40,966 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$20,483 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$43,423.96** to the cost when it is multiplied by the estimated **40,966** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost will

be **$24,689.60** per hire for their annual pay. The total annual cost for two fulltime hires will be **$49,379.20.**

40,966 PV's x .50 MC	**= $20,483**
40,966 PV's x 1.06 CPC2P	**= $43,423.96**
2 FTH x $24,689.60 AP	**= $49,379.20**
Total:	**= $113,286.16**

The total estimated initial cost for Greene County for **IP 20-083** proposing to amend Article VIII, version 12, will cost Greene County **$113,286.16** with a minimum ongoing cost of **$49,379.20** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $37,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend, and at a rate of $5,000 per every 8 hours, this would cost $7,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Andrew Bergerson and Jared Wight provided the following information:

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $745,000 in one-time costs, $49,000 in annual costs, and $84,000 in costs per election.

Jefferson City, MO 65101

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 11 (2020-082)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

INITIATIVE PETITION

RECEIVED 2019 JUN 14 PM 3:15

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 3rd day of November, 2020, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

[OFFICIAL BALLOT TITLE]

CIRCULATOR'S AFFIDAVIT

STATE OF MISSOURI, COUNTY OF _____ I,_____ being first duly sworn, say (print names of signers)

Address of Notary _____

(Seal)

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-082)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 17, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4)are also affected by this proposal.
OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)
The proposed language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the state of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States

citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend or discontinue current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021
Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021
Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)

For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting four new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **20.9%** of the population is under **18** years old, which accounts for **60,957** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
AP = Annual Pay

291,9235 R's – 60,957 R's under **18 yrs** = **230,966 R's 18 yrs** or older

230,966 R's 18 yrs or older – **190,000 RV's = 40,966 PV's**

40,966 PV's x .50 MC = $20,483

40,966 PV x 1.06 CPC2P = $43,423.96

If they have approximately **40,966 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$20,483 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$43,423.96** to the cost when it is multiplied by the estimated **40,966** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost will

be **$24,689.60** per hire for their annual pay. The total annual cost for two fulltime hires will be **$49,379.20.**

40,966 PV's x .50 MC	**= $20,483**
40,966 PV's x 1.06 CPC2P	**= $43,423.96**
2 FTH x $24,689.60 AP	**= $49,379.20**
Total:	**= $113,286.16**

The total estimated initial cost for Greene County for **IP 20-082** proposing to amend Article VIII, version 11, will cost Greene County **$113,286.16** with a minimum ongoing cost of **$49,379.20** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $37,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend, and at a rate of $5,000 per every 8 hours, this would cost $7,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Andrew Bergerson and Jared Wight provided the following information:

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $745,000 in one-time costs, $49,000 in annual costs, and $84,000 in costs per election.

Jefferson City, MO 65101

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 10 (2020-081)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

INITIATIVE PETITION

RECEIVED
2019 JUN 14 PM 3:14

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 3rd day of November, 2020, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

[OFFICIAL BALLOT TITLE]

CIRCULATOR'S AFFIDAVIT

STATE OF MISSOURI, COUNTY OF _____ I,_____ being first duly sworn, say (print names of signers)

Address of Notary _____

(Seal)

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-081)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 17, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact. Based on their interpretation of this legislation, their department would be required to provide a list of citizens who are eligible to vote to the Secretary of State upon request. Their response of "no impact" is based on this assumption. Should their interpretation be incorrect and the legislation would require their department to actively track, manage, or report information, a fiscal impact to their department is possible.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the state of Missouri. Such

list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend or discontinue current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021
Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021
Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)

For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting four new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **20.9%** of the population is under **18** years old, which accounts for **60,957** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
AP = Annual Pay

291,9235 R's – 60,957 R's under **18 yrs** = **230,966 R's 18 yrs** or older

230,966 R's 18 yrs or older – **190,000 RV's = 40,966 PV's**

40,966 PV's x .50 MC = $20,483

40,966 PV x 1.06 CPC2P = $43,423.96

If they have approximately **40,966 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$20,483 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$43,423.96** to the cost when it is multiplied by the estimated **40,966** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost will

be **$24,689.60** per hire for their annual pay. The total annual cost for two fulltime hires will be **$49,379.20.**

40,966 PV's x .50 MC	**= $20,483**
40,966 PV's x 1.06 CPC2P	**= $43,423.96**
2 FTH x $24,689.60 AP	**= $49,379.20**
Total:	**= $113,286.16**

The total estimated initial cost for Greene County for **IP 20-081** proposing to amend Article VIII, version 10, will cost Greene County **$113,286.16** with a minimum ongoing cost of **$49,379.20** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $37,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend, and at a rate of $5,000 per every 8 hours, this would cost $7,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Andrew Bergerson and Jared Wight provided the following information:

5601 Locust Street & 5711 Holmes Street

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $745,000 in one-time costs, $49,000 in annual costs, and $84,000 in costs per election.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 9 (2020-080)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-080)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 17, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact. Based on their interpretation of this legislation, their department would be required to provide a list of citizens who are eligible to vote to the Secretary of State upon request. Their response of "no impact" is based on this assumption. Should their interpretation be incorrect and the legislation would require their department to actively track, manage, or report information, a fiscal impact to their department is possible.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the state of Missouri. Such

list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend or discontinue current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021
Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021
Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)

For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting four new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **20.9%** of the population is under **18** years old, which accounts for **60,957** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
AP = Annual Pay

291,9235 R's – 60,957 R's under **18 yrs** = **230,966 R's 18 yrs** or older

230,966 R's 18 yrs or older – **190,000 RV's = 40,966 PV's**

40,966 PV's x .50 MC = $20,483

40,966 PV x 1.06 CPC2P = $43,423.96

If they have approximately **40,966 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$20,483 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$43,423.96** to the cost when it is multiplied by the estimated **40,966** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost will

be **$24,689.60** per hire for their annual pay. The total annual cost for two fulltime hires will be **$49,379.20.**

40,966 PV's x .50 MC	**= $20,483**
40,966 PV's x 1.06 CPC2P	**= $43,423.96**
2 FTH x $24,689.60 AP	**= $49,379.20**
Total:	**= $113,286.16**

The total estimated initial cost for Greene County for **IP 20-080** proposing to amend Article VIII, version 9, will cost Greene County **$113,286.16** with a minimum ongoing cost of **$49,379.20** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $37,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend, and at a rate of $5,000 per every 8 hours, this would cost $7,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $745,000 in one-time costs, $49,000 in annual costs, and $84,000 in costs per election.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 8 (2020-079)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-079)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 17, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact. Based on their interpretation of this legislation, their department would be required to provide a list of citizens who are eligible to vote to the Secretary of State upon request. Their response of "no impact" is based on this assumption. Should their interpretation be incorrect and the legislation would require their department to actively track, manage, or report information, a fiscal impact to their department is possible.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the state of Missouri. Such

list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend or discontinue current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021
Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021
Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)

For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting four new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to

an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **20.9%** of the population is under **18** years old, which accounts for **60,957** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
AP = Annual Pay

291,9235 R's – 60,957 R's under **18 yrs** = **230,966 R's 18 yrs** or older

230,966 R's 18 yrs or older – **190,000 RV's = 40,966 PV's**

40,966 PV's x .50 MC = $20,483

40,966 PV x 1.06 CPC2P = $43,423.96

If they have approximately **40,966 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$20,483 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$43,423.96** to the cost when it is multiplied by the estimated **40,966** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost will be **$24,689.60** per hire for their annual pay. The total annual cost for two fulltime hires will be **$49,379.20.**

40,966 PV's x .50 MC	**= $20,483**
40,966 PV's x 1.06 CPC2P	**= $43,423.96**
2 FTH x $24,689.60 AP	**= $49,379.20**
Total:	**= $113,286.16**

The total estimated initial cost for Greene County for **IP 20-079** proposing to amend Article VIII, version 8, will cost Greene County **$113,286.16** with a minimum ongoing cost of **$49,379.20** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $745,000 in one-time costs, $49,000 in annual costs, and $181,000 in costs per election.

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 7 (2020-078)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-078)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 17, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact. Based on their interpretation of this legislation, their department would be required to provide a list of citizens who are eligible to vote to the Secretary of State upon request. Their response of "no impact" is based on this assumption. Should their interpretation be incorrect and the legislation would require their department to actively track, manage, or report information, a fiscal impact to their department is possible.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the state of Missouri. Such

list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend or discontinue current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021
Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021
Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)

For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting four new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to

an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **20.9%** of the population is under **18** years old, which accounts for **60,957** residents. They have on average **190,000** registered voters, of which about **30,000 (16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
AP = Annual Pay

291,9235 R's – 60,957 R's under **18 yrs** = **230,966 R's 18 yrs** or older

230,966 R's 18 yrs or older – **190,000 RV's = 40,966 PV's**

40,966 PV's x .50 MC = $20,483

40,966 PV x 1.06 CPC2P = $43,423.96

If they have approximately **40,966 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$20,483 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$43,423.96** to the cost when it is multiplied by the estimated **40,966** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost will be **$24,689.60** per hire for their annual pay. The total annual cost for two fulltime hires will be **$49,379.20.**

40,966 PV's x .50 MC	**= $20,483**
40,966 PV's x 1.06 CPC2P	**= $43,423.96**
2 FTH x $24,689.60 AP	**= $49,379.20**
Total:	**= $113,286.16**

The total estimated initial cost for Greene County for **IP 20-078** proposing to amend Article VIII, version 7, will cost Greene County **$113,286.16** with a minimum ongoing cost of **$49,379.20** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $745,000 in one-time costs, $49,000 in annual costs, and $181,000 in costs per election.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 6 (2020-077)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

INITIATIVE PETITION

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 3rd day of November, 2020, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

[OFFICIAL BALLOT TITLE]

CIRCULATOR'S AFFIDAVIT

STATE OF MISSOURI, COUNTY OF _____ I,_____ being first duly sworn, say (print names of signers)

NAME (Signature)	DATE Signed	REGISTERED VOTING ADDRESS (Number)(Street), (City, Town Or Village)	ZIP CODE	CONG. DIST.	FIRST NAME (Printed or Typed)	MIDDLE NAME (Printed or Typed)	LAST NAME (Printed or Typed)

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article; or

(2) Such individuals may choose to register pursuant to any other registration procedure available under general election law.

2. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

Section 28. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-077)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 17, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact. Based on their interpretation of this legislation, their department would be required to provide a list of citizens who are eligible to vote to the Secretary of State upon request. Their response of "no impact" is based on this assumption. Should their interpretation be incorrect and the legislation would require their department to actively track, manage, or report information, a fiscal impact to their department is possible.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed constitutional amendment petition language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote

in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- Coordinate with OA-ITSD to develop a data pull process for defining records for submission to Secretary of State.
- Coordinate with OA-ITSD to develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.
- Implement MEDL changes to the signature collection and certification processes for all transactions to include updates related to automatic voter registration.
- Implement modifications to license verification statement or generated money receipt or temporary driving privilege document to include additional information related to automatic voter registration.

Section 27

An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article.

The Department would be required to:

- Develop file generation edits to ensure driver license, nondriver license, and permit applicants age 16 and over are included in the new weekly file sent to the Secretary of State.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00
		Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Section 27
The Department assumes this minimum age applies to the file transfer to Secretary of State and will not change current voter registration application provisions which limit completion of an application to persons age 17 ½ years of age or older with a certification that they will be 18 years of age on or before election date.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact,

as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting five new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

The proposal provides that an individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **18.7%** of the population is under **16** years old, which accounts for **54,515** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
PTH = Part-time Hire
AP = Annual Pay

291,923 R's – 50,415 R's under **16 yrs** = **241,508 R's 16 yrs** or older

241,508 R's 16 yrs or older – **190,000 RV's = 51,508 PV's**

51,508 PV's x .50 MC = $20,000 + fees **= $25,754**

51,508 PV x 1.06 CPC2P = $54,598.48

If they have approximately **51,508 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$25,754 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$54,598.48** to the cost when it is multiplied by the estimated **51,508** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** and **1 PTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost per **FTH** will be **$24,689.60** per hire for their annual pay and **$12,026.90** annual pay for the **PTH**. The total annual cost for two fulltime hires will be **$49,379.20.**

51,508 PV's x .50 MC	**= $25,754**
51,508 PV x 1.06 CPC2	**= $54,598.48**
2 FTH x $24,689.60 AP	= **$49,379.20**
1 PTH x $12,026.90 AP	**= $12,026.90**
Total:	= **$141,758.58**

The total estimated initial cost for Greene County for **IP 20-077** proposing to amend Article VIII, version 6, will cost Greene County **$141,758.58** with a minimum ongoing cost of **$61,406.10** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic

registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Andrew Bergerson and Jared Wight provided the following information:

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $756,000 in one-time costs, $61,000 in annual costs, and $181,000 in costs per election.

Jefferson City, MO 65101

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 5 (2020-076)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

INITIATIVE PETITION

RECEIVED
2019 JUN 14 PM 2:09

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 3rd day of November, 2020, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

[OFFICIAL BALLOT TITLE]

CIRCULATOR'S AFFIDAVIT

STATE OF MISSOURI, COUNTY OF _____ I,_____ being first duly sworn, say (print names of signers)

Address of Notary _____

(Seal)

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article; or

(2) Such individuals may choose to register pursuant to any other registration procedure available under general election law.

2. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

Section 28. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-076)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 17, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact. Based on their interpretation of this legislation, their department would be required to provide a list of citizens who are eligible to vote to the Secretary of State upon request. Their response of "no impact" is based on this assumption. Should their interpretation be incorrect and the legislation would require their department to actively track, manage, or report information, a fiscal impact to their department is possible.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed constitutional amendment petition language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote

in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- Coordinate with OA-ITSD to develop a data pull process for defining records for submission to Secretary of State.
- Coordinate with OA-ITSD to develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.
- Implement MEDL changes to the signature collection and certification processes for all transactions to include updates related to automatic voter registration.
- Implement modifications to license verification statement or generated money receipt or temporary driving privilege document to include additional information related to automatic voter registration.

Section 27

An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article.

The Department would be required to:

- Develop file generation edits to ensure driver license, nondriver license, and permit applicants age 16 and over are included in the new weekly file sent to the Secretary of State.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00
		Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Section 27
The Department assumes this minimum age applies to the file transfer to Secretary of State and will not change current voter registration application provisions which limit completion of an application to persons age 17 ½ years of age or older with a certification that they will be 18 years of age on or before election date.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact,

as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting five new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

The proposal provides that an individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **18.7%** of the population is under **16** years old, which accounts for **54,515** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
PTH = Part-time Hire
AP = Annual Pay

291,923 R's – 50,415 R's under **16 yrs** = **241,508 R's 16 yrs** or older

241,508 R's 16 yrs or older – **190,000 RV's = 51,508 PV's**

51,508 PV's x .50 MC = $20,000 + fees **= $25,754**

51,508 PV x 1.06 CPC2P = $54,598.48

If they have approximately **51,508 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$25,754 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$54,598.48** to the cost when it is multiplied by the estimated **51,508** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** and **1 PTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost per **FTH** will be **$24,689.60** per hire for their annual pay and **$12,026.90** annual pay for the **PTH**. The total annual cost for two fulltime hires will be **$49,379.20.**

51,508 PV's x .50 MC	**= $25,754**
51,508 PV x 1.06 CPC2	**= $54,598.48**
2 FTH x $24,689.60 AP	= **$49,379.20**
1 PTH x $12,026.90 AP	**= $12,026.90**
Total:	= **$141,758.58**

The total estimated initial cost for Greene County for **IP 20-076** proposing to amend Article VIII, version 5, will cost Greene County **$141,758.58** with a minimum ongoing cost of **$61,406.10** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic

registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Andrew Bergerson and Jared Wight provided the following information:

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $756,000 in one-time costs, $61,000 in annual costs, and $181,000 in costs per election.

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 4 (2020-075)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

INITIATIVE PETITION

RECEIVED
2019 JUN 14 PM 3:08

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri for their approval or rejection, at the general election to be held on the 3rd day of November, 2020, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article; or

(2) Such individuals may choose to register pursuant to any other registration procedure available under general election law.

2. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

Section 28. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-075)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 17, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed constitutional amendment petition language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who,

based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- Coordinate with OA-ITSD to develop a data pull process for defining records for submission to Secretary of State.
- Coordinate with OA-ITSD to develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.
- Implement MEDL changes to the signature collection and certification processes for all transactions to include updates related to automatic voter registration.
- Implement modifications to license verification statement or generated money receipt or temporary driving privilege document to include additional information related to automatic voter registration.

Section 27

An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article.

The Department would be required to:

- Develop file generation edits to ensure driver license, nondriver license, and permit applicants age 16 and over are included in the new weekly file sent to the Secretary of State.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00
		Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Section 27
The Department assumes this minimum age applies to the file transfer to Secretary of State and will not change current voter registration application provisions which limit completion of an application to persons age 17 ½ years of age or older with a certification that they will be 18 years of age on or before election date.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact,

as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting five new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

The proposal provides that an individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **18.7%** of the population is under **16** years old, which accounts for **54,515** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
PTH = Part-time Hire
AP = Annual Pay

291,923 R's – **50,415 R's** under **16 yrs** = **241,508 R's 16 yrs** or older

241,508 R's 16 yrs or older – **190,000 RV's = 51,508 PV's**

51,508 PV's x .50 MC = $20,000 + fees **= $25,754**

51,508 PV x 1.06 CPC2P = $54,598.48

If they have approximately **51,508 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$25,754 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$54,598.48** to the cost when it is multiplied by the estimated **51,508** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** and **1 PTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost per **FTH** will be **$24,689.60** per hire for their annual pay and **$12,026.90** annual pay for the **PTH**. The total annual cost for two fulltime hires will be **$49,379.20.**

51,508 PV's x .50 MC	**= $25,754**
51,508 PV x 1.06 CPC2	**= $54,598.48**
2 FTH x $24,689.60 AP	= **$49,379.20**
1 PTH x $12,026.90 AP	**= $12,026.90**
Total:	= **$141,758.58**

The total estimated initial cost for Greene County for **IP 20-075** proposing to amend Article VIII, version 4, will cost Greene County **$141,758.58** with a minimum ongoing cost of **$61,406.10** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic

registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $756,000 in one-time costs, $61,000 in annual costs, and $181,000 in costs per election.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 3 (2020-074)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article; or

(2) Such individuals may choose to register pursuant to any other registration procedure available under general election law.

2. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

Section 28. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-074)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 17, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed constitutional amendment petition language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who,

based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- Coordinate with OA-ITSD to develop a data pull process for defining records for submission to Secretary of State.
- Coordinate with OA-ITSD to develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.
- Implement MEDL changes to the signature collection and certification processes for all transactions to include updates related to automatic voter registration.
- Implement modifications to license verification statement or generated money receipt or temporary driving privilege document to include additional information related to automatic voter registration.

Section 27

An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article.

The Department would be required to:

- Develop file generation edits to ensure driver license, nondriver license, and permit applicants age 16 and over are included in the new weekly file sent to the Secretary of State.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00
		Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Section 27
The Department assumes this minimum age applies to the file transfer to Secretary of State and will not change current voter registration application provisions which limit completion of an application to persons age 17 ½ years of age or older with a certification that they will be 18 years of age on or before election date.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact,

as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting five new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

The proposal provides that an individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **18.7%** of the population is under **16** years old, which accounts for **54,515** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
PTH = Part-time Hire
AP = Annual Pay

291,923 R's – 50,415 R's under **16 yrs** = **241,508 R's 16 yrs** or older

241,508 R's 16 yrs or older – **190,000 RV's = 51,508 PV's**

51,508 PV's x .50 MC = $20,000 + fees **= $25,754**

51,508 PV x 1.06 CPC2P = $54,598.48

If they have approximately **51,508 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$25,754 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$54,598.48** to the cost when it is multiplied by the estimated **51,508** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** and **1 PTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost per **FTH** will be **$24,689.60** per hire for their annual pay and **$12,026.90** annual pay for the **PTH**. The total annual cost for two fulltime hires will be **$49,379.20.**

51,508 PV's x .50 MC	**= $25,754**
51,508 PV x 1.06 CPC2	**= $54,598.48**
2 FTH x $24,689.60 AP	= **$49,379.20**
1 PTH x $12,026.90 AP	**= $12,026.90**
Total:	= **$141,758.58**

The total estimated initial cost for Greene County for **IP 20-074** proposing to amend Article VIII, version 3, will cost Greene County **$141,758.58** with a minimum ongoing cost of **$61,406.10** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic

registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $756,000 in one-time costs, $61,000 in annual costs, and $181,000 in costs per election.

RECEIVED
JUN 17 2019
STATE AUDITORS OFFICE

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 2 (2020-073)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

INITIATIVE PETITION

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 3rd day of November, 2020, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

[OFFICIAL BALLOT TITLE]

CIRCULATOR'S AFFIDAVIT

STATE OF MISSOURI, COUNTY OF _____ I,_____ being first duly sworn, say (print names of signers)

NAME (Signature)	DATE Signed	REGISTERED VOTING ADDRESS (Number)(Street), (City, Town Or Village)	ZIP CODE	CONG. DIST.	FIRST NAME (Printed or Typed)	MIDDLE NAME (Printed or Typed)	LAST NAME (Printed or Typed)

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article; or

(2) Such individuals may choose to register pursuant to any other registration procedure available under general election law.

2. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

Section 28. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-073)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 17, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact. Based on their interpretation of this legislation, their department would be required to provide a list of citizens who are eligible to vote to the Secretary of State upon request. Their response of "no impact" is based on this assumption. Should their interpretation be incorrect and the legislation would require their department to actively track, manage, or report information, a fiscal impact to their department is possible.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed constitutional amendment petition language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote

in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- Coordinate with OA-ITSD to develop a data pull process for defining records for submission to Secretary of State.
- Coordinate with OA-ITSD to develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.
- Implement MEDL changes to the signature collection and certification processes for all transactions to include updates related to automatic voter registration.
- Implement modifications to license verification statement or generated money receipt or temporary driving privilege document to include additional information related to automatic voter registration.

Section 27

An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article.

The Department would be required to:

- Develop file generation edits to ensure driver license, nondriver license, and permit applicants age 16 and over are included in the new weekly file sent to the Secretary of State.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Section 27
The Department assumes this minimum age applies to the file transfer to Secretary of State and will not change current voter registration application provisions which limit completion of an application to persons age 17 ½ years of age or older with a certification that they will be 18 years of age on or before election date.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact,

as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting five new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

The proposal provides that an individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **18.7%** of the population is under **16** years old, which accounts for **54,515** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
PTH = Part-time Hire
AP = Annual Pay

291,923 R's – **50,415 R's** under **16 yrs** = **241,508 R's 16 yrs** or older

241,508 R's 16 yrs or older – **190,000 RV's = 51,508 PV's**

51,508 PV's x .50 MC = $20,000 + fees **= $25,754**

51,508 PV x 1.06 CPC2P = $54,598.48

If they have approximately **51,508 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$25,754 MC**. How will that cost be delineated in subsequent mailings is very hard to

predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$54,598.48** to the cost when it is multiplied by the estimated **51,508** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** and **1 PTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost per **FTH** will be **$24,689.60** per hire for their annual pay and **$12,026.90** annual pay for the **PTH**. The total annual cost for two fulltime hires will be **$49,379.20.**

51,508 PV's x .50 MC	**= $25,754**
51,508 PV x 1.06 CPC2	**= $54,598.48**
2 FTH x $24,689.60 AP	= **$49,379.20**
1 PTH x $12,026.90 AP	**= $12,026.90**
Total:	= **$141,758.58**

The total estimated initial cost for Greene County for **IP 20-073** proposing to amend Article VIII, version 2, will cost Greene County **$141,758.58** with a minimum ongoing cost of **$61,406.10** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $37,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend, and at a rate of $5,000 per every 8 hours, this would cost $7,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $756,000 in one-time costs, $61,000 in annual costs, and $84,000 in costs per election.

Jefferson City, MO 65101

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, Version 1 (2020-072)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting five new sections to be known as Article VIII, Sections 24, 25, 26, 27, and 28 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive a mail-in absentee ballot.

(6) Mail-in absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7)Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. Notwithstanding any other provision of law to the contrary, the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. Provisional ballots, regardless of type, shall be counted as provided herein.

(1) If the provisional ballot cast by the voter contains the same candidates and measures on which the voter would have been entitled to vote in his or her assigned precinct, the ballot shall be counted.

(2) If the provisional ballot cast by the voter contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

Section 27. An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article; or

(2) Such individuals may choose to register pursuant to any other registration procedure available under general election law.

2. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

Section 28. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-072)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received June 17, 2019)

Date

July 8, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated this initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact. Based on their interpretation of this legislation, their department would be required to provide a list of citizens who are eligible to vote to the Secretary of State upon request. Their response of "no impact" is based on this assumption. Should their interpretation be incorrect and the legislation would require their department to actively track, manage, or report information, a fiscal impact to their department is possible.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $34,072 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

OA-ITSD cost estimate equals 298.08 hours x $75 = $22,356

Section 5 (2)

The proposed constitutional amendment petition language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote

in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- Coordinate with OA-ITSD to develop a data pull process for defining records for submission to Secretary of State.
- Coordinate with OA-ITSD to develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.
- Implement MEDL changes to the signature collection and certification processes for all transactions to include updates related to automatic voter registration.
- Implement modifications to license verification statement or generated money receipt or temporary driving privilege document to include additional information related to automatic voter registration.

Section 27

An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article.

The Department would be required to:

- Develop file generation edits to ensure driver license, nondriver license, and permit applicants age 16 and over are included in the new weekly file sent to the Secretary of State.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager –	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD Impact

2. Does this proposal duplicate any other program?						
No						
8a. Provide narrative on how this bill would affect anything IT related. (program expansion, new program, consolidation, etc.)						
This bill impacts the Online Address Change website to collect change of addresses by citizens.						
8b. Explanation of assumptions and methodology used in arriving at the impact; Please reference and/or attach any/all supporting documentation to email.						
Language in the IP is already being implemented in a rewrite of the online address change website process.						

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Section 27
The Department assumes this minimum age applies to the file transfer to Secretary of State and will not change current voter registration application provisions which limit completion of an application to persons age 17 ½ years of age or older with a certification that they will be 18 years of age on or before election date.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they assume no fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact,

as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting five new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive mail-in absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal provides that the provisional ballot, regardless of type, of a voter who is otherwise entitled to vote shall be accepted as long as the precinct at which the voter cast a ballot is within the jurisdiction of the same local election authority as the precinct to which the voter was assigned by an elections official. If the provisional ballot contains candidates or measures on which the voter would not have been entitled to vote in his or her assigned precinct, the elections official shall count only the votes for the candidates and measures on which the voter was entitled to vote in his or her assigned precinct.

The proposal provides that an individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated:

The following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **18.7%** of the population is under **16** years old, which accounts for **54,515** residents. They have on average **190,000** registered voters, of which about **30,000 (16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
PTH = Part-time Hire
AP = Annual Pay

291,923 R's – **50,415 R's** under **16 yrs** = **241,508 R's 16 yrs** or older

241,508 R's 16 yrs or older – **190,000 RV's** = **51,508 PV's**

51,508 PV's x .50 MC = $20,000 + fees = **$25,754**

51,508 PV x 1.06 CPC2P = $54,598.48

If they have approximately **51,508 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$25,754 MC**. How will that cost be delineated in subsequent mailings is very hard to

predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$54,598.48** to the cost when it is multiplied by the estimated **51,508** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** and **1 PTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost per **FTH** will be **$24,689.60** per hire for their annual pay and **$12,026.90** annual pay for the PTH. The total annual cost for two fulltime hires will be **$49,379.20**.

51,508 PV's x .50 MC	**= $25,754**
51,508 PV x 1.06 CPC2	**= $54,598.48**
2 FTH x $24,689.60 AP	**= $49,379.20**
1 PTH x $12,026.90 AP	**= $12,026.90**
Total:	**= $141,758.58**

The total estimated initial cost for Greene County for **IP 20-072** proposing to amend Article VIII, version 1, will cost Greene County **$141,758.58** with a minimum ongoing cost of **$61,406.10** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from the **City of Kansas City** indicated this has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact on their school from this initiative petition other than how the cost of it may be reflected in the state's ability to fully fund public schools state-wide.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $37,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend, and at a rate of $5,000 per every 8 hours, this would cost $7,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Platte County Election Board** indicated they anticipate that this change would increase election costs by $3,000 per election to cover the additional absentee voting time.

Officials from the **State Auditor's office** indicated this proposal should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Andrew Bergerson and Jared Wight provided the following information:

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $756,000 in one-time costs, $61,000 in annual costs, and $84,000 in costs per election.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article I (2020-071)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on June 14, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends Article XIV Section 1 of the Missouri Constitution by deleting all matters within the enclosed brackets and adding all of the underlined matters as required pursuant to Section 116.050 RSMo.

Section 1. [Right to Access medical marijuana.] Missouri Cannabis Restoration and Protection [– 1. Purposes.]

1. Clarification as a substance.

[This section is intended to permit state-licensed physicians to recommend marijuana for medical purposes to patients with serious illnesses and medical conditions. The section allows patients with qualifying medical conditions the right to discuss freely with their physicians the possible benefits of medical marijuana use, the right of their physicians to provide professional advice concerning the same, and the right to use medical marijuana for treatment under the supervision of a physician.
This section is intended to make only those changes to Missouri laws that are necessary to protect patients, their primary caregivers, and their physicians from civil and criminal penalties, and to allow for the limited legal production, distribution, sale and purchase of marijuana for medical use. This section is not intended to change current civil and criminal laws governing the use of marijuana for nonmedical purposes. The section does not allow for the public use of marijuana and driving under the influence of marijuana.]

Cannabis shall immediately be removed from the Missouri Revised Statutes list of controlled substances and shall no longer be listed among Missouri's drug schedules. Cannabis shall no longer be considered a controlled substance or a drug, hence forth by Missouri law, by the passage of this initiative.

[2. Definitions.] **2. Definitions.**

[(1) "Administer" means the direct application of marijuana to a qualifying patient by way of any of the following methods:

(a) Ingestion of capsules, teas, oils, and other marijuana-infused products;

(b) Vaporization or smoking of dried flowers, buds, plant material, extracts, or oils;

(c) Application of ointments or balms;

(d) Transdermal patches and suppositories;

(e) Consuming marijuana-infused food products; or

(f) Any other method recommended by a qualifying patient's physician.

(2) "Department" means the Department of Health and Senior services, or its successor agency.

(3) "Entity" means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(4) "Flowering plant" means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(5) "Marijuana" or "marihuana" means *Cannabis indica, Cannabis sativa, and Cannabis ruderalis,* hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana, as well as resin extracted from the plant and marijuana-infused products. "marijuana" or "Marihuana" do not include industrial hemp containing a crop-wide average tetrahydrocannabinol concentration that does not exceed three-tenths of one percent on a dry weight basis, or commodities or products manufactured from industrial hemp.

(6) "Marijuana-infused products" means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(7) "Medical marijuana cultivation facility" means a facility licensed by the department, to acquire, cultivate, process, store, transport, and sell marijuana to a medical marijuana dispensary facility, medical marijuana testing facility, or to a medical marijuana-infused products manufacturing facility.

(8) "Medical marijuana dispensary facility" means a facility licensed by the department, to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and drug paraphernalia used to administer marijuana as provided for in this section to a qualifying patient, a primary caregiver, another medical marijuana dispensary facility, a medical marijuana testing facility, or a medical marijuana-infused products manufacturing facility.

(9) "Medical marijuana-infused products manufacturing facility" means a facility licensed by the department, to acquire, store, manufacture, transport, and sell marijuana-infused products to a medical marijuana dispensary facility, a medical marijuana testing facility, or to another medical marijuana-infused products manufacturing facility.

(10) "Medical marijuana testing facility" means a facility certified by the department, to acquire, test, certify, and transport marijuana.

(11) "Medical use" means the production, possession, delivery, distribution, transportation, or administration of marijuana or a marijuana-infused product, or drug paraphernalia used to administer marijuana or a marijuana-infused product, for the benefit of a qualifying patient to mitigate the symptoms or effects of the patient's qualifying medical condition.

(12) "Physician" means an individual who is licensed and in good standing to practice medicine or osteopathy under Missouri law.

(13) "Physician certification" means a document, whether handwritten, electronic or in another commonly used format, signed by a physician and stating that, in the physician's professional opinion, the patient suffers from a qualifying medical condition.

(14) "Primary caregiver" means an individual twenty-one years of age or older who has significant responsibility for managing the well-being of a qualifying patient and who is designated as such on the primary caregiver's application for an identification card under this section or in other written notification to the department.

(15) "Qualifying medical condition" means the condition of, symptoms related to, or side-effects from the treatment of:

(a) Cancer;

(b) Epilepsy;

(c) Glaucoma;

(d) Intractable migraines unresponsive to other treatment;

(e) A chronic medical condition that causes severe, persistent pain or persistent muscle spasms, including but not limited to those associated with multiple sclerosis, seizures, Parkinson's disease, and Tourette's syndrome;

(f) Debilitating psychiatric disorders, including, but not limited to, post-traumatic stress disorder, if diagnosed by a state licensed psychiatrist;

(g) Human immunodeficiency virus or acquired immune deficiency syndrome;

(h) A chronic medical condition that is normally treated with a prescription medication that could lead to physical or psychological dependence, when a physician determines that medical use of marijuana could be effective in treating that condition and would serve as a safer alternative to the prescription medication;

(i) Any terminal illness; or

(j) In the professional judgment of a physician, any other chronic, debilitating or other medical condition, including, but not limited to, hepatitis C, amyotrophic lateral sclerosis, inflammatory bowel disease, Crohn's disease, Huntington's disease, autism, neuropathies, sickle cell anemia, agitation of Alzheimer's disease, cachexia, and wasting syndrome.

(16) "Qualifying patient" means a Missouri resident diagnosed with at least one qualifying medical condition.]

(a) "Controlled Substance List", or "CSL" refers to Missouri's list of controlled substances as pertains to Missouri Statutes.
(b) "Cannabis" and "Cannabis hemp" refer to the Cannabis, marihuana, marijuana, Cannabis sativa, Cannabis sativa L., Cannabis Americana, Cannabis Gigantea, Cannabis indica, Cannabis ruderalis, or any variety of Cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
(c) "Medical Cannabis" refers to Cannabis used to prevent or to treat a medical condition.
(d) "Personal use" refers to the personal use or consumption of Cannabis.
(e) "Cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing Cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing Cannabis into and/or onto the human body.
(f) "Establishment" refers to a Cannabis cultivation facility, a Cannabis testing facility, a Cannabis product manufacturing facility, or a retail store, Cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells Cannabis, Cannabis products and/or Cannabis accessories.

[3. Creating Patient Access to Medical Marijuana.] **3. Personal and Commercial.**

[(1) In carrying out the implementation of this section, the department shall have the authority to:

(a) Grant or refuse state licenses and certifications for the cultivation, manufacture, dispensing, sale, testing, tracking, and transportation of marijuana for medical use as provided by law; suspend, fine, restrict, or revoke such licenses and certifications upon a violation of this section or a rule promulgated pursuant to this section; and impose any administrative penalty authorized by this section or any rule promulgated pursuant to this section.

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana for medical use and for the enforcement of this section so long as patient access is not restricted unreasonably and such rules are reasonably necessary for patient safety or to restrict access to only licensees and qualifying patients.

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section;

(d) Require a seed-to-sale tracking system that tracks medical marijuana from either the seed or immature plant stage until the medical marijuana or medical marijuana-infused product is sold to a qualifying patient or primary caregiver to ensure that no medical marijuana grown by a medical marijuana cultivation facility or manufactured by a medical marijuana-infused products manufacturing facility is sold or otherwise transferred except by a medical marijuana dispensary facility. The department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees.

(e) Issue standards for the secure transportation of marijuana and marijuana-infused products. The department shall certify entities which demonstrate compliance with its transportation standards to transport marijuana and marijuana-infused products to a medical marijuana cultivation facility, a medical marijuana-infused products manufacturing facility, a medical marijuana dispensary facility, a medical marijuana testing facility, or another entity with a transportation certification. The department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport cannabis.

(f) The department may charge a fee not to exceed $5,000 for any certification issued pursuant to this section.

(g) Prepare and transmit annually a publicly available report accounting to the Governor for the efficient discharge of all responsibilities assigned to the department under this section;

(h) Establish a system to numerically score competing medical marijuana licensee and certificate applicants, only in cases where more applicants apply than the minimum number of licenses or certificates as calculated by this section, which scoring shall be limited to an analysis of the following:

(i) the character, veracity, background, qualifications, and relevant experience of principal officers or managers;

(ii) the business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, plans to ensure safety and security of qualifying patients and the community, procedures to be used to prevent diversion, and any plan for making marijuana available to low-income qualifying patients;

(iii) site security;

(iv) experience in a legal cannabis market;

(v) in the case of medical marijuana testing facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and/or potency and health care industry experience;

(vi) the potential for positive economic impact in the site community;

(vii) in the case of medical marijuana cultivation facilities, capacity or experience with agriculture, horticulture, and health care;

(viii) in the case of medical marijuana dispensary facilities, capacity or experience with health care, the suitability of the proposed location, and its accessibility for patients;

(ix) in the case of medical marijuana-infused products manufacturing facilities, capacity or experience with food and beverage manufacturing; and

(x) maintaining competitiveness in the marijuana for medical use marketplace.

In ranking applicants and awarding licenses and certificates, the department may consult or contract with other public agencies with relevant expertise regarding these factors. The department shall lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana for medical use by qualifying patients.

(2) The department shall issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana for medical use by qualifying patients. In developing such rules or emergency rules, the department may consult with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the department may issue rules or emergency rules relating to the following subjects:

(a) Compliance with, enforcement of, or violation of any provision of this section or any rule issued pursuant to this section, including procedures and grounds for denying, suspending, fining, restricting, or revoking a state license or certification issued pursuant to this section;

(b) Specifications of duties of officers and employees of the department;

(c) Instructions or guidance for local authorities and law enforcement officers;

(d) Requirements for inspections, investigations, searches, seizures, and such additional enforcement activities as may become necessary from time to time;

(e) Creation of a range of administrative penalties for use by the department;

(f) Prohibition of misrepresentation and unfair practices;

(g) Control of informational and product displays on licensed premises provided that the rules may not prevent or unreasonably restrict appropriate signs on the property of the medical marijuana dispensary facility, product display and examination by the qualifying patient and/or primary caregiver, listings in business directories including phone books, listings in marijuana-related or medical publications, or the sponsorship of health or not for profit charity or advocacy events;

(h) Development of individual identification cards for owners, officers, managers, contractors, employees, and other support staff of entities licensed or certified pursuant to this section, including a fingerprint-based federal and state criminal record check in accordance with U.S. Public Law 92-544, or its successor provisions, as may be required by the department prior to issuing a card and procedures to ensure that cards for new applicants are issued within fourteen days. Applicants licensed pursuant to this section shall submit fingerprints to the Missouri state highway patrol for the purpose of conducting a state and federal fingerprint-based criminal background check. The Missouri state highway patrol, if necessary, shall forward the fingerprints to the Federal Bureau of Investigation (FBI) for the purpose of conducting a fingerprint-based criminal background check. Fingerprints shall be submitted pursuant to 43.543 and fees shall be paid pursuant to 43.530;

(i) Security requirements for any premises licensed or certified pursuant to this section, including, at a minimum, lighting, physical security, video, alarm requirements, and other minimum procedures for internal control as deemed necessary by the department to properly administer and enforce the provisions of this section, including reporting requirements for changes, alterations, or modifications to the premises;

(j) Regulation of the storage of, warehouses for, and transportation of marijuana for medical use;

(k) Sanitary requirements for, including, but not limited to, the preparation of medical marijuana-infused products;

(l) The specification of acceptable forms of picture identification that a medical marijuana dispensary facility may accept when verifying a sale;

(m) Labeling and packaging standards;

(n) Records to be kept by licensees and the required availability of the records;

(o) State licensing procedures, including procedures for renewals, reinstatements, initial licenses, and the payment of licensing fees;

(p) The reporting and transmittal of tax payments;

(q) Authorization for the department of revenue to have access to licensing information to ensure tax payment and the effective administration of this section; and

(r) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(3) The department shall issue rules or emergency rules for a medical marijuana and medical marijuana-infused products independent testing and certification program for medical marijuana licensees and requiring licensees to test medical marijuana using one or more impartial, independent laboratories to ensure, at a minimum, that products sold for human consumption do not contain contaminants that are injurious to health, to ensure correct labeling and measure potency. The department shall not require any medical marijuana or medical marijuana-infused products to be tested more than once prior to sale.

(4) The department shall issue rules or emergency rules to provide for the certification of and standards for medical marijuana testing facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The department shall certify, if possible, at least two entities as medical marijuana testing facilities. No medical marijuana testing facility shall be owned by an entity under substantially common control, ownership, or management as a medical marijuana cultivation facility, medical marijuana-infused product manufacturing facility, or medical marijuana dispensary facility.

(5) The department shall maintain the confidentiality of reports or other information obtained from an applicant or licensee containing any individualized data, information, or records related to the licensee or its operation, including sales information, financial records, tax returns, credit reports, cultivation information, testing results, and security information and plans, or revealing any patient information, or any other records that are exempt from public inspection pursuant to state or federal law. Such reports or other information may be used only for a purpose authorized by this section. Any information released related to patients may be used only for a purpose authorized by federal law and this section, including verifying that a person who presented a patient identification card to a state or local law enforcement official is lawfully in possession of such card.

(6) Within one hundred eighty days of December 6, 2018, the department shall make available to the public license application forms and application instructions for medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana dispensary facilities, and medical marijuana-infused products manufacturing facilities.

(7) Within one hundred eighty days of December 6, 2018, the department shall make available to the public application forms and application instructions for qualifying patient, qualifying patient cultivation, and primary caregiver identification cards. Within two hundred ten days of December 6, 2018, the department shall begin accepting applications for such identification cards.

(8) An entity may apply to the department for and obtain one or more licenses to grow marijuana as a medical marijuana cultivation facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the department to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of ten thousand dollars per license application or renewal for all applicants filing an application within three years of December 6, 2018, and shall charge each applicant a non-refundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana cultivation facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(9) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana dispensary facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018 and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten

thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than five medical marijuana dispensary facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(10) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana-infused products manufacturing facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018 and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana-infused products manufacturing facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(11) Any applicant for a license authorized by this section may pre-file their application fee with the department beginning 30 days after December 6, 2018.

(12) Except for good cause, a qualifying patient or his or her primary caregiver may obtain an identification card from the department to cultivate up to six flowering marijuana plants for the exclusive use of that qualifying patient. The card shall be valid for twelve months from its date of issuance and shall be renewable with the annual submittal of a new or updated physician's certification. The department shall charge an annual fee for the card of one hundred dollars, with such rate to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency.

(13) The department may set a limit on the amount of marijuana that may be purchased by or on behalf of a single qualifying patient in a thirty day period, provided that limit is not less than four ounces of dried, unprocessed marijuana, or its equivalent. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons why the qualifying patient needs a greater amount than the limit established by the department.

(14) The department may set a limit on the amount of marijuana that may be possessed by or on behalf of each qualifying patient, provided that limit is not less than a sixty day supply of dried, unprocessed marijuana, or its equivalent. A primary caregiver may possess a separate legal limit for each qualifying patient under their care and a separate legal limit for themselves if they are a qualifying patient.
qualifying patients cultivating marijuana for medical use may possess up to a ninety day supply, so long as the supply remains on property under their control. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons for additional amounts. Possession of between the legal limit and up to twice the legal limit shall subject the possessor to department sanctions, including an administrative penalty and loss of their patient identification card for up to a year. Purposefully possessing amounts in excess of twice the legal limit shall be punishable by imprisonment of up to one year and a fine of up to two thousand dollars.

(15) The department may restrict the aggregate number of licenses granted for medical marijuana cultivation facilities, provided, however, that the number may not be limited to fewer than one license per every one hundred thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(16) The department may restrict the aggregate number of licenses granted for marijuana-infused products manufacturing facilities, provided, however, that the number may not be limited to fewer than one license per every seventy thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(17) The department may restrict the aggregate number of licenses granted for medical marijuana dispensary facilities, provided, however, that the number may not be limited to fewer than twenty-four licenses in each United States Congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on December 6, 2018. Future changes to the boundaries of or the number of congressional districts shall have no impact.

(18) The department shall begin accepting license and certification applications for medical marijuana dispensary facilities, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than two hundred forty days after December 6, 2018. Applications for licenses and certifications under this section shall be approved or denied by the department no later than one hundred fifty days after their submission. If the department fails to carry out its non-discretionary duty to approve or deny an application within one hundred fifty days of submission, an applicant may immediately seek a court order compelling the department to approve or deny the application.

(19) Qualifying patients under this section shall obtain and annually renew an identification card or cards from the department. The department shall charge a fee of twenty-five dollars per year per card with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor or its successor agency. Upon receiving an application for a qualifying patient identification card or qualifying patient cultivation identification card, the department shall, within thirty days, either issue the card or provide a written explanation for its denial. If the department fails to deny and fails to issue a card to an eligible qualifying patient within thirty days, then their physician certification shall serve as their qualifying patient identification card or qualifying patient cultivation identification card for up to one year from the date of physician certification. All initial applications for or renewals of a qualifying patient identification card or qualifying patient cultivation identification card shall be accompanied by a physician certification that is less than thirty days old.

(20) Primary caregivers under this section shall obtain and annually renew an identification card from the department. The department shall charge a fee of twenty five dollars per year, with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. Upon receiving an application for a primary caregiver identification card the department shall, within thirty days, either issue the card or provide a written explanation for its denial.

(21) All marijuana for medical use sold in Missouri shall be cultivated in a licensed medical marijuana cultivation facility located in Missouri.

(22) All marijuana-infused products for medical use sold in the state of Missouri shall be manufactured in a medical marijuana-infused products manufacturing facility.

(23) The denial of a license, license renewal, or identification card by the department shall be appealable to the administrative hearing commission, or its successor entity. Following the exhaustion of administrative review, denial of a license, license renewal, or identification card by the department shall be subject to judicial review as provided by law.

(24) No elected official shall interfere directly or indirectly with the department's obligations and activities under this section.

(25) The department shall not have the authority to apply or enforce any rule or regulation that would impose an undue burden on any one or more licensees or certificate holders, any qualifying patients, or act to undermine the purposes of this section.]

The following acts are not unlawful and shall not be an offense under Missouri law:
(a) Possession and/or consumption of Cannabis for personal or medical use.
(b) Cultivating Cannabis for personal or medical use.
(c) Cultivation, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing Cannabis, Cannabis accessories, and Cannabis products for commercial purposes, provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivating, harvesting, processing, manufacturing, packaging, distribution, transferal, display or possession of any non-toxic food or food product.
(d) Providing Cannabis, Cannabis accessories, and Cannabis products for sale to consumers.
(e) Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs (a) through (d) of this subsection.
(f) No one shall be denied housing solely based on their use of Cannabis.
(g) No one shall be denied employment solely based on their use of Cannabis.
(h) The use and/or possession of Cannabis shall in no way impede one's legal right to possess a firearm.

[4. Taxation and Reporting.] **4. Medical.**

[(1) A tax is levied upon the retail sale of marijuana for medical use sold at medical marijuana dispensary facilities within the state. The tax shall be at a rate of four percent of the retail price. The tax shall be collected by each licensed medical marijuana dispensary facility and paid to the department of revenue. After retaining no more than five percent for its actual collection costs, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the Missouri veterans' health and care fund. Licensed entities making retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Missouri veterans' Health and Care Fund," which shall consist of taxes and fees collected under this section. The State Treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall stand appropriated without further legislative action as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section:

(b) Next, the remainder of such funds shall be transferred to the Missouri veterans commission for health and care services for military veterans, including the following purposes: operations, maintenance and capital improvements of the Missouri veterans homes, the Missouri service officer's Program, and other services for veterans approved by the commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness. The Missouri veterans commission shall contract with other public agencies for the delivery of services beyond its expertise.

(c) All monies from the taxes authorized under this subsection shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana for medical use, a record shall be kept by the seller which identifies, by secure and encrypted patient number issued by the seller to the qualifying patient involved in the sale, all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the Department of Revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from, and in addition to, any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana for medical use.

(6) The fees and taxes provided for in this Article XIV, Section 1 shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

(7) The unexpended balance existing in the fund shall be exempt from the provisions of section 33.080 relating to the transfer of unexpended balances to the general revenue fund.]

Medical Cannabis shall be available to patients without taxation who have a physician's recommendation for its use.
(a) All patients engaged in Cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means, whether or not under the care of a physician.
(b) Licensed physicians shall not be penalized for, nor restricted from recommending and/or providing Cannabis for medical purposes to any person under their care.
(c) Veterinarians shall not be penalized nor restricted from recommending and/or providing Cannabis for medical purposes for any creature under their care.
(d) Any individual who is a Cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri Cannabis patient.
(e) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of Cannabis.

[5. Additional Patient, Physician, Caregiver and Provider Protections.] **5. Zoning.**

[(1) Except as provided in this section, the possession of marijuana in quantities less than the limits of this section, or established by the department, and transportation of marijuana from a medical marijuana dispensary facility to the qualifying patient's residence shall not subject the possessor to arrest, criminal or civil liability, or sanctions under Missouri law, provided that the possessor produces on demand to the appropriate authority a valid qualifying patient identification card: a valid qualifying patient cultivation identification card; a valid physician certification while making application for an identification card: or a valid primary caregiver identification card. Production of the respective equivalent identification card or authorization issued by another state or political subdivision of another state shall also meet the requirements of this subdivision.

(2) No patient shall be denied access to or priority for an organ transplant because they hold a qualifying patient identification card or use marijuana for medical use.

(3) A physician shall not be subject to criminal or civil liability or sanctions under Missouri law or discipline by the Missouri State Board of Registration for the Healing Arts, or its successor agency, for owning, operating, investing in, being employed by, or contracting with any entity

licensed or certified pursuant to this section or issuing a physician certification to a patient diagnosed with a qualifying medical condition in a manner consistent with this section and legal standards of professional conduct.

(4) A health care provider shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or providing health care services that involve the medical use of marijuana consistent with this section and legal standards of professional conduct.

(5) A medical marijuana testing facility shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to the medical use of marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(6) A health care provider shall not be subject to mandatory reporting requirements for the medical use of marijuana by non-emancipated qualifying patients under eighteen years of age in a manner consistent with this section and with consent of a parent or guardian.

(7) A primary caregiver shall not be subject to criminal or civil liability or sanctions under Missouri law for purchasing, transporting, or administering marijuana for medical use to a qualifying patient or participating in the patient cultivation of up to six flowering marijuana plants per patient in a manner consistent with this section and generally established legal standards of personal or professional conduct.

(8) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to prospective or licensed medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana dispensary facilities, medical marijuana-infused products manufacturing facilities, qualifying patients, primary caregivers, physicians, health care providers or others related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(9) Actions and conduct by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities licensed or registered with the department, or their employees or agents, as permitted by this section and in compliance with department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(10) Nothing in this section shall provide immunity for negligence, either common law or statutorily created, nor criminal immunities for operating a vehicle, aircraft, dangerous device, or navigating a boat under the influence of marijuana.

(11) It is the public policy of the state of Missouri that contracts related to marijuana for medical use that are entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities and those who allow property to be used by those entities, should be enforceable. It is the public policy of the state of Missouri that no contract entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to medical marijuana may be prohibited by federal law.]

Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

[6. Legislation.] **6. Law Enforcement and the Courts.**

[Nothing in this section shall limit the General Assembly from enacting laws consistent with this section, or otherwise effectuating the patient rights of this section. The legislature shall not enact laws that hinder the right of qualifying patients to access marijuana for medical use as granted by this section.]

Missouri's law enforcement and its courts shall protect Cannabis users and their property without discrimination, and with every bit the effort afforded to every citizen of Missouri and our nation.
(a) The use and/or possession of Cannabis shall not be grounds for issuing a "Driving under the influence" (DUI) stop, charge, arrest or fine(s) when operating or a passenger of a motor vehicle. Stops, charges, fines and arrests shall be the product of visible and/or previously proven non-Cannabis infractions of Missouri law.
(b) No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal Cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.
(c) Asset or Civil Forfeiture shall no longer be used in the state of Missouri through association with Cannabis, Cannabis cultivation, it's use and/or possession, in any way.
(d) Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, Cannabis-only offenses, which are no longer illegal in the State of Missouri under this Act, shall be immediately released.
(e) Within 60 days of the passage of this Act, a legal document shall be developed and made available to the public ordering the immediate destruction of all Cannabis-related non-violent civil and criminal records in Missouri and for any offense covered by this amendment which is no longer illegal in the State of Missouri under this Act. This document shall be distributed to all pertinent parties throughout the state.
(f) Within 60 days, Missouri's Courts shall order the immediate expungement of civil and criminal records pertaining to all non-violent Cannabis only offenses which are no longer illegal in the State of Missouri under this Act.

[7. Additional Provisions.] **7. Regarding Federal Law.**

[(1) Nothing in this section permits a person to:

(a) Consume marijuana for medical use in a jail or correctional facility;

(b) Undertake any task under the influence of marijuana when doing so would constitute negligence or professional malpractice; or

(c) Operate, navigate, or be in actual physical control of any dangerous device or motor vehicle, aircraft or motorboat while under the influence of marijuana; or

(d) Bring a claim against any employer, former employer, or prospective employer for wrongful discharge, discrimination, or any similar cause of action or remedy, based on the employer, former employer, or prospective employer prohibiting the employee, former employee, or prospective employee from being under the influence of marijuana while at work or disciplining the employee or former employee, up to and including termination from employment, for working or attempting to work while under the influence of marijuana.

(2) No medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility, or entity with a transportation certification shall be owned, in whole or in part, or have as an officer, director, board member, manager, or employee, any individual with a disqualifying felony offense. A "disqualifying felony offense" is a violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the department determines that:

(a) The person's conviction was for the medical use of marijuana or assisting in the medical use of marijuana; or

(b) The person's conviction was for a non-violent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The department may consult with and rely on the records, advice and recommendations of the Attorney General and the Department of Public Safety, or their successor entities, in applying this subdivision.

(3) All medical marijuana cultivation facility, medical marijuana dispensary facility, and medical marijuana-infused products manufacturing facility licenses, entities with medical marijuana testing facility certifications, and entities with transportation certifications shall be held by entities that are majority owned by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, entities outside the state of Missouri may own a minority stake in such entities.

(4) No medical marijuana cultivation facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall manufacture, package or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between a marijuana or marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional department sanction, up to and including loss of license.

(5) All edible marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with dosage amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled, in a font size at least as large as the largest other font size used on the package, as containing "Marijuana," or a " Marijuana-Infused Product." Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty.

(6) No individual shall serve as the primary caregiver for more than three qualifying patients.

(7) No qualifying patient shall consume marijuana for medical use in a public place, unless provided by law. Violation of this prohibition shall subject the violator to sanctions as provided by general law.

(8) No person shall extract resins from marijuana using dangerous materials or combustible gases without a medical marijuana-infused products manufacturing facility license. Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty and, if applicable, loss of their identification card, certificate, or license for up to one year.

(9) All qualifying patient cultivation shall take place in an enclosed, locked facility that is equipped with security devices that permit access only by the qualifying patient or by such patient's primary caregiver. Two qualifying patients, who both hold valid qualifying patient cultivation identification cards, may share one enclosed, locked facility. No more than twelve qualifying patient or primary caregiver cultivated flowering marijuana plants may be cultivated in a single, enclosed locked facility, except when a primary caregiver also holds a qualifying patient cultivation identification card, in which case no more than eighteen flowering marijuana plants may be cultivated in a single, enclosed, locked facility.

(10) No medical marijuana cultivation facility, medical marijuana dispensary facility, medical marijuana-infused products manufacturing facility, medical marijuana testing facility, or entity with a transportation certification shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the department, not to be unreasonably withheld.

(11) Unless allowed by the local government, no new medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. No local government shall prohibit medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana-infused products manufacturing facility, medical marijuana dispensary facility, or entity holding a transportation certification that may operate in such locality.

(12) Unless superseded by federal law or an amendment to this Constitution, a physician shall not certify a qualifying condition for a patient by any means other than providing a physician certification for the patient, whether handwritten, electronic, or in another commonly used format. A qualifying patient must obtain a new physician certification at least annually.

(13) A physician shall not issue a certification for the medical use of marijuana for a non-emancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. The department shall not issue a qualifying patient identification card on behalf of a non-emancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. Such card shall be issued to one of the parents or guardians and not directly to the patient. Only a parent or guardian may serve as a primary caregiver for a non-emancipated qualifying patient under the age of eighteen. Only the qualifying patient's parent or guardian shall purchase or possess medical marijuana for a non-emancipated qualifying patient under the age of eighteen. A parent or guardian shall supervise the administration of medical marijuana to a non-emancipated qualifying patient under the age of eighteen.

(14) Nothing in this section shall be construed as mandating health insurance coverage of medical marijuana for qualifying patient use.

(15) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for medical use or for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.]

Pursuant to the Ninth and Tenth Amendments to the Constitution of the United States, the people of Missouri hereby repudiate and challenge federal Cannabis prohibitions that conflict with this Act.

[8. Severability.] **8. Existing Local, State and Federal Law.**

[The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.]

All provisions of this section shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

[9. Effective Date.] **9. Implementation.**

[The provisions of this section shall become effective on December 6, 2018.]

The dictates of this Initiative, unless otherwise indicated by this initiative, shall be implemented no later than **January 31st, 2021.**

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-070)

Subject

Initiative petition from Mark Pedersen regarding a proposed constitutional amendment to Article XIV of the Constitution of Missouri. (Received June 12, 2019)

Date

July 2, 2019

Description

This proposal would amend Article XIV of the Constitution of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University, Missouri Office of**

Prosecution Services, the **Kansas City Board of Police Commissioners,** and the **Metropolitan Police Department - City of St. Louis.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated the initiative petition has no impact on their department.

Officials from the **Department of Health and Senior Services** indicated the cost savings will be $0 for fiscal year 2020, unknown to greater than or less than $3,365,858 for fiscal year 2021, and unknown to greater than or less than $5,458,381 for fiscal year 2022.

This proposal will affect the Missouri Veteran's Commission.

This could reduce new small business opportunities.

This proposed legislation repeals Section 1, Article XIV, Constitution of Missouri relating to medical marijuana for patients with serious illnesses and medical conditions and replaces it with legalized cannabis for personal or medical use. The current law stipulates the minimum number of facilities to be licensed, the application and operation fees associated with each type of facility, the type of qualifying cardholder, and the fee amount per card.

The total revenue received in fiscal year (FY) 2020 from application, licensing and certification fees is projected to be $12,124,800. It is estimated that revenues from these sources will decrease by 50% in FY 2021 to $6,062,400 and to unknown in FY 2022.

There will also be a decrease in revenue from the four percent sales tax no longer being collected on the retail sale of medical marijuana. There are no established sales trends on which sales for FY 2021 can be estimated, therefore the retail sales of medical marijuana in FY 2021 are unknown. The annual loss of tax revenue as a result is also unknown.

The total loss to state revenue will be an unknown amount greater than $6,062,400 in FY 2021.

https://www.statista.com/statistics/587017/medical-marijuana-user-monthly-expenditure-cannabis-products/

Section 1, Article XIV, Constitution of Missouri

This proposed legislation places on the ballot in November 2020 a proposed amendment to the Constitution that repeals Section 1, Article XIV, Constitution of Missouri relating to medical marijuana for patients with serious illnesses and medical conditions and replaces it with legalized cannabis for personal or medical use. The dictates of this initiative must be implemented no later than January 31, 2021. The Department of Health and Senior Services' (DHSS) assumes that the dictates in the initiative will be completed by December 31, 2020, and, as a result, six months of expenses will be avoided in FY 2021.

The proposed legislation would repeal the Department's authority and funding for its medical marijuana regulatory program. As a result, DHSS would no longer require and would be unable to support the 52 FTE and expenditures associated with administering the medical marijuana program. The avoidance of these expenditures, coupled with the unknown revenue receipts, will result in an unknown impact to the Missouri Veterans Health and Care Fund of unknown to greater than or less than $3,365,858 for FY21.

In as much as both the revenue into and expenses from the Veteran's Health Fund are unknown, there could be an unknown balance in the Veteran's Health Fund when the proposed legislation goes into effect. It is unknown what the distribution of the fund balance would be.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of costs savings of $157,175 in fiscal year 2021, $778,038 in fiscal year 2022, $1,328,713 in fiscal year 2027.

The estimate of the impact of this amendment is determined by a standard response of looking at persons committed for marijuana-only offenses. In 2018, thirty people were incarcerated and 383 given probationary terms of cannabis-only violations. The average

sentence is 7.0 years with 0.9 served before first release; the average probationary term is three years.

Passage of Initiative Petition (IP) 2020-070 is estimated to result in 30 fewer persons incarcerated and 383 fewer persons entering probationary supervision per year in their department. The full impact of the bill occurs in fiscal year (FY) 2026 with 90 fewer persons incarcerated and 1269 fewer persons on field supervision. This results in a reduction of 10 (Probation and Parole) P&P officers by FY2026. Their department cost of incarceration in $17.224 per day or an annual cost of $6,287 per offender. Their department cost of probation or parole is determined by the number of P&P Officer II positions that would be needed to cover the new caseload.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated IP 20-070 is a proposed constitutional amendment to Article XIV that will change to include recreational marijuana. They would like to point out that this is a fiscal estimate, and the numbers that were used were the newest numbers the Department could find when researching this issue. Also, with Illinois being the newest state to legalize recreational marijuana this year, this fiscal estimate could be much lower.

They would also like to point out this initiative petition has no legal buying age limit. Their fiscal analysis will be 21 years and older due to that has been the legal age of all the states that have legalized it thus far.

First, they would like to include the fiscal analysis of the 2018 constitutional amendment that regarding medical marijuana. This amendment passed. IP 20-070 will essentially change the market to recreational, which would be taxed at the state rate of 4.225%, and it will exempt medical marijuana from tax. This eliminates the money that was slated to go into the Veterans Health Fund, and the Show Me Health Access Fund. Below is the fiscal estimates given by their department for the medical marijuana amendment that passed last year. They will consider these to be a loss for the purposes of this fiscal note.

Fund	Tax Rate	FY 2021	FY 2027
Veterans Health Fund	0.04%	$ 0.02	$ 0.06
Show the Me Health Access Fund	0.12%	$ 0.05	$ 0.19
Unknown Fund	3.84%	$ 1.57	$ 6.11
Total Excise Revenue		$ 1.64	$ 6.36

(numbers in millions)

Current 2017 Data (https://www.samhsa.gov/data/report/comparison-2015-2016-and-2016-2017-nsduh-population-percentages-50-states-and-district) suggests that 14.73% of the US population surveyed participated in recreational marijuana use in the last year. That same study also suggests 13.95% of Missourians surveyed participated in recreational

marijuana use in the last year. The 2017 Census estimates for US population age 21+ is 234,116,784, and Missouri's 21+ is 4,435,966. They then multiplied the population number by the percentage number to get the number of marijuana users in the US and the State of Missouri. The US had an estimated 34,485,402 people that had participated in recreational marijuana use in the last year, and Missouri had an estimated 618,817 people that had participated in recreational marijuana use in the last year.

They then determined how many of those marijuana users would be part of the medical marijuana population. Here they utilized an article published by the St. Louis Post Dispatch regarding a study done by the state and numbers the marijuana association in Missouri uses on estimating those who will potentially be part of the medical marijuana population. They will assume for this fiscal note that an estimated 65,547 Missourians will be part of the medical marijuana population. This had to be determined due to this will be the amount that will be tax exempt per IP 20-070.

They determined the percentage of Missouri's market to the US market. This is done by dividing the number of people that participated in recreational marijuana use in Missouri by the number of people that participated in recreational marijuana use in the US. They estimated that Missouri's market percentage in the US minus medical is 1.60%. It is estimated that in 2021 the US marijuana market will total $24.5 billion, and by 2027 it could be as much as $47.3 billion. Using these numbers they estimate that in 2021 the Missouri market will be at $393,068,383.

Using the Missouri marijuana market numbers, they estimate that the following:

MO Sales	**2021**	**2027**
General Revenue	$ 11,792,051	$ 22,765,879
Education	$ 3,930,684	$ 7,588,626
Conservation	$ 491,335	$ 948,578
Parks, soil, water	$ 393,068	$ 758,863
Total State Revenue (TSR)	$ 16,607,139	$ 32,061,946

Local Sales Tax	$ 15,329,667	$ 29,595,643

*Local Sales Tax was figured with an average sales tax rate of 3.9%.

TSR	$ 16,607,139	$ 32,061,946
Previous Medical Marijuana	*$ 1,640,000*	*$ 6,360,000*
IP-20-070 Total Impact	**$ 14,767,139**	**$ 25,701,946**

Officials from the **Department of Public Safety - Office of Director** indicated they see no fiscal impact due to this initiative petition. They also indicated they forwarded this to the Department of Public Safety - Alcohol and Tobacco Control (ATC) Division and ATC officials indicated they see no fiscal impact.

Department of Public Safety - Division of Missouri State Highway Patrol indicated:

The Patrol's Criminal Justice Information Services Division (CJIS) processes all requests for expungements for criminal history records, and the requests are processed by a CJIS Technician. This person reviews criminal history records, contacts agencies associated with the arrests or convictions, and collects all necessary data for court orders.

As of January 2017, there were 95,550 marijuana-related arrest charges in the Central Repository. The expungement process takes approximately 90 minutes, so 1 full-time employee (FTE) could handle 1,243 expungements per year.

- 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

- 111,840 minutes per year / 90 minutes per expungement = 1,243 expungements per year per FTE

- 95,550 records / 1,243 per FTE per year = 77 FTE

Additionally, the Patrol Records Division (PRD) processes all petitions and court orders relating to expungement of marijuana-related traffic arrests.

There are currently 113,922 traffic arrest records in the system. The expungement process takes approximately 30 minutes, so 1 FTE could handle 3,728 expungements per year.

- 111,840 minutes per year / 30 minutes per expungement = 3,728 expungements per year per FTE

- 113,922 records / 3,728 per FTE per year = 31 FTE

The Patrol would also need to replace all 10 of its canines. The Patrol's canines are currently trained using Cannabis/Marijuana as one of the drugs to which they alert. If this initiative were to pass, each canine would have to be retired and replaced. The purchase and initial training for a canine is approximately $22,000. Since the Patrol contracts its canine training, the time to train all 10 canines could take up to 2 years.

As a result, the anticipated total initial cost to the Patrol will be **$7,388,617**, as follows:

$6,249,429	Salary and fringe benefits for 77 CJIS Technicians and 31 PRD Technicians
$385,128	Expense and Equipment for the 108 FTE
$534,060	Rental space, janitorial, utilities for the 108 FTE
$220,000	Cost of replacing and training 10 canines
$7,388,617	Total Cost

With the time involved in hiring and training FTE, processing expungements, and replacing canines, the Patrol anticipates this being a 2-year project, after which time the FTE would be terminated.

Missouri State Highway Patrol - Comments and Concerns:

In 2009, Colorado traffic fatalities involving drivers testing positive for marijuana represented 9% of the total traffic fatalities. Recreational marijuana use was legalized in 2012. By 2016, that number more than doubled to 21%.

Marijuana-related traffic deaths increased 66% in the four-year average (2013-2016) since Colorado legalized recreational marijuana compared to the four-year average (2009-2012) prior to legalization.

Marijuana-related deaths when a driver tested positive for marijuana more than doubled from 55 deaths in 2013 to 125 deaths in 2016.

The yearly number of marijuana related hospitalizations increased 72% after the legalization of marijuana, (2009-2012) vs. (2013-2016).

Colorado youth past month marijuana use for 2014/2015 was 55% higher than the national average.

The average THC (tetrahydrocannabinol) levels in marijuana has increased significantly over the years: 1969-0.8%, 1995-4%, 2013-13%; 2017-20+%; Oil, 1995-13%, 2013-52%; highest Plant 38%, highest oil 95%+.

In Missouri, medical marijuana was legalized by Amendment 2 and took effect December 2018. As of June 10, 2019, 12 states have legalized recreational marijuana and 29 states have legalized medical marijuana. In a roadside 2013-2014 NHTSA roadside survey, 20% of the nighttime and weekend drivers tested positive for drugs. Interestingly, the number of daytime drugged drivers was approximately the same amount as night and weekend drugged drivers. A roadside study in Colorado and Washington, the first two states to legalize marijuana for recreational use, showed the primary increase of marijuana users happened to their daytime drivers. The percent of drivers that tested positive for marijuana during the day went from 8%, before recreational marijuana sales, to 23%, 6-12 months after marijuana was legalized. There was a 48% increase in weekend nighttime drivers testing positive for THC or 11-OH-THC (an active metabolite of THC) from 2007 to 2014.

Montana legalized medical marijuana in 2004 and from 2007-2010, the presence of marijuana in DUI suspects increased over 100%. Also, the number of DUI suspects who tested positive for alcohol and marijuana increased by over 180%.

Medical marijuana has been legal in the state of Colorado since 2000. On November 12, 2012, the state of Colorado passed Amendment 64, which legalized private use of marijuana. Per the Colorado State Patrol's driving under the influence statistics, marijuana

DUI citations increased 25.5% from 2014 to 2018 and marijuana and alcohol citations increased 112% in the same time range. As marijuana becomes legalized, its use increases.

The three years after Colorado legalized marijuana for recreational use (2013-2015), its use increased in youth ages 12-17, by 12%, in young adults aged 18-25 by 16%, and adults 26 in older by 71%. By removing the recommended acceptable ages of use, zoning regulations, packaging, and advertising of cannabis/marijuana, the risk of use and abuse of marijuana by the youth of Missouri is substantially increased. This category of Missourians, who recent studies have shown significant long-term cognitive impairment when marijuana is ingested during the developmental years, would be affected (16)(b) of the initiative petition defines cannabis as including "any variety of Cannabis, including any derivative, concentrate, extract, flower...". The Patrol recommends this definition ***not*** include concentrates or extracts. Concentrates and extracts can reach THC concentrations into the 90%+ range. Naturally occurring cannabis plants typically contain 3-6% THC. Some cannabis cultivators have genetically manipulated the cannabis plant to produce high THC concentrations, up to 30%. There is little to no research done to show the short/long term health effects from such high THC concentrations.

(16)(e) defines cannabis accessories as "any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing Cannabis into and/or onto the human body". The Patrol recommends "any equipment, products, or materials of any kind that are used, intended for use, or designed for use" be removed. Reading this definition, this could include combustible solvents that are commonly used to manipulate or extract cannabinoids from the cannabis plant. Solvents, such a butane, are unstable and commonly combust when not used properly or for their intended use.

(25)(g) states "No one shall be denied employment solely based on their use of cannabis". Per the National Institute on Drug Abuse, studies suggest there is a link between marijuana use and an increase risk of injury and accidents in the workplace. One study found employees who tested positive for marijuana, pre-employment, had 55% more accidents, 85% more injuries and 75% greater absenteeism, when compared to employees who did not test positive for marijuana. The Patrol recommends this be removed and employers still have the right to deny employment and put policies and procedures in place which prohibits their employees from cannabis use.

(25)(h) states "The use and/or possession of Cannabis shall in no way impede one's legal right to possess a firearm". The Patrol recommends this be completely removed from the proposal. Federal law, 18 U.S.C. 922(g)(3), prohibits any person who is an unlawful user of or addicted to any controlled substance (as defined in section 102 of the Controlled Substances Abuse Act (21 U.S.C. 802) from shipping, transporting, receiving or possession of firearms or ammunition. Marijuana is listed in the Controlled Substances Act as a Schedule 1 controlled substance, and there are no exceptions in Federal Law for marijuana purportedly used for medicinal purposes, even if such use is sanctioned by State Law.

The Medical section states "Medical Cannabis shall be available to patients without taxation who have a physician's recommendation...." The Patrol would like clarification of this statement. Does this remove the 4% tax on medical marijuana under Amendment 2?

The Patrol recommends a $75 fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing criminal histories, as well as contacting various agencies associated with arrests (in researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements - their fees ranged from $50 to $450 per petition per arrest date).

This initiative provides specific employment protections for those who use Cannabis/Marijuana. Such use while serving in any law enforcement related position not only creates public safety concerns, but also quality control and security issues when working with highly sensitive material or information. Additionally, the Patrol receives federal grant funding, subject to audits, that require a drug free workplace policy. For these reasons, the Patrol feels it is essential that it be allowed to continue administering drug testing for new employees, as well as random tests, critical incident tests, etc.

Additionally, the initiative does not contain any language concerning the amount of marijuana an individual may transport, purchase or sell. Also, there is no language as to where the marijuana may be transported. A lack of guidance may allow for Missouri marijuana facilities to distribute marijuana outside of the state, or allow other states to distribute their marijuana in Missouri. A lack of such language could lead to Missouri being a distribution starting point for states where marijuana remains illegal.

Finally, if passed, the initiative petition will remove Cannabis/Marijuana from Missouri Revised Statutes and create conflict with both Federal and State laws, such as the use or possession of a firearm. As the Patrol has officers assigned to federal task forces that may be involved in a federal drug operation, there are concerns over potential civil litigation resulting from these types of operations, as marijuana is still classified as a Schedule I controlled substance.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition will have a negative impact on MoDOT and the MSHP/MoDOT Medical Plan.

Amendment 2 from 2018 allowed patients with qualifying medical conditions to use medical marijuana for treatment under the supervision of a physician. However, **consumption of medical marijuana in a public place and driving under the influence of marijuana are still illegal** and there is no criminal or civil immunity for **operating a vehicle, aircraft, dangerous device, or navigating a boat under the influence of marijuana**. Additionally, an employee cannot bring a claim for wrongful discharge, discrimination, or any similar cause of action or remedy based on an employer prohibiting the employee from being under the influence of marijuana while at work; or disciplining the employee for working or attempting to work while under the influence of marijuana. Amendment 2 from 2018 also included language regarding taxation and reporting as well as general regulation and oversight of medical marijuana. **Amendment 2 from 2018 also explicitly stated that nothing in the amendment shall be construed as mandating health insurance coverage of medical marijuana for qualifying patient use**.

Their understanding is that this initiative petition is amending the Missouri Constitution to remove all of the language that was added in 2018 with the passage of Amendment 2 and add language that significantly expands the legal use of marijuana to include both medical and personal use.

Their main concern is with "No one shall be denied employment solely based on their use of Cannabis." This initiative petition appears to **permit employees to work while under the influence of marijuana and would not allow an employer to terminate employment if the employee is under the influence of marijuana at work**. This presents **significant safety and productivity concerns for MoDOT**. Additionally, **MoDOT must comply with the Federal DOT regulations for safety-sensitive employees** which requires employees to be removed from their safety-sensitive duties if they test positive for marijuana on a drug test unless they complete the Return-to-Duty process outlined in the DOT regulations. MoDOT is not required to use this Return-to-Duty process. It may instead terminate employment upon receiving a verified positive drug test. In fact, due to the cost and difficulty of requiring the Return-to-Duty process MoDOT encountered in the past, MoDOT's policy now requires termination of employment for a positive drug test for marijuana. Furthermore, the **Federal Drug-Free Workplace Act explicitly requires policies prohibiting the unlawful use, possession, or distribution of any Schedule I controlled substance for employees performing work in connection with a Federal grant or contract**.

Another concern is that Amendment 2 from 2018 explicitly stated that nothing in the amendment shall be construed as mandating health insurance coverage of medical marijuana for qualifying patient use. This language is not included in this initiative petition. In fact, **language has been added to state that "all patients engaged in Cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means, whether or not under the care of a physician. Therefore, there may be an argument that the MSHP/MoDOT medical plan must cover medical marijuana use. This would have a negative fiscal impact on the MSHP/MoDOT Medical Plan.**

Furthermore, the initiative petition specifically states that "Cannabis shall no longer be considered a controlled substance or a drug…" The added language also states that the use and/or possession of Cannabis shall not be grounds for issuing a DUI stop, charge, arrest or fine when operating or a passenger of a motor vehicle. This presents **significant safety concerns for the traveling public**, which conflicts with MoDOT's mission.

In sum, this initiative petition would have negative impacts far beyond fiscal loss via the medical plan due to highway safety and federal compliance issues.

The federal compliance realm is unknown to them, and the federal government could sanction Missouri's highway funds. This is from their 2018 response to several initiative petitions:

Changes to Missouri's state driving laws could impact some federal commercial drivers' license laws.

Failure to comply with 49 C.F.R. 384.225 and 384.226 could result in a withholding of Missouri's federal-aid highway funds apportioned to it under each of Title 23, United States Code (U.S.C.), sections 104(b)(1), (b)(3), and (b)(4). The federal funds impacted consist of national highway performance program funds, highway safety improvement program funds, and congestion mitigation and air quality improvement funds. The withholding amount would be four percent for the first year of non-compliance and eight percent for the second and subsequent years.

This still holds true because they simply cannot say with certainty how the federal government would react, as they generally only acts in a reactive manner to legislation.

Officials from the **Office of Administration** this proposal amends Article XIV, Section 1 of the Missouri Constitution by repealing all of the medical marijuana language that was voter approved in November 2018 and replacing it with language for recreational marijuana.

Section 1.1 states that cannabis shall immediately be removed from the Missouri Revised Statutes list of controlled substances. **Section 1.6** requires, upon passage of the act, the immediate release of all persons incarcerated or under Probation and Parole supervision for non-violent cannabis-only offenses as well as expungement of their records pertaining to these offenses within 60 days. The Office of Administration, Division of Budget and Planning (B&P) defers to the Department of Corrections for the estimated impact from this provision.

Section 1.4 states that medical cannabis shall be available to patients without taxation as long as a patient has a physician's recommendation. B&P notes that it is unclear if the term "recommendation" refers to a medical prescription or simply a suggestion. B&P further notes that if "recommendation" is interpreted to mean anything other than prescription, potential subsequent sales and/or excise tax revenues to the state could be significantly

negatively impacted. B&P also notes that this proposal does not include any regulatory framework or specify any agency responsible for enforcement of medical marijuana sales.

B&P notes that no specific tax levy is included within this proposal. Therefore, B&P assumes that only current state and local sales taxes would be applied to the sale of non-medical cannabis. This would eliminate the 4% tax on medical marijuana sales that under current law is dedicated to the Missouri Veterans' Health and Care Fund.

B&P further notes that this proposal does not specify the age individuals must be to purchase cannabis. For the purpose of this fiscal note, B&P assumes that an individual must be at least 18 years old; however, as written, it appears that minors could also purchase cannabis. A change in the age assumption could change the estimated fiscal note impacts shown below.

Based on research, B&P was able to find forecasts for the U.S. legal market for cannabis[1]. According to such forecasts, the U.S. market for legal marijuana will be approximately $24.5 billion in calendar year 2021 and grow up to $47.3 billion by calendar year 2027. Based on information from the Substance Abuse and Mental Health Services Administration[2], from 2016-2017 approximately 13.95% of Missouri residents and 14.73% of all U.S. residents surveyed have used marijuana within the last year. Using the populations of Missouri residents age 18 and over compared to the U.S. population age 18 and over, B&P estimates that the market for legal marijuana in Missouri is 1.79% of the total U.S. market. Therefore, B&P estimates that the Missouri market for legal marijuana would be approximately $439.5 million in calendar year 2021 ($24.5 billion x 1.79%) and up to $848.4 million by calendar year 2027 ($47.3 billion x 1.79%).

Based on further research[3], B&P estimates that there could be between 61,700 to 122,500 medical marijuana users in Missouri. Using these estimates, and the estimates shown above, B&P estimates that the Missouri market for medical marijuana would be between 0.17% and 0.34% of the total U.S. Market for legal marijuana. Therefore, B&P estimates that the total Missouri market for recreational marijuana would be 1.46% to 1.62% of the total U.S. market. Table 1 shows the estimated U.S. and Missouri markets for marijuana.

[3] https://www.stltoday.com/news/local/metro/plenty-of-pot-study-says-missouri-will-license-twice-as/article_e94469b0-e1c6-5893-bc2e-e1d7b24f4a73.html

Table 1: Estimated Marijuana Market Size for the U.S. and Missouri

Calendar Year	Estimated U.S. Market Size	Estimated MO Market Size	Estimated MO Medical Market Size	Estimated MO Recreational Market Size
2021	$24,500,000,000	$439,465,251	$41,480,436	$ 397,984,815
2022	$28,300,000,000	$507,627,209	$61,066,553	$ 446,560,656
2023	$32,100,000,000	$575,789,166	$80,652,669	$ 495,136,497
2024	$35,900,000,000	$643,951,123	$100,238,785	$ 543,712,338
2025	$39,700,000,000	$712,113,081	$119,824,901	$ 592,288,179
2026	$43,500,000,000	$780,275,038	$139,411,018	$ 640,864,020
2027	$47,300,000,000	$848,436,996	$158,997,134	$ 689,439,861

Based on the estimates for the medical marijuana market, B&P estimates that the Missouri Veterans' Health and Care Fund would lose ($1.6 million) in funding during calendar year 2021. By calendar year 2027, the Fund would lose up to ($6.4 million).

Applying the state sales tax rate of 4.225% and excluding the estimated market for medical marijuana B&P estimates that this proposal may increase state revenues by $15.2 million in calendar year 2021. By calendar year 2027, B&P estimates that this proposal may increase state revenues by $22.8 million. This proposal could also increase local revenues by $15.4 million in calendar year 2021 and $26.6 million by calendar year 2027. Table 2 shows the estimated revenues generated by calendar year.

Table 2: Sales Tax Collections by Calendar Year

Fund	CY 2021	CY 2022	CY 2023	CY 2024	CY 2025	CY 2026	CY 2027
GR (3.0% tax)	$11,939,544	$13,396,820	$14,854,095	$16,311,370	$17,768,645	$19,225,921	$20,683,196
Education (1.0% tax)	$3,979,848	$4,465,607	$4,951,365	$5,437,123	$5,922,882	$6,408,640	$6,894,399
Conservation (0.125% tax)	$497,481	$558,201	$618,921	$679,640	$740,360	$801,080	$861,800
Parks, soil, water (0.1% tax)	$397,985	$446,561	$495,136	$543,712	$592,288	$640,864	$689,440
Veterans' Health and Care Fund (4.0% tax)	($1,659,217)	($2,442,662)	($3,226,107)	($4,009,551)	($4,792,996)	($5,576,441)	($6,359,885)
TSR (total 4.225% state sales tax)	$15,155,641	$16,424,526	$17,693,410	$18,962,295	$20,231,180	$21,500,064	$22,768,949
Local Revenue (pop. weighted local rate 3.86%)	$15,362,214	$17,237,241	$19,112,269	$20,987,296	$22,862,324	$24,737,351	$26,612,379

However, B&P notes that if voter approved in November 2020, this proposal would not be enacted until January 1, 2021 which is halfway through FY 2021. Based on historical sales tax collection data, B&P adjusts calendar year collections 50% into the first fiscal year and 50% into the second fiscal year. Therefore, B&P estimates that this proposal will increase

state revenues by $7.6 million in FY 2021. BY FY 2028, this proposal may increase state revenues by $22.8 million. This proposal may also increase local revenues by $7.7 million in FY 2021 and up to $26.6 million by FY 2028. Table 3 shows the estimated revenue generated by fiscal year.

Table 3: Sales Tax Collections by Fiscal Year

Fund	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028
GR	$5,969,772	$12,668,182	$14,125,457	$15,582,733	$17,040,008	$18,497,283	$19,954,558	$20,683,196
Education	$1,989,924	$4,222,727	$4,708,486	$5,194,244	$5,680,003	$6,165,761	$6,651,519	$6,894,399
Conservation	$248,741	$527,841	$588,561	$649,281	$710,000	$770,720	$831,440	$861,800
Parks, soil, water	$198,992	$422,273	$470,849	$519,424	$568,000	$616,576	$665,152	$689,440
Veterans' Health & Care Fund	($829,609)	($2,050,940)	($2,834,384)	($3,617,829)	($4,401,274)	($5,184,718)	($5,968,163)	($6,359,885)
TSR	$7,577,820	$15,790,083	$17,058,968	$18,327,853	$19,596,737	$20,865,622	$22,134,506	$22,768,949
Local Revenue	$7,681,107	$16,299,728	$18,174,755	$20,049,783	$21,924,810	$23,799,837	$25,674,865	$26,612,379

B&P notes that due to the bill's lack of clarity concerning what constitutes a medical marijuana exemption and the age required to purchase, these estimates may be different from actual collections.

Section 1.5 states that cannabis farmers, manufacturers, and distributors shall not be subject to special zoning or license fees that are contrary to any other commercial or agriculture business. B&P notes that under Amendment 2 (which this language is replacing) medical marijuana facilities are subject to various license and renewal fees. B&P defers to the Department of Health and Senior Services for the potential lost revenue from the removal of the current language.

Section 1.8 states that all provisions of Section 1 shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution. B&P notes that state law may not supersede federal law.

Officials from the **Office of State Courts Administrator** indicated the initiative petition proposes a constitutional amendment to Article XIV to modify the current provisions of the Missouri Constitution relating to legalization of marijuana.

The average of all marijuana related charge codes from 2012 to 2016 for Circuit case types is 11,537 per year. The average of all marijuana related charge codes from 2012 to 2016 for Associate case types is 8,765. They are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this proposed legislation:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		

Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund

Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri
Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender (MSPD), since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2018 MSPD data, is that this would reduce their caseload by 4,046 cases (149 A/B felonies, 2,911 C/D felonies, and 986 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 4,046 cases, those cases require 89,530 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 43 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 289 attorneys under the workload standards developed in *The Missouri Project*. (The 289 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 43 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there is anticipated costs to the County of Greene for this initiative petition, per the following information concerning this initiative petition.: https://static1.squarespace.com/static/5541a76ae4b0175cee8827d0/t/580684e5ff7c50adea98399e/1476822252561/Letter+to+CA+from+Denver+DA.jpgI provided by their County Prosecutor, Dan Patterson.

To fully understand the fiscal impact would require a very detailed study to give the best opportunity to understand the impact to law enforcement, prosecutors and the circuit courts within the proposed changes of this initiative petition, which the attached letter demonstrates occurred in Colorado after similar legislation passed.

County Prosecutor, Dan Patterson provided the following information:

DenverDA
Mitchell R. Morrissey, District Attorney - Second Judicial District
201 W. Colfax Avenue, Dept. 801, Denver, CO 80202
Bus. Phone: 720-913-900
Fax: 720-913-903

October 12, 2016

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated this initiative petition may have a fiscal impact on their city (because it makes medical cannabis available without taxation) in an unknown amount because they have no current sales for which to extrapolate a forecast. Some sort of business license fee could still be collected, but they likewise cannot forecast the impact (positive or negative).

The State Auditor's office did not receive a response from the **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University, Missouri Office of Prosecution Services,** the **Kansas City Board of Police Commissioners,** and the **Metropolitan Police Department - City of St. Louis.**

Fiscal Note Summary

State governmental entities expect increased revenues of at least $10.7 million annually and savings of at least $6.8 million annually by 2027. Local governmental entities are expected to have revenue increases of at least $26.6 million annually by 2027 and are expected to have cost increases of an unknown amount.

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Mark Pedersen regarding a proposed constitutional amendment to Article XIV (2020-069)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mark Pedersen on May 29, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends Article XIV Section 1 of the Missouri Constitution by deleting all matters within the enclosed brackets and adding all of the underlined matters as required pursuant to Section 116.050 RSMo.

Section 1. [Right to Access medical marijuana.] Missouri Cannabis Restoration and Protection [– 1. Purposes.]

1. Clarification as a substance.

[This section is intended to permit state-licensed physicians to recommend marijuana for medical purposes to patients with serious illnesses and medical conditions. The section allows patients with qualifying medical conditions the right to discuss freely with their physicians the possible benefits of medical marijuana use, the right of their physicians to provide professional advice concerning the same, and the right to use medical marijuana for treatment under the supervision of a physician.

This section is intended to make only those changes to Missouri laws that are necessary to protect patients, their primary caregivers, and their physicians from civil and criminal penalties, and to allow for the limited legal production, distribution, sale and purchase of marijuana for medical use. This section is not intended to change current civil and criminal laws governing the use of marijuana for nonmedical purposes. The section does not allow for the public use of marijuana and driving under the influence of marijuana.]

Cannabis shall immediately be removed from the Missouri Revised Statutes list of controlled substances and shall no longer be listed among Missouri's drug schedules. Cannabis shall no longer be considered a controlled substance or a drug, hence forth by Missouri law, by the passage of this initiative.

[2. Definitions.] **2. Definitions.**

[(1) "Administer" means the direct application of marijuana to a qualifying patient by way of any of the following methods:

(a) Ingestion of capsules, teas, oils, and other marijuana-infused products;

(b) Vaporization or smoking of dried flowers, buds, plant material, extracts, or oils;

(c) Application of ointments or balms;

(d) Transdermal patches and suppositories;

(e) Consuming marijuana-infused food products; or

(f) Any other method recommended by a qualifying patient's physician.

(2) "Department" means the Department of Health and Senior services, or its successor agency.

(3) "Entity" means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(4) "Flowering plant" means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(5) "Marijuana" or "marihuana" means *Cannabis indica, Cannabis sativa, and Cannabis ruderalis,* hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana, as well as resin extracted from the plant and marijuana-infused products. "marijuana" or "Marihuana" do not include industrial hemp containing a crop-wide average tetrahydrocannabinol concentration that does not exceed three-tenths of one percent on a dry weight basis, or commodities or products manufactured from industrial hemp.

(6) "Marijuana-infused products" means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(7) "Medical marijuana cultivation facility" means a facility licensed by the department, to acquire, cultivate, process, store, transport, and sell marijuana to a medical marijuana dispensary facility, medical marijuana testing facility, or to a medical marijuana-infused products manufacturing facility.

(8) "Medical marijuana dispensary facility" means a facility licensed by the department, to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and drug paraphernalia used to administer marijuana as provided for in this section to a qualifying patient, a primary caregiver, another medical marijuana dispensary facility, a medical marijuana testing facility, or a medical marijuana-infused products manufacturing facility.

(9) "Medical marijuana-infused products manufacturing facility" means a facility licensed by the department, to acquire, store, manufacture, transport, and sell marijuana-infused products to a medical marijuana dispensary facility, a medical marijuana testing facility, or to another medical marijuana-infused products manufacturing facility.

(10) "Medical marijuana testing facility" means a facility certified by the department, to acquire, test, certify, and transport marijuana.

(11) "Medical use" means the production, possession, delivery, distribution, transportation, or administration of marijuana or a marijuana-infused product, or drug paraphernalia used to administer marijuana or a marijuana-infused product, for the benefit of a qualifying patient to mitigate the symptoms or effects of the patient's qualifying medical condition.

(12) "Physician" means an individual who is licensed and in good standing to practice medicine or osteopathy under Missouri law.

(13) "Physician certification" means a document, whether handwritten, electronic or in another commonly used format, signed by a physician and stating that, in the physician's professional opinion, the patient suffers from a qualifying medical condition.

(14) "Primary caregiver" means an individual twenty-one years of age or older who has significant responsibility for managing the well-being of a qualifying patient and who is designated as such on the primary caregiver's application for an identification card under this section or in other written notification to the department.

(15) "Qualifying medical condition" means the condition of, symptoms related to, or side-effects from the treatment of:

(a) Cancer;

(b) Epilepsy;

(c) Glaucoma;

(d) Intractable migraines unresponsive to other treatment;

(e) A chronic medical condition that causes severe, persistent pain or persistent muscle spasms, including but not limited to those associated with multiple sclerosis, seizures, Parkinson's disease, and Tourette's syndrome;

(f) Debilitating psychiatric disorders, including, but not limited to, post-traumatic stress disorder, if diagnosed by a state licensed psychiatrist;

(g) Human immunodeficiency virus or acquired immune deficiency syndrome;

(h) A chronic medical condition that is normally treated with a prescription medication that could lead to physical or psychological dependence, when a physician determines that medical use of marijuana could be effective in treating that condition and would serve as a safer alternative to the prescription medication;

(i) Any terminal illness; or

(j) In the professional judgment of a physician, any other chronic, debilitating or other medical condition, including, but not limited to, hepatitis C, amyotrophic lateral sclerosis, inflammatory bowel disease, Crohn's disease, Huntington's disease, autism, neuropathies, sickle cell anemia, agitation of Alzheimer's disease, cachexia, and wasting syndrome.

(16) "Qualifying patient" means a Missouri resident diagnosed with at least one qualifying medical condition.]

(a) "Controlled Substance List", or "CSL" refers to Missouri's list of controlled substances as pertains to Missouri Statutes.
(b) "Cannabis" and "Cannabis hemp" refer to the Cannabis, marihuana, marijuana, Cannabis sativa, Cannabis sativa L., Cannabis Americana, Cannabis Gigantea, Cannabis indica, Cannabis ruderalis, or any variety of Cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
(c) "Medical Cannabis" refers to Cannabis used to prevent or to treat a medical condition.
(d) "Personal use" refers to the personal use or consumption of Cannabis.
(e) "Cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing Cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing Cannabis into and/or onto the human body.
(f) "Establishment" refers to a Cannabis cultivation facility, a Cannabis testing facility, a Cannabis product manufacturing facility, or a retail store, Cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells Cannabis, Cannabis products and/or Cannabis accessories.

[3. Creating Patient Access to Medical Marijuana.] **3. Personal and Commercial.**

[(1) In carrying out the implementation of this section, the department shall have the authority to:

(a) Grant or refuse state licenses and certifications for the cultivation, manufacture, dispensing, sale, testing, tracking, and transportation of marijuana for medical use as provided by law; suspend, fine, restrict, or revoke such licenses and certifications upon a violation of this section or a rule promulgated pursuant to this section; and impose any administrative penalty authorized by this section or any rule promulgated pursuant to this section.

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana for medical use and for the enforcement of this section so long as patient access is not restricted unreasonably and such rules are reasonably necessary for patient safety or to restrict access to only licensees and qualifying patients.

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section;

(d) Require a seed-to-sale tracking system that tracks medical marijuana from either the seed or immature plant stage until the medical marijuana or medical marijuana-infused product is sold to a qualifying patient or primary caregiver to ensure that no medical marijuana grown by a medical marijuana cultivation facility or manufactured by a medical marijuana-infused products manufacturing facility is sold or otherwise transferred except by a medical marijuana dispensary facility. The department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees.

(e) Issue standards for the secure transportation of marijuana and marijuana-infused products. The department shall certify entities which demonstrate compliance with its transportation standards to transport marijuana and marijuana-infused products to a medical marijuana cultivation facility, a medical marijuana-infused products manufacturing facility, a medical marijuana dispensary facility, a medical marijuana testing facility, or another entity with a transportation certification. The department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport cannabis.

(f) The department may charge a fee not to exceed $5,000 for any certification issued pursuant to this section.

(g) Prepare and transmit annually a publicly available report accounting to the Governor for the efficient discharge of all responsibilities assigned to the department under this section;

(h) Establish a system to numerically score competing medical marijuana licensee and certificate applicants, only in cases where more applicants apply than the minimum number of licenses or certificates as calculated by this section, which scoring shall be limited to an analysis of the following:

(i) the character, veracity, background, qualifications, and relevant experience of principal officers or managers;

(ii) the business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, plans to ensure safety and security of qualifying patients and the community, procedures to be used to prevent diversion, and any plan for making marijuana available to low-income qualifying patients;

(iii) site security;

(iv) experience in a legal cannabis market;

(v) in the case of medical marijuana testing facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and/or potency and health care industry experience;

(vi) the potential for positive economic impact in the site community;

(vii) in the case of medical marijuana cultivation facilities, capacity or experience with agriculture, horticulture, and health care;

(viii) in the case of medical marijuana dispensary facilities, capacity or experience with health care, the suitability of the proposed location, and its accessibility for patients;

(ix) in the case of medical marijuana-infused products manufacturing facilities, capacity or experience with food and beverage manufacturing; and

(x) maintaining competitiveness in the marijuana for medical use marketplace.

In ranking applicants and awarding licenses and certificates, the department may consult or contract with other public agencies with relevant expertise regarding these factors. The department shall lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana for medical use by qualifying patients.

(2) The department shall issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana for medical use by qualifying patients. In developing such rules or emergency rules, the department may consult with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the department may issue rules or emergency rules relating to the following subjects:

(a) Compliance with, enforcement of, or violation of any provision of this section or any rule issued pursuant to this section, including procedures and grounds for denying, suspending, fining, restricting, or revoking a state license or certification issued pursuant to this section;

(b) Specifications of duties of officers and employees of the department;

(c) Instructions or guidance for local authorities and law enforcement officers;

(d) Requirements for inspections, investigations, searches, seizures, and such additional enforcement activities as may become necessary from time to time;

(e) Creation of a range of administrative penalties for use by the department;

(f) Prohibition of misrepresentation and unfair practices;

(g) Control of informational and product displays on licensed premises provided that the rules may not prevent or unreasonably restrict appropriate signs on the property of the medical marijuana dispensary facility, product display and examination by the qualifying patient and/or primary caregiver, listings in business directories including phone books, listings in marijuana-related or medical publications, or the sponsorship of health or not for profit charity or advocacy events;

(h) Development of individual identification cards for owners, officers, managers, contractors, employees, and other support staff of entities licensed or certified pursuant to this section, including a fingerprint-based federal and state criminal record check in accordance with U.S. Public Law 92-544, or its successor provisions, as may be required by the department prior to issuing a card and procedures to ensure that cards for new applicants are issued within fourteen days. Applicants licensed pursuant to this section shall submit fingerprints to the Missouri state highway patrol for the purpose of conducting a state and federal fingerprint-based criminal background check. The Missouri state highway patrol, if necessary, shall forward the fingerprints to the Federal Bureau of Investigation (FBI) for the purpose of conducting a fingerprint-based criminal background check. Fingerprints shall be submitted pursuant to 43.543 and fees shall be paid pursuant to 43.530;

(i) Security requirements for any premises licensed or certified pursuant to this section, including, at a minimum, lighting, physical security, video, alarm requirements, and other minimum procedures for internal control as deemed necessary by the department to properly administer and enforce the provisions of this section, including reporting requirements for changes, alterations, or modifications to the premises;

(j) Regulation of the storage of, warehouses for, and transportation of marijuana for medical use;

(k) Sanitary requirements for, including, but not limited to, the preparation of medical marijuana-infused products;

(l) The specification of acceptable forms of picture identification that a medical marijuana dispensary facility may accept when verifying a sale;

(m) Labeling and packaging standards;

(n) Records to be kept by licensees and the required availability of the records;

(o) State licensing procedures, including procedures for renewals, reinstatements, initial licenses, and the payment of licensing fees;

(p) The reporting and transmittal of tax payments;

(q) Authorization for the department of revenue to have access to licensing information to ensure tax payment and the effective administration of this section; and

(r) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(3) The department shall issue rules or emergency rules for a medical marijuana and medical marijuana-infused products independent testing and certification program for medical marijuana licensees and requiring licensees to test medical marijuana using one or more impartial, independent laboratories to ensure, at a minimum, that products sold for human consumption do not contain contaminants that are injurious to health, to ensure correct labeling and measure potency. The department shall not require any medical marijuana or medical marijuana-infused products to be tested more than once prior to sale.

(4) The department shall issue rules or emergency rules to provide for the certification of and standards for medical marijuana testing facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The department shall certify, if possible, at least two entities as medical marijuana testing facilities. No medical marijuana testing facility shall be owned by an entity under substantially common control, ownership, or management as a medical marijuana cultivation facility, medical marijuana-infused product manufacturing facility, or medical marijuana dispensary facility.

(5) The department shall maintain the confidentiality of reports or other information obtained from an applicant or licensee containing any individualized data, information, or records related to the licensee or its operation, including sales information, financial records, tax returns, credit reports, cultivation information, testing results, and security information and plans, or revealing any patient information, or any other records that are exempt from public inspection pursuant to state or federal law. Such reports or other information may be used only for a purpose authorized by this section. Any information released related to patients may be used only for a purpose authorized by federal law and this section, including verifying that a person who presented a patient identification card to a state or local law enforcement official is lawfully in possession of such card.

(6) Within one hundred eighty days of December 6, 2018, the department shall make available to the public license application forms and application instructions for medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana dispensary facilities, and medical marijuana-infused products manufacturing facilities.

(7) Within one hundred eighty days of December 6, 2018, the department shall make available to the public application forms and application instructions for qualifying patient, qualifying patient cultivation, and primary caregiver identification cards. Within two hundred ten days of December 6, 2018, the department shall begin accepting applications for such identification cards.

(8) An entity may apply to the department for and obtain one or more licenses to grow marijuana as a medical marijuana cultivation facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the department to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of ten thousand dollars per license application or renewal for all applicants filing an application within three years of December 6, 2018, and shall charge each applicant a non-refundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana cultivation facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(9) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana dispensary facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018 and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten

thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than five medical marijuana dispensary facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(10) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana-infused products manufacturing facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018 and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana-infused products manufacturing facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(11) Any applicant for a license authorized by this section may pre-file their application fee with the department beginning 30 days after December 6, 2018.

(12) Except for good cause, a qualifying patient or his or her primary caregiver may obtain an identification card from the department to cultivate up to six flowering marijuana plants for the exclusive use of that qualifying patient. The card shall be valid for twelve months from its date of issuance and shall be renewable with the annual submittal of a new or updated physician's certification. The department shall charge an annual fee for the card of one hundred dollars, with such rate to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency.

(13) The department may set a limit on the amount of marijuana that may be purchased by or on behalf of a single qualifying patient in a thirty day period, provided that limit is not less than four ounces of dried, unprocessed marijuana, or its equivalent. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons why the qualifying patient needs a greater amount than the limit established by the department.

(14) The department may set a limit on the amount of marijuana that may be possessed by or on behalf of each qualifying patient, provided that limit is not less than a sixty day supply of dried, unprocessed marijuana, or its equivalent. A primary caregiver may possess a separate legal limit for each qualifying patient under their care and a separate legal limit for themselves if they are a qualifying patient.
qualifying patients cultivating marijuana for medical use may possess up to a ninety day supply, so long as the supply remains on property under their control. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons for additional amounts. Possession of between the legal limit and up to twice the legal limit shall subject the possessor to department sanctions, including an administrative penalty and loss of their patient identification card for up to a year. Purposefully possessing amounts in excess of twice the legal limit shall be punishable by imprisonment of up to one year and a fine of up to two thousand dollars.

(15) The department may restrict the aggregate number of licenses granted for medical marijuana cultivation facilities, provided, however, that the number may not be limited to fewer than one license per every one hundred thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(16) The department may restrict the aggregate number of licenses granted for marijuana-infused products manufacturing facilities, provided, however, that the number may not be limited to fewer than one license per every seventy thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(17) The department may restrict the aggregate number of licenses granted for medical marijuana dispensary facilities, provided, however, that the number may not be limited to fewer than twenty-four licenses in each United States Congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on December 6, 2018. Future changes to the boundaries of or the number of congressional districts shall have no impact.

(18) The department shall begin accepting license and certification applications for medical marijuana dispensary facilities, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than two hundred forty days after December 6, 2018. Applications for licenses and certifications under this section shall be approved or denied by the department no later than one hundred fifty days after their submission. If the department fails to carry out its non-discretionary duty to approve or deny an application within one hundred fifty days of submission, an applicant may immediately seek a court order compelling the department to approve or deny the application.

(19) Qualifying patients under this section shall obtain and annually renew an identification card or cards from the department. The department shall charge a fee of twenty-five dollars per year per card with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor or its successor agency. Upon receiving an application for a qualifying patient identification card or qualifying patient cultivation identification card, the department shall, within thirty days, either issue the card or provide a written explanation for its denial. If the department fails to deny and fails to issue a card to an eligible qualifying patient within thirty days, then their physician certification shall serve as their qualifying patient identification card or qualifying patient cultivation identification card for up to one year from the date of physician certification. All initial applications for or renewals of a qualifying patient identification card or qualifying patient cultivation identification card shall be accompanied by a physician certification that is less than thirty days old.

(20) Primary caregivers under this section shall obtain and annually renew an identification card from the department. The department shall charge a fee of twenty five dollars per year, with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. Upon receiving an application for a primary caregiver identification card the department shall, within thirty days, either issue the card or provide a written explanation for its denial.

(21) All marijuana for medical use sold in Missouri shall be cultivated in a licensed medical marijuana cultivation facility located in Missouri.

(22) All marijuana-infused products for medical use sold in the state of Missouri shall be manufactured in a medical marijuana-infused products manufacturing facility.

(23) The denial of a license, license renewal, or identification card by the department shall be appealable to the administrative hearing commission, or its successor entity. Following the exhaustion of administrative review, denial of a license, license renewal, or identification card by the department shall be subject to judicial review as provided by law.

(24) No elected official shall interfere directly or indirectly with the department's obligations and activities under this section.

(25) The department shall not have the authority to apply or enforce any rule or regulation that would impose an undue burden on any one or more licensees or certificate holders, any qualifying patients, or act to undermine the purposes of this section.]

The following acts are not unlawful and shall not be an offense under Missouri law:
(a) Possession and/or consumption of Cannabis for personal or medical use.
(b) Cultivating Cannabis for personal or medical use.
(c) Cultivation, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing Cannabis, Cannabis accessories, and Cannabis products for commercial purposes, provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivating, harvesting, processing, manufacturing, packaging, distribution, transferal, display or possession of any non-toxic food or food product.
(d) Providing Cannabis, Cannabis accessories, and Cannabis products for sale to consumers.
(e) Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs (a) through (d) of this subsection.
(f) No one shall be denied housing solely based on their use of Cannabis.
(g) No one shall be denied employment solely based on their use of Cannabis.
(h) The use and/or possession of Cannabis shall in no way impede one's legal right to possess a firearm.

[4. Taxation and Reporting.] **4. Medical.**

[(1) A tax is levied upon the retail sale of marijuana for medical use sold at medical marijuana dispensary facilities within the state. The tax shall be at a rate of four percent of the retail price. The tax shall be collected by each licensed medical marijuana dispensary facility and paid to the department of revenue. After retaining no more than five percent for its actual collection costs, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the Missouri veterans' health and care fund. Licensed entities making retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Missouri veterans' Health and Care Fund," which shall consist of taxes and fees collected under this section. The State Treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall stand appropriated without further legislative action as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section:

(b) Next, the remainder of such funds shall be transferred to the Missouri veterans commission for health and care services for military veterans, including the following purposes: operations, maintenance and capital improvements of the Missouri veterans homes, the Missouri service officer's Program, and other services for veterans approved by the commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness. The Missouri veterans commission shall contract with other public agencies for the delivery of services beyond its expertise.

(c) All monies from the taxes authorized under this subsection shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana for medical use, a record shall be kept by the seller which identifies, by secure and encrypted patient number issued by the seller to the qualifying patient involved in the sale, all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the Department of Revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from, and in addition to, any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana for medical use.

(6) The fees and taxes provided for in this Article XIV, Section 1 shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

(7) The unexpended balance existing in the fund shall be exempt from the provisions of section 33.080 relating to the transfer of unexpended balances to the general revenue fund.]

Medical Cannabis shall be available to patients without taxation who have a physician's recommendation for its use.
(a) All patients engaged in Cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means, whether or not under the care of a physician.
(b) Licensed physicians shall not be penalized for, nor restricted from recommending and/or providing Cannabis for medical purposes to any person under their care.
(c) Veterinarians shall not be penalized nor restricted from recommending and/or providing Cannabis for medical purposes for any creature under their care.
(d) Any individual who is a Cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri Cannabis patient.
(e) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of Cannabis.

[5. Additional Patient, Physician, Caregiver and Provider Protections.] **5. Zoning.**

[(1) Except as provided in this section, the possession of marijuana in quantities less than the limits of this section, or established by the department, and transportation of marijuana from a medical marijuana dispensary facility to the qualifying patient's residence shall not subject the possessor to arrest, criminal or civil liability, or sanctions under Missouri law, provided that the possessor produces on demand to the appropriate authority a valid qualifying patient identification card: a valid qualifying patient cultivation identification card; a valid physician certification while making application for an identification card: or a valid primary caregiver identification card. Production of the respective equivalent identification card or authorization issued by another state or political subdivision of another state shall also meet the requirements of this subdivision.

(2) No patient shall be denied access to or priority for an organ transplant because they hold a qualifying patient identification card or use marijuana for medical use.

(3) A physician shall not be subject to criminal or civil liability or sanctions under Missouri law or discipline by the Missouri State Board of Registration for the Healing Arts, or its successor agency, for owning, operating, investing in, being employed by, or contracting with any entity

licensed or certified pursuant to this section or issuing a physician certification to a patient diagnosed with a qualifying medical condition in a manner consistent with this section and legal standards of professional conduct.

(4) A health care provider shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or providing health care services that involve the medical use of marijuana consistent with this section and legal standards of professional conduct.

(5) A medical marijuana testing facility shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to the medical use of marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(6) A health care provider shall not be subject to mandatory reporting requirements for the medical use of marijuana by non-emancipated qualifying patients under eighteen years of age in a manner consistent with this section and with consent of a parent or guardian.

(7) A primary caregiver shall not be subject to criminal or civil liability or sanctions under Missouri law for purchasing, transporting, or administering marijuana for medical use to a qualifying patient or participating in the patient cultivation of up to six flowering marijuana plants per patient in a manner consistent with this section and generally established legal standards of personal or professional conduct.

(8) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to prospective or licensed medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana dispensary facilities, medical marijuana-infused products manufacturing facilities, qualifying patients, primary caregivers, physicians, health care providers or others related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(9) Actions and conduct by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities licensed or registered with the department, or their employees or agents, as permitted by this section and in compliance with department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(10) Nothing in this section shall provide immunity for negligence, either common law or statutorily created, nor criminal immunities for operating a vehicle, aircraft, dangerous device, or navigating a boat under the influence of marijuana.

(11) It is the public policy of the state of Missouri that contracts related to marijuana for medical use that are entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities and those who allow property to be used by those entities, should be enforceable. It is the public policy of the state of Missouri that no contract entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to medical marijuana may be prohibited by federal law.]

Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

[6. Legislation.] **6. Law Enforcement and the Courts.**

[Nothing in this section shall limit the General Assembly from enacting laws consistent with this section, or otherwise effectuating the patient rights of this section. The legislature shall not enact laws that hinder the right of qualifying patients to access marijuana for medical use as granted by this section.]

Missouri's law enforcement and its courts shall protect Cannabis users and their property without discrimination, and with every bit the effort afforded to every citizen of Missouri and our nation.
(a) The use and/or possession of Cannabis shall not be grounds for issuing a "Driving under the influence" (DUI) stop, charge, arrest or fine(s) when operating or a passenger of a motor vehicle. Stops, charges, fines and arrests shall be the product of visible and/or previously proven non-Cannabis infractions of Missouri law.
(b) No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal Cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.
(c) Asset or Civil Forfeiture shall no longer be used in the state of Missouri through association with Cannabis, Cannabis cultivation, it's use and/or possession, in any way.
(d) Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, Cannabis-only offenses, which are no longer illegal in the State of Missouri under this Act, shall be immediately released.
(e) Within 60 days of the passage of this Act, a legal document shall be developed and made available to the public ordering the immediate destruction of all Cannabis-related non-violent civil and criminal records in Missouri and for any offense covered by this amendment which is no longer illegal in the State of Missouri under this Act. This document shall be distributed to all pertinent parties throughout the state.
(f) Within 60 days, Missouri's Courts shall order the immediate expungement of civil and criminal records pertaining to all non-violent Cannabis only offenses which are no longer illegal in the State of Missouri under this Act.

[7. Additional Provisions.] **7. Regarding Federal Law.**

[(1) Nothing in this section permits a person to:

(a) Consume marijuana for medical use in a jail or correctional facility;

(b) Undertake any task under the influence of marijuana when doing so would constitute negligence or professional malpractice; or

(c) Operate, navigate, or be in actual physical control of any dangerous device or motor vehicle, aircraft or motorboat while under the influence of marijuana; or

(d) Bring a claim against any employer, former employer, or prospective employer for wrongful discharge, discrimination, or any similar cause of action or remedy, based on the employer, former employer, or prospective employer prohibiting the employee, former employee, or prospective employee from being under the influence of marijuana while at work or disciplining the employee or former employee, up to and including termination from employment, for working or attempting to work while under the influence of marijuana.

(2) No medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility, or entity with a transportation certification shall be owned, in whole or in part, or have as an officer, director, board member, manager, or employee, any individual with a disqualifying felony offense. A "disqualifying felony offense" is a violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the department determines that:

(a) The person's conviction was for the medical use of marijuana or assisting in the medical use of marijuana; or

(b) The person's conviction was for a non-violent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The department may consult with and rely on the records, advice and recommendations of the Attorney General and the Department of Public Safety, or their successor entities, in applying this subdivision.

(3) All medical marijuana cultivation facility, medical marijuana dispensary facility, and medical marijuana-infused products manufacturing facility licenses, entities with medical marijuana testing facility certifications, and entities with transportation certifications shall be held by entities that are majority owned by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, entities outside the state of Missouri may own a minority stake in such entities.

(4) No medical marijuana cultivation facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall manufacture, package or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between a marijuana or marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional department sanction, up to and including loss of license.

(5) All edible marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with dosage amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled, in a font size at least as large as the largest other font size used on the package, as containing "Marijuana," or a " Marijuana-Infused Product." Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty.

(6) No individual shall serve as the primary caregiver for more than three qualifying patients.

(7) No qualifying patient shall consume marijuana for medical use in a public place, unless provided by law. Violation of this prohibition shall subject the violator to sanctions as provided by general law.

(8) No person shall extract resins from marijuana using dangerous materials or combustible gases without a medical marijuana-infused products manufacturing facility license. Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty and, if applicable, loss of their identification card, certificate, or license for up to one year.

(9) All qualifying patient cultivation shall take place in an enclosed, locked facility that is equipped with security devices that permit access only by the qualifying patient or by such patient's primary caregiver. Two qualifying patients, who both hold valid qualifying patient cultivation identification cards, may share one enclosed, locked facility. No more than twelve qualifying patient or primary caregiver cultivated flowering marijuana plants may be cultivated in a single, enclosed locked facility, except when a primary caregiver also holds a qualifying patient cultivation identification card, in which case no more than eighteen flowering marijuana plants may be cultivated in a single, enclosed, locked facility.

(10) No medical marijuana cultivation facility, medical marijuana dispensary facility, medical marijuana-infused products manufacturing facility, medical marijuana testing facility, or entity with a transportation certification shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the department, not to be unreasonably withheld.

(11) Unless allowed by the local government, no new medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. No local government shall prohibit medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana-infused products manufacturing facility, medical marijuana dispensary facility, or entity holding a transportation certification that may operate in such locality.

(12) Unless superseded by federal law or an amendment to this Constitution, a physician shall not certify a qualifying condition for a patient by any means other than providing a physician certification for the patient, whether handwritten, electronic, or in another commonly used format. A qualifying patient must obtain a new physician certification at least annually.

(13) A physician shall not issue a certification for the medical use of marijuana for a non-emancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. The department shall not issue a qualifying patient identification card on behalf of a non-emancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. Such card shall be issued to one of the parents or guardians and not directly to the patient. Only a parent or guardian may serve as a primary caregiver for a non-emancipated qualifying patient under the age of eighteen. Only the qualifying patient's parent or guardian shall purchase or possess medical marijuana for a non-emancipated qualifying patient under the age of eighteen. A parent or guardian shall supervise the administration of medical marijuana to a non-emancipated qualifying patient under the age of eighteen.

(14) Nothing in this section shall be construed as mandating health insurance coverage of medical marijuana for qualifying patient use.

(15) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for medical use or for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.]

Pursuant to the Ninth and Tenth Amendments to the Constitution of the United States, the people of Missouri hereby repudiate and challenge federal Cannabis prohibitions that conflict with this Act.

[8. Severability.] **8. Existing Local, State and Federal Law.**

[The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.]

All provisions of this section shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

[9. Effective Date.] **9. Implementation.**

[The provisions of this section shall become effective on December 6, 2018.]

The dictates of this Initiative, unless otherwise indicated by this initiative, shall be implemented no later than **January 31st, 2021.**

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article I, Version 2 (2020-068)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on May 29, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

My Commission expires _____.

BE IT RESOLVED BY THE PEOPLE OF THE STATE OF MISSOURI THAT THE CONSITUTION BE AMENDED:

Section 17 of article IV of the Constitution of Missouri is amended by adding Section 17(B). The new section includes the following underlined language:

MISSOURI CONSTITUTION

Section 17(b.) RECALL Elective State Officers

All political power is inherent in the people. Government is instituted for their protection, security, and benefit, and they have the right to alter or reform it when the public good may require. A voter who casts a vote in an election in accordance with the laws of this State shall have that vote counted.

Recall is the power of the electors to remove an elective officer. Recall of a state officer is initiated by delivering to the Secretary of State a petition alleging reason for recall. Sufficiency of reason is not reviewable. Proponents have 160 days to file signed petitions.

A petition to recall a statewide officer must be signed by electors equal in number to 12 percent of the last vote for the office, with signatures from each of 5 counties equal in number to 1 percent of the last vote for the office in the county.

The Secretary of State shall maintain a continuous count of the signatures certified to that office. An election to determine whether to recall an office rand, if appropriate, to elect a successor shall be called by the Governor and held not less than 60 days nor more than 80 days from the date of certification of sufficient signatures.

A recall election may be conducted within 180 days from the date of certification of sufficient signatures in order that the election may be consolidated with the next regularly scheduled election occurring wholly or partially within the same jurisdiction in which the recall election is held, if the number of voters eligible to vote at that next regularly scheduled election equal at least 50 percent of all the voters eligible to vote at the recall election.

If the majority vote on the question is to recall, the officer is removed and, if there is a candidate, the candidate who receives a plurality is the successor. The officer may not be a candidate, nor shall there be any candidacy for an office filled pursuant to subdivision (d) of Section 16 of Article VI.

The Legislature shall provide for circulation, filing, and certification of petitions, nomination of candidates, and the recall election. If recall of the Governor or Secretary of State is initiated, the recall duties of that office shall be performed by the Lieutenant Governor or Controller, respectively. A state officer who is not recalled shall be reimbursed by the State for the officer's recall election expenses legally and personally incurred. Another recall may not be initiated against the officer until six months after the election. The Legislature shall provide for recall of local officers. This section does not affect counties and cities whose charters provide for recall.

RE: Petition approval request from Charles Hurth regarding a proposed constitutional amendment to Article VIII (2020-065)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Charles Hurth on May 13, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the People of the State of Missouri that the Constitution be amended:

Article VIII Section 2. <u>Qualifications of voters- Disqualification</u> is revised by deleting the single word " All" and replacing said word with "Only A" such that the first sentence of said section shall read:

[All] <u>Only A</u> citizen of the United States, including occupants of soldiers' and sailors' homes over the age of eighteen who are residents of this state and of the political subdivision in which they offer to vote are entitled to vote at all elections by the people, if the election is one for which registration is required if they are registered within the time prescribed by law, or if the election is one for which registration is not required, if they have been residents of the political subdivision in which they offer to vote for thirty days next preceding the election for which they offer to vote: Provided however, no person who has guardian of his or her estate or person by reason of mental incapacity, appointed by a Court of competent jurisdiction and no person who is involuntarily confined in a mental institution pursuant to an adjudication of a Court of competent jurisdiction shall be entitled to vote, and persons convicted of felony, or crime connected who the exercise of the right of suffrage may be excluded by law from voting.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends Article XIV Section 1 of the Missouri Constitution by deleting all matters within the enclosed brackets and adding all of the underlined matters as required pursuant to Section 116.050 RSMo.

Section 1. [Right to Access medical marijuana] **Missouri Cannabis Restoration and Protection** [– 1. Purposes.]

1. Clarification as a substance.

[This section is intended to permit state-licensed physicians to recommend marijuana for medical purposes to patients with serious illnesses and medical conditions. The section allows patients with qualifying medical conditions the right to discuss freely with their physicians the possible benefits of medical marijuana use, the right of their physicians to provide professional advice concerning the same, and the right to use medical marijuana for treatment under the supervision of a physician.

This section is intended to make only those changes to Missouri laws that are necessary to protect patients, their primary caregivers, and their physicians from civil and criminal penalties, and to allow for the limited legal production, distribution, sale and purchase of marijuana for medical use. This section is not intended to change current civil and criminal laws governing the use of marijuana for non medical purposes. The section does not allow for the public use of marijuana and driving under the influence of marijuana.]

Cannabis shall immediately be removed from the Missouri Revised Statutes list of controlled substances and shall no longer be listed among Missouri's drug schedules. Cannabis shall no longer be considered a controlled substance or a drug, hence forth by Missouri law, by the passage of this initiative.

2. Definitions.

[(1) "Administer" means the direct application of marijuana to a qualifying patient by way of any of the following methods:

(a) Ingestion of capsules, teas, oils, and other marijuana-infused products;

(b) Vaporization or smoking of dried flowers, buds, plant material, extracts, or oils;

(c) Application of ointments or balms;

(d) Transdermal patches and suppositories;

(e) Consuming marijuana-infused food products; or

(f) Any other method recommended by a qualifying patient's physician.

(2) "Department" means the Department of Health and Senior services, or its successor agency.

(3) "Entity" means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(4) "Flowering plant" means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(5) "Marijuana" or "marihuana" means *Cannabis indica, Cannabis sativa, and Cannabis ruderalis,* hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana, as well as resin extracted from the plant and marijuana-infused products. "marijuana" or "Marihuana" do not include industrial hemp containing a crop-wide average tetrahydrocannabinol concentration that does not exceed three-tenths of one percent on a dry weight basis, or commodities or products manufactured from industrial hemp.

(6) "Marijuana-infused products" means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(7) "Medical marijuana cultivation facility" means a facility licensed by the department, to acquire, cultivate, process, store, transport, and sell marijuana to a medical marijuana dispensary facility, medical marijuana testing facility, or to a medical marijuana-infused products manufacturing facility.

(8) "Medical marijuana dispensary facility" means a facility licensed by the department, to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and drug paraphernalia used to administer marijuana as provided for in this section to a qualifying patient, a primary caregiver, another medical marijuana dispensary facility, a medical marijuana testing facility, or a medical marijuana-infused products manufacturing facility.

(9) "Medical marijuana-infused products manufacturing facility" means a facility licensed by the department, to acquire, store, manufacture, transport, and sell marijuana-infused products to a medical marijuana dispensary facility, a medical marijuana testing facility, or to another medical marijuana-infused products manufacturing facility.

(10) "Medical marijuana testing facility" means a facility certified by the department, to acquire, test, certify, and transport marijuana.

(11) "Medical use" means the production, possession, delivery, distribution, transportation, or administration of marijuana or a marijuana-infused product, or drug paraphernalia used to administer marijuana or a marijuana-infused product, for the benefit of a qualifying patient to mitigate the symptoms or effects of the patient's qualifying medical condition.

(12) "Physician" means an individual who is licensed and in good standing to practice medicine or osteopathy under Missouri law.

(13) "Physician certification" means a document, whether handwritten, electronic or in another commonly used format, signed by a physician and stating that, in the physician's professional opinion, the patient suffers from a qualifying medical condition.

(14) "Primary caregiver" means an individual twenty-one years of age or older who has significant responsibility for managing the well-being of a qualifying patient and who is designated as such on the primary caregiver's application for an identification card under this section or in other written notification to the department.

(15) "Qualifying medical condition" means the condition of, symptoms related to, or side-effects from the treatment of:

(a) Cancer;

(b) Epilepsy;

(c) Glaucoma;

(d) Intractable migraines unresponsive to other treatment;

(e) A chronic medical condition that causes severe, persistent pain or persistent muscle spasms, including but not limited to those associated with multiple sclerosis, seizures, Parkinson's disease, and Tourette's syndrome;

(f) Debilitating psychiatric disorders, including, but not limited to, post-traumatic stress disorder, if diagnosed by a state licensed psychiatrist;

(g) Human immunodeficiency virus or acquired immune deficiency syndrome;

(h) A chronic medical condition that is normally treated with a prescription medication that could lead to physical or psychological dependence, when a physician determines that medical use of marijuana could be effective in treating that condition and would serve as a safer alternative to the prescription medication;

(i) Any terminal illness; or

In the professional judgment of a physician, any other chronic, debilitating or other medical condition, including, but not limited to, hepatitis C, amyotrophic lateral sclerosis, inflammatory bowel disease, Crohn's disease, Huntington's disease, autism, neuropathies, sickle cell anemia, agitation of Alzheimer's disease, cachexia, and wasting syndrome.

(16) "Qualifying patient" means a Missouri resident diagnosed with at least one qualifying medical condition.]

(a) "Controlled Substance List", or "CSL" refers to Missouri's list of controlled substances as pertains to Missouri Statutes.
(b) "Cannabis" and "Cannabis hemp" refer to the Cannabis, marihuana, marijuana, Cannabis sativa, Cannabis sativa L., Cannabis Americana, Cannabis Gigantea, Cannabis indica, Cannabis ruderalis, or any variety of Cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
(c) "Medical Cannabis" refers to Cannabis used to prevent or to treat a medical condition.
(d) "Personal use" refers to the personal use or consumption of Cannabis.
(e) "Cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing Cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing Cannabis into and/or onto the human body.
(f) "Establishment" refers to a Cannabis cultivation facility, a Cannabis testing facility, a Cannabis product manufacturing facility, or a retail store, Cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells Cannabis, Cannabis products and/or Cannabis accessories.

3. [Creating patient Access to medical marijuana.] **Personal and Commercial.**

[(1) In carrying out the implementation of this section, the department shall have the authority to:

(a) Grant or refuse state licenses and certifications for the cultivation, manufacture, dispensing, sale, testing, tracking, and transportation of marijuana for medical use as provided by law; suspend, fine, restrict, or revoke such licenses and certifications upon a violation of this section or a rule promulgated pursuant to this section; and impose any administrative penalty authorized by this section or any rule promulgated pursuant to this section.

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana for medical use and for the enforcement of this section so long as patient access is not restricted unreasonably and such rules are reasonably necessary for patient safety or to restrict access to only licensees and qualifying patients.

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section;

(d) Require a seed-to-sale tracking system that tracks medical marijuana from either the seed or immature plant stage until the medical marijuana or medical marijuana-infused product is sold to a qualifying patient or primary caregiver to ensure that no medical marijuana grown by a medical marijuana cultivation facility or manufactured by a medical marijuana-infused products manufacturing facility is sold or otherwise transferred except by a medical marijuana dispensary facility. The department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees.

(e) Issue standards for the secure transportation of marijuana and marijuana-infused products. The department shall certify entities which demonstrate compliance with its transportation standards to transport marijuana and marijuana-infused products to a medical marijuana cultivation facility, a medical marijuana-infused products manufacturing facility, a medical marijuana dispensary facility, a medical marijuana testing facility, or another entity with a transportation certification. The department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport cannabis.

(f) The department may charge a fee not to exceed $5,000 for any certification issued pursuant to this section.

(g) Prepare and transmit annually a publicly available report accounting to the Governor for the efficient discharge of all responsibilities assigned to the department under this section;

(h) Establish a system to numerically score competing medical marijuana licensee and certificate applicants, only in cases where more applicants apply than the minimum number of licenses or certificates as calculated by this section, which scoring shall be limited to an analysis of the following:

(i) the character, veracity, background, qualifications, and relevant experience of principal officers or managers;

(ii) the business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, plans to ensure safety and security of qualifying patients and the community, procedures to be used to prevent diversion, and any plan for making marijuana available to low-income qualifying patients;

(iii) site security;

(iv) experience in a legal cannabis market;

(v) in the case of medical marijuana testing facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and/or potency and health care industry experience;

(vi) the potential for positive economic impact in the site community;

(vii) in the case of medical marijuana cultivation facilities, capacity or experience with agriculture, horticulture, and health care;

(viii) in the case of medical marijuana dispensary facilities, capacity or experience with health care, the suitability of the proposed location, and its accessibility for patients;

(ix) in the case of medical marijuana-infused products manufacturing facilities, capacity or experience with food and beverage manufacturing; and

(x) maintaining competitiveness in the marijuana for medical use marketplace.

In ranking applicants and awarding licenses and certificates, the department may consult or contract with other public agencies with relevant expertise regarding these factors. The department shall lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana for medical use by qualifying patients.

(2) The department shall issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana for medical use by qualifying patients. In developing such rules or emergency rules, the department may consult with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the department may issue rules or emergency rues relating to the following subjects:

(a) Compliance with, enforcement of, or violation of any provision of this section or any rule issued pursuant to this section, including procedures and grounds for denying, suspending, fining, restricting, or revoking a state license or certification issued pursuant to this section;

(b) Specifications of duties of officers and employees of the department;

(c) Instructions or guidance for local authorities and law enforcement officers;

(d) Requirements for inspections, investigations, searches, seizures, and such additional enforcement activities as may become necessary from time to time;

(e) Creation of a range of administrative penalties for use by the department;

(f) Prohibition of misrepresentation and unfair practices;

(g) Control of informational and product displays on licensed premises provided that the rules may not prevent or unreasonably restrict appropriate signs on the property of the medical marijuana dispensary facility, product display and examination by the qualifying patient and/or primary caregiver, listings in business directories including phone books, listings in marijuana-related or medical publications, or the sponsorship of health or not for profit charity or advocacy events;

(h) Development of individual identification cards for owners, officers, managers, contractors, employees, and other support staff of entities licensed or certified pursuant to this section, including a fingerprint based-federal and state criminal record check in accordance with U.S. Public Law 92-544, or its successor provisions, as may be required by the department prior to issuing a card and procedures to ensure that cards for new applicants are issued within fourteen days. Applicants licensed pursuant to this section shall submit fingerprints to the Missouri state highway patrol for the purpose of conducting a state and federal fingerprint-based criminal background check. The Missouri state highway patrol, if necessary, shall forward the fingerprints to the Federal Bureau of Investigation (FBI) for the purpose of conducting a fingerprint-based criminal background check. Fingerprints shall be submitted pursuant to 43.543 and fees shall be paid pursuant to 43.530;

(i) Security requirements for any premises licensed or certified pursuant to this section, including, at a minimum, lighting, physical security, video, alarm requirements, and other minimum procedures for internal control as deemed necessary by the department to properly administer and enforce the provisions of this section, including reporting requirements for changes, alterations, or modifications to the premises;

(j) Regulation of the storage of, warehouses for, and transportation of marijuana for medical use;

(k) Sanitary requirements for, including, but not limited to, the preparation of medical marijuana-infused products;

(l) The specification of acceptable forms of picture identification that a medical marijuana dispensary facility may accept when verifying a sale;

(m) Labeling and packaging standards;

(n) Records to be kept by licensees and the required availability of the records;

(o) State licensing procedures, including procedures for renewals, reinstatements, initial licenses, and the payment of licensing fees;

(p) The reporting and transmittal of tax payments;

(q) Authorization for the department of revenue to have access to licensing information to ensure tax payment and the effective administration of this section; and

(r) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(3) The department shall issue rules or emergency rules for a medical marijuana and medical marijuana-infused products independent testing and certification program for medical marijuana licensees and requiring licensees to test medical marijuana using one or more impartial, independent laboratories to ensure, at a minimum, that products sold for human consumption do not contain contaminants that are injurious to health, to ensure correct labeling and measure potency. The department shall not require any medical marijuana or medical marijuana-infused products to be tested more than once prior to sale.

(4) The department shall issue rules or emergency rules to provide for the certification of and standards for medical marijuana testing facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The department shall certify, if possible, at least two entities as medical marijuana testing facilities. No medical marijuana testing facility shall be owned by an entity under substantially common control, ownership, or management as a medical marijuana cultivation facility, medical marijuana-infused product manufacturing facility, or medical marijuana dispensary facility.

(5) The department shall maintain the confidentiality of reports or other information obtained from an applicant or licensee containing any individualized data, information, or records related to the licensee or its operation, including sales information, financial records, tax returns, credit reports, cultivation information, testing results, and security information and plans, or revealing any patient information, or any other records that are exempt from public inspection pursuant to state or federal law. Such reports or other information may be used only for a purpose authorized by this section. Any information released related to patients may be used only for a purpose authorized by federal law and this section, including verifying that a person who presented a patient identification card to a state or local law enforcement official is lawfully in possession of such card.

(6) Within one hundred eighty days of December 6, 2018, the department shall make available to the public license application forms and application instructions for medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana dispensary facilities, and medical marijuana-infused products manufacturing facilities.

(7) Within one hundred eighty days of December 6, 2018, the department shall make available to the public application forms and application instructions for qualifying patient, qualifying patient cultivation, and primary caregiver identification cards. Within two hundred ten days of December 6, 2018, the department shall begin accepting applications for such identification cards.

(8) An entity may apply to the department for and obtain one or more licenses to grow marijuana as a medical marijuana cultivation facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the department to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of ten thousand dollars per license application or renewal for all applicants filing an application within three years of December 6, 2018 and shall charge each applicant a non-refundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana cultivation facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(9) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana dispensary facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018 and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten

thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than five medical marijuana dispensary facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(10) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana-infused products manufacturing facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018 and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana-infused products manufacturing facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(11) Any applicant for a license authorized by this section may pre-file their application fee with the department beginning 30 days after December 6, 2018.

(12) Except for good cause, a qualifying patient or his or her primary caregiver may obtain an identification card from the department to cultivate up to six flowering marijuana plants for the exclusive use of that qualifying patient. The card shall be valid for twelve months from its date of issuance and shall be renewable with the annual submittal of a new or updated physician's certification. The department shall charge an annual fee for the card of one hundred dollars, with such rate to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency.

(13) The department may set a limit on the amount of marijuana that may be purchased by or on behalf of a single qualifying patient in a thirty day period, provided that limit is not less than four ounces of dried, unprocessed marijuana, or its equivalent. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons why the qualifying patient needs a greater amount than the limit established by the department.

(14) The department may set a limit on the amount of marijuana that may be possessed by or on behalf of each qualifying patient, provided that limit is not less than a sixty day supply of dried, unprocessed marijuana, or its equivalent. A primary caregiver may possess a separate legal limit for each qualifying patient under their care and a separate legal limit for themselves if they are a qualifying patient.
qualifying patients cultivating marijuana for medical use may possess up to a ninety day supply, as long as the supply remains on property under their control. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons for additional amounts. Possession of between the legal limit and up to twice the legal limit shall subject the possessor to department sanctions, including an administrative penalty and loss of their patient identification card for up to a year. Purposefully possessing amounts in excess of twice the legal limit shall be punishable by imprisonment of up to one year and a fine of up to two thousand dollars.

(15) The department may restrict the aggregate number of licenses granted for medical marijuana cultivation facilities, provided, however, that the number may not be limited to fewer than one license per every one hundred thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(16) The department may restrict the aggregate number of licenses granted for marijuana-infused products manufacturing facilities, provided, however, that the number may not be limited to fewer than one license per every seventy thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(17) The department may restrict the aggregate number of licenses granted for medical marijuana dispensary facilities, provided, however, that the number may not be limited to fewer than twenty-four licenses in each United States Congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on December 6, 2018. Future changes to the boundaries of or the number of congressional districts shall have no impact.

(18) The department shall begin accepting license and certification applications for medical marijuana dispensary facilities, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than two hundred forty days after December 6, 2018. Applications for licenses and certifications under this section shall be approved or denied by the department no later than one hundred fifty days after their submission. If the department fails to carry out its non-discretionary duty to approve or deny an application within one hundred fifty days of submission, an applicant may immediately seek a court order compelling the department to approve or deny the application.

(19) Qualifying patients under this section shall obtain and annually renew an identification card or cards from the department. The department shall charge a fee of twenty-five dollars per year per card with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor or its successor agency. Upon receiving an application for a qualifying patient identification card or qualifying patient cultivation identification card, the department shall, within thirty days, either issue the card or provide a written explanation for its denial. If the department fails to deny and fails to issue a card to an eligible qualifying patient within thirty days, then their physician certification shall serve as their qualifying patient identification card or qualifying patient cultivation identification card for up to one year from the date of physician certification. All initial applications for or renewals of a qualifying patient identification card or qualifying patient cultivation identification card shall be accompanied by a physician certification that is less than thirty days old.

(20) primary caregivers under this section shall obtain and annually renew an identification card from the department. The department shall charge a fee of twenty five dollars per year, with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. Upon receiving an application for a primary caregiver identification card the department shall, within thirty days, either issue the card or provide a written explanation for its denial.

(21) All marijuana for medical use sold in Missouri shall be cultivated in a licensed medical marijuana cultivation facility located in Missouri.

(22) All marijuana-infused products for medical use sold in the state of Missouri shall be manufactured in a medical marijuana-infused products manufacturing facility.

(23) The denial of a license, license renewal, or identification card by the department shall be appealable to the administrative hearing commission, or its successor entity. Following the exhaustion of administrative review, denial of a license, license renewal, or identification card by the department shall be subject to judicial review as provided by law.

(24) No elected official shall interfere directly or indirectly with the department's obligations and activities under this section.

(25) The department shall not have the authority to apply or enforce any rule or regulation that would impose an undue burden on any one or more licensees or certificate holders, any qualifying patients, or act to undermine the purposes of this section.]

The following acts are not unlawful and shall not be an offense under Missouri law:
(a) Possession of Cannabis for personal or medical use.
(b) Cultivating Cannabis for personal or medical use.
(c) Cultivation, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing Cannabis, Cannabis accessories, and Cannabis products for commercial purposes, provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivating, harvesting, processing, manufacturing, packaging, distribution, transferal, display or possession of any non-toxic food or food product.
(d) Providing Cannabis, Cannabis accessories, and Cannabis products for sale to consumers.
(e) Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs (a) through (d) of this subsection.
(f) No one shall be denied housing solely based on their use of Cannabis.
(g) No one shall be denied employment solely based on their use of Cannabis.
(h) The use and/or possession of Cannabis shall in no way impede one's legal right to possess a firearm.

4. [Taxation and Reporting.] **Medical.**

[(1) A tax is levied upon the retail sale of marijuana for medical use sold at medical marijuana dispensary facilities within the state. The tax shall be at a rate of four percent of the retail price. The tax shall be collected by each licensed medical marijuana dispensary facility and paid to the department of revenue. After retaining no more than five percent for its actual collection costs, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the Missouri veterans' health and care fund. Licensed entities making retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Missouri veterans' Health and Care Fund," which shall consist of taxes and fees collected under this section. The State Treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall stand appropriated without further legislative action as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section:

(b) Next, the remainder of such funds shall be transferred to the Missouri veterans commission for health and care services for military veterans, including the following purposes: operations, maintenance and capital improvements of the Missouri veterans homes, the Missouri service officer's Program, and other services for veterans approved by the commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness. The Missouri veterans commission shall contract with other public agencies for the delivery of services beyond its expertise.

(c) All monies from the taxes authorized under this subsection shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana for medical use, a record shall be kept by the seller which identifies, by secure and encrypted patient number issued by the seller to the qualifying patient involved in the sale, all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the Department of Revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from, and in addition to, any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana for medical use.

(6) The fees and taxes provided for in this Article XVI, Section 1 shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

(7) The unexpended balance existing in the fund shall be exempt from the provisions of section 33.080 relating to the transfer of unexpended balances to the general revenue fund.]

Medical Cannabis shall be available to patients without taxation who have a physician's recommendation for its use.
(a) All patients engaged in Cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means, whether or not under the care of a physician.
(b) Licensed physicians shall not be penalized for, nor restricted from recommending and/or providing Cannabis for medical purposes to any person under their care.
(c) Veterinarians shall not be penalized nor restricted from recommending and/or providing Cannabis for medical purposes for any creature under their care.
(d) Any individual who is a Cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri Cannabis patient.
(e) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of Cannabis.

5. [Additional patient, Physician, Caregiver and Provider Protections.] **Zoning.**

[(1) Except as provided in this section, the possession of marijuana in quantities less than the limits of this section, or established by the department, and transportation of marijuana from a medical marijuana dispensary facility to the qualifying patient's residence shall not subject the possessor to arrest, criminal or civil liability, or sanctions under Missouri law, provided that the possessor produces on demand to the appropriate authority a valid qualifying patient identification card: a valid qualifying patient cultivation identification card; a valid physician certification while making application for an identification card: or a valid primary caregiver identification card. Production of the respective equivalent identification card or authorization issued by another state or political subdivision of another state shall also meet the requirements of this subdivision.

(2) No patient shall be denied access to or priority for an organ transplant because they hold a qualifying patient identification card or use marijuana for medical use.

(3) A physician shall not be subject to criminal or civil liability or sanctions under Missouri law or discipline by the Missouri State Board of Registration for the Healing Arts, or its successor agency, for owning, operating, investing in, being employed by, or contracting with any entity

licensed or certified pursuant to this section or issuing a physician certification to a patient diagnosed with a qualifying medical condition in a manner consistent with this section and legal standards of professional conduct.

(4) A health care provider shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or providing health care services that involve the medical use of marijuana consistent with this section and legal standards of professional conduct.

(5) A medical marijuana testing facility shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to the medical use of marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(6) A health care provider shall not be subject to mandatory reporting requirements for the medical use of marijuana by non-emancipated qualifying patients under eighteen years of age in a manner consistent with this section and with consent of a parent or guardian.

(7) A primary caregiver shall not be subject to criminal or civil liability or sanctions under Missouri law for purchasing, transporting, or administering marijuana for medical use to a qualifying patient or participating in the patient cultivation of up to six flowering marijuana plants per patient in a manner consistent with this section and generally established legal standards of personal or professional conduct.

(8) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to prospective or licensed medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana dispensary facilities, medical marijuana-infused products manufacturing facilities, qualifying patients, primary caregivers, physicians, health care providers or others related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(9) Actions and conduct by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana infused products manufacturing facilities, or medical marijuana dispensary facilities licensed or registered with the department, or their employees or agents, as permitted by this section and in compliance with department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(10) Nothing in this section shall provide immunity for negligence, either common law or statutorily created, nor criminal immunities for operating a vehicle, aircraft, dangerous device, or navigating a boat under the influence of marijuana.

(11) It is the public policy of the state of Missouri that contracts related to marijuana for medical use that are entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities and those who allow property to be used by those entities, should be enforceable. It is the public policy of the state of Missouri that no contract entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to medical marijuana may be prohibited by federal law.]

Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

6. [Legislation.] Law Enforcement and the Courts.

[Nothing in this section shall limit the General Assembly from enacting laws consistent with this section, or otherwise effectuating the patient rights of this section. The legislature shall not enact laws that hinder the right of qualifying patients to access marijuana for medical use as granted by this section.]

Missouri's law enforcement and its courts shall protect Cannabis users and their property without discrimination, and with every bit the effort afforded to every citizen of Missouri and our nation.
(a) The use and/or possession of Cannabis shall not be grounds for issuing a "Driving under the influence" (DUI) stop, charge, arrest or fine(s) when operating or a passenger of a motor vehicle. Stops, charges, fines and arrests shall be the product of visible and/or previously proven non-Cannabis infractions of Missouri law.
(b) No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal Cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.
(c) Asset or Civil Forfeiture shall no longer be used in the state of Missouri through association with Cannabis, Cannabis cultivation, it's use and/or possession, in any way.
(d) Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, Cannabis-only offenses, which are no longer illegal in the State of Missouri under this Act, shall be immediately released.
(e) Within 60 days of the passage of this Act, a legal document shall be developed and made available to the public ordering the immediate destruction of all Cannabis-related non-violent civil and criminal records in Missouri and for any offense covered by this amendment which is no longer illegal in the State of Missouri under this Act. This document shall be distributed to all pertinent parties throughout the state.
(f) Within 60 days, Missouri's Courts shall order the immediate expungement of civil and criminal records pertaining to all non-violent Cannabis only offenses which are no longer illegal in the State of Missouri under this Act.

7. [Additional Provisions.] Regarding Federal Law.

[(1) Nothing in this section permits a person to:

(a) Consume marijuana for medical use in a jail or correctional facility;

(b) Undertake any task under the influence of marijuana when doing so would constitute negligence or professional malpractice; or

(c) Operate, navigate, or be in actual physical control of any dangerous device or motor vehicle, aircraft or motorboat while under the influence of marijuana: or

(d) Bring a claim against any employer, former employer, or prospective employer for wrongful discharge, discrimination, or any similar cause of action or remedy, based on the employer, former employer, or prospective employer prohibiting the employee, former employee, or prospective employee from being under the influence of marijuana while at work or disciplining the employee or former employee, up to and including termination from employment, for working or attempting to work while under the influence of marijuana.

(2) No medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility, or entity with a transportation certification shall be owned, in whole or in part, or have as an officer, director, board member, manager, or employee, any individual with a disqualifying felony offense. A "disqualifying felony offense" is a violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the department determines that:

(a) The person's conviction was for the medical use of marijuana or assisting in the medical use of marijuana; or

(b) The person's conviction was for a non-violent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The department may consult with and rely on the records, advice and recommendations of the Attorney General and the Department of Public Safety, or their successor entities, in applying this subdivision.

(3) All medical marijuana cultivation facility, medical marijuana dispensary facility, and medical marijuana-infused products manufacturing facility licenses, entities with medical marijuana testing facility certifications, and entities with transportation certifications shall be held by entities that are majority owned by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, entities outside the state of Missouri may own a minority stake in such entities.

(4) No medical marijuana cultivation facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall manufacture, package or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between a marijuana or marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional department sanction, up to and including loss of license.

(5) All edible marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with dosage amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled, in a font size at least as large as the largest other font size used on the package, as containing "Marijuana," or a " Marijuana-Infused Product." Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty.

(6) No individual shall serve as the primary caregiver for more than three qualifying patients.

(7) No qualifying patient shall consume marijuana for medical use in a public place, unless provided by law. Violation of this prohibition shall subject the violator to sanctions as provided by general law.

(8) No person shall extract resins from marijuana using dangerous materials or combustible gases without a medical marijuana-infused products manufacturing facility license. Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty and, if applicable, loss of their identification card, certificate, or license for up to one year.

(9) All qualifying patient cultivation shall take place in an enclosed, locked facility that is equipped with security devices that permit access only by the qualifying patient or by such patients primary caregiver. Two qualifying patients, who both hold valid qualifying patient cultivation identification cards, may share one enclosed, locked facility. No more than twelve qualifying patient or primary caregiver cultivated flowering marijuana plants may be cultivated in a single, enclosed locked facility, except when a primary caregiver also holds a qualifying patient cultivation identification card, in which case no more than eighteen flowering marijuana plants may be cultivated in a single, enclosed, locked facility.

(10) No medical marijuana cultivation facility, medical marijuana dispensary facility, medical marijuana-infused products manufacturing facility, medical marijuana testing facility, or entity with a transportation certification shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the department, not to be unreasonably withheld.

(11) Unless allowed by the local government, no new medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. No local government shall prohibit medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana infused products manufacturing facilities, or medical marijuana dispensary facilities, or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana-infused products manufacturing facility, medical marijuana dispensary facility, or entity holding a transportation certification that may operate in such locality.

(12) Unless superseded by federal law or an amendment to this Constitution, a physician shall not certify a qualifying condition for a patient by any means other than providing a physician certification for the patient, whether handwritten, electronic, or in another commonly used format. A qualifying patient must obtain a new physician certification at least annually.

(13) A physician shall not issue a certification for the medical use of marijuana for a non-emancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. The department shall not issue a qualifying patient identification card on behalf of a non-emancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. Such card shall be issued to one of the parents or guardians and not directly to the patient. Only a parent or guardian may serve as a primary caregiver for a non-emancipated qualifying patient under the age of eighteen. Only the qualifying patient's parent or guardian shall purchase or possess medical marijuana for a non-emancipated qualifying patient under the age of eighteen. A parent or guardian shall supervise the administration of medical marijuana to a non-emancipated qualifying patient under the age of eighteen.

(14) Nothing in this section shall be construed as mandating health insurance coverage of medical marijuana for qualifying patient use.

(15) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for medical use or for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.]

Pursuant to the Ninth and Tenth Amendments to the Constitution of the United States, the people of Missouri hereby repudiate and challenge federal Cannabis prohibitions that conflict with this Act.

8. [Severability.] **Existing Local, State and Federal Law.**

[The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.]

All provisions of this section shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

9. [Effective Date.] **Implementation.**

[The provisions of this section shall become effective on December 6, 2018.]

The dictates of this Initiative, unless otherwise indicated by this initiative, shall be implemented no later than **January 31st, 2021.**

Jefferson City, MO 65101

RE: Petition approval request from Heidi Miller regarding a proposed constitutional amendment to Article IV (2020-063)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Heidi Miller on May 2, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the State of Missouri that the Constitution be amended:

Article IV of the Constitution is revised by adding one new section to be known as Article IV, Section 36(c) to read as follows:

Section 36(c). 1. Notwithstanding any provision of law to the contrary, beginning July 1, 2021, individuals nineteen years of age or older and under sixty-five years of age who qualify for MO HealthNet services under 42 U.S.C. Section 1396a(a)(10)(A)(i)(VIII) and as set forth in 42 C.F.R. 435.119, and who have income at or below one hundred thirty-three percent of the federal poverty level plus five percent of the applicable family size as determined under 42 U.S.C. Section 1396a(e)(14) and as set forth in 42 C.F.R. 435.603, shall be eligible for medical assistance under MO HealthNet and shall receive coverage for the health benefits service package.

2. For purposes of this section, "health benefits service package" shall mean benefits covered by the MO HealthNet program as determined by the department of social services to meet the benchmark or benchmark-equivalent coverage requirement under 42 U.S.C. Section 1396a(k)(1) and any implementing regulations.

3. No later than March 1, 2021, the Department of Social Services and the MO HealthNet Division shall submit all state plan amendments necessary to implement this section to the United States Department of Health and Human Services, Centers for Medicare and Medicaid Services.

4. The Department of Social Services and the MO HealthNet Division shall take all actions necessary to maximize federal financial participation in funding medical assistance pursuant to this section.

5. No greater or additional burdens or restrictions on eligibility or enrollment standards, methodologies, or practices shall be imposed on persons eligible for MO HealthNet services pursuant to this section than on any other population eligible for medical assistance.

6. All references to federal or state statutes, regulations or rules in this section shall be to the version of those statutes, regulations or rules that existed on January 1, 2019.

MISSOURI STATE AUDITOR'S OFFICE

Subject

Initiative petition from Heidi Miller regarding a proposed constitutional amendment to Article IV. (Received May 3, 2019)

Date

May 23, 2019

Description

This proposal would amend Article IV of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Heidi Miller, MD, **Timothy McBride, PhD**, and **Abigail Barker, PhD** provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated they report no fiscal impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated they defer to the Department of Social Services to calculate the fiscal impact of the proposed legislation.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated they defer to the Department of Social Services for an estimate of fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Department of Social Services.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will have no impact to their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated this initiative petition will impact the budgets of the Department of Social Services, Department of Mental Health, the Department of Corrections, and the Department of Health & Senior Services by proposing the expansion of Medicaid eligibility.

Article IV, Section 36(c):

- Today, Missouri covers custodial parents below 19% of the federal poverty level (FPL), which for a family of four is currently $4,769 per year. In addition, non-custodial adults and childless adults without other qualifying criteria are not currently eligible for Medicaid in Missouri regardless of income.

- The Affordable Care Act allows states to expand health care coverage under the Medicaid program to non-elderly, non-Medicare, low-income adults up to 133% of the FPL. The same law includes a 5% disregard of income when determining eligibility for health care benefits; thus, adults with incomes up to 138% FPL will qualify. For a family of four in Missouri, this is currently income up to $34,638 per year.

- The Family Support Division estimates a need of an additional 56 Eligibility Specialists, 6 Eligibility Supervisors, and 1 Social Services Manager to assist in enrolling new participants. The estimated cost for the new full time employees (FTEs) is $4.6 million.

- The Family Support Division estimates increased costs for the call center for eligibility questions is $9.1 million.

- MO HealthNet would need to contract with an actuary to provide actuarially sound managed care rates. MO HealthNet estimates this cost to be approximately $500,000 based on the previous scope for expansion.

- MO HealthNet estimates a need of an additional 15 Correspondence and Info Specialists, 18 Medicaid Specialists, 15 MASII, and 2 Social Services Managers to provide call center and customer service support, tracking, and reporting claims data. The estimated cost for the new FTEs is $4.1 million.

- MO HealthNet estimates changes to the Medicaid Management Information System (MMIS) would be in excess of $5 million.

- OA-ITSD estimates costs for system changes related to Medicaid Expansion to be approximately $657,000 for the first year, and $289,000 for the second year.

- The expansion of eligibility for Medicaid benefits under the proposed federal program could potentially include coverage for an estimated 250,000 additional Missourians. The costs for this expansion would be in excess of $2 billion per year. The expansion population state match would be at least 10%; however, that match is subject to change as federal law is amended. Depending on implementation requirements from CMS, there could be some costs shifted from state funds to federal funds; however, the cost of implementing this proposal will result in a significant cost in state general revenue. The overall estimated general revenue cost for implementation of this proposal is estimated to exceed $200 million.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition would not have a fiscal impact on their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated they are deferring to the Department of Social Services for the fiscal impact of this initiative petition.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions

certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from the **City of Kansas City** indicated this amendment will have a positive fiscal impact on their city, in an indeterminate amount, because it will increase the benefits people receive thus freeing up their city's health levy dollars for other uses.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

Heidi Miller, MD, **Timothy McBride, PhD**, and **Abigail Barker, PhD** provided the following information:

Sent to *moaudit@auditor.mo.gov*

Ms. Galloway,

On May 2, I submitted a constitutional amendment (2020-063) to expand access to health care for more than 300,000 Missourians. I understand that in the process of certifying this initiative for signature collection, your office will provide a fiscal note and fiscal note summary. To aid in this process, I'd like to share the attached document "Analysis of the Fiscal Impact of Medicaid Expansion in Missouri," which was funded by the Missouri Foundation for Health and produced by the Center for Health Economics and Policy at Washington University in St. Louis. I am also including a memo that was requested by your office as part of the process to develop the fiscal note for 2020-053.

To complete this analysis, Center researchers conducted reviews of other states' experiences, including reports at the national level by the Urban Institute, Robert Wood Johnson Foundation, the Commonwealth Fund, and the Centers for Medicare and Medicaid Services. They relied upon published Missouri Medicaid enrollment and cost data as well as a prior fiscal analysis of Medicaid expansion conducted by the Department of Social Services, and the Office of Administration in the Governor's Office, in 2014. They also carried out independent analyses of American Community Survey data and Medical Expenditure Panel Survey data.

Drawing upon these data sources and making conservative assumptions at every step, the report concludes that Medicaid expansion in Missouri is cost neutral and could create cost savings. **The best-estimate is that Medicaid expansion in Missouri will reduce the state's 2020 financial obligation by $39 million.**

If you or a member of your staff would like to meet and discuss this analysis further, I am happy to connect you with Timothy McBride PhD and Abigail Barker PhD who authored the report. Thank you for your service to Missourians and the opportunity to share this analysis to inform the fiscal note process.

Sincerely,

Heidi Miller, MD

EXECUTIVE SUMMARY

Analysis of the Fiscal Impact of Medicaid Expansion in Missouri

February 2019

Introduction

Although the Affordable Care Act (ACA) of 2010 directed the expansion of Medicaid to cover all adults with incomes up to 138% of the Federal Poverty Level (FPL), a subsequent Supreme Court ruling in 2012 made this expansion optional. Thus far, 37 states have expanded their programs. This analysis estimates the impact of an expansion of Medicaid in Missouri on the state budget. The full report outlines the important background, sources of data, methods, and assumptions used to generate these estimates. The "best estimate" of the impact on the state budget is presented, along with some sensitivity analysis to show the impact of crucial assumptions on the estimate. There are about 18-20 assumptions made in creating this analysis for 2020, but several of them are quite minor, and most of them have very little impact on the state's overall financial obligation. The most influential assumptions are highlighted and discussed in the full report.

Results for 2020

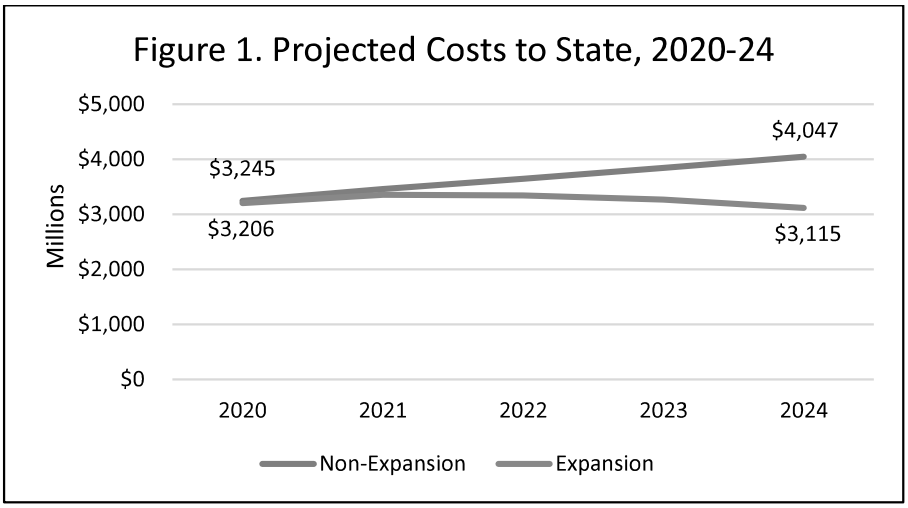
Using the best available data we estimate that about 231,000 adults would take up Medicaid in 2020 (out of a total eligible of about 315,000) and be part of the expansion population. In addition, about 40,500 children in families with income below 138% of the FPL would be added to the Medicaid population in 2020. This brings the total estimate of the population that could be enrolled in an expansion to 271,500. Assuming a 4.5% annual growth rate in projecting FY2017 values to FY2020, and assuming that DSH cuts occur as currently specified in federal law, **we find that a Medicaid expansion in Missouri is approximately revenue neutral and could create cost savings**. This analysis finds that the total state obligation (general revenue plus other sources, excluding provider tax revenues) in 2020 is about $3.245 billion in the absence of expansion and $3.206 billion in the presence of an expansion, for **a savings of about $39 million**.

Key Assumptions	**Lower Bound**	**Best Estimate**	**Upper Bound**
Total New Adult Eligible Population	270,000	315,000	360,000
Average Take-up Rate	68%	73%	78%
New Enrollee Cost, PMPM	$350	$425	$525
% Never-Dual Who Forgo P&TD Pathway	40%	30%	20%
Key Findings			
State Obligation with Expansion	$3,150.4M	**$3,206.1M**	$3,287.3M
State Obligation without Expansion	$3,245.0M	$3,245.0M	$3,245.0M
Net Change	**-$94.6M**	**-$38.9M**	**+$42.3M**

In addition to our estimate, the table shows two additional estimates based on changes in the key assumptions. These estimates should be viewed as lower and upper bounds for the actual value, as many assumptions must be set at the extreme end of their likely ranges in order to obtain these values. **The most likely result, if assumptions vary moderately in either direction from our choices, is a value that is plus or minus $30 million of the best estimate.**

Projections, 2020-24

The last piece of the analysis is to extend these projections to 2024. As mentioned previously, we expect a cumulative effect to occur due to attrition from the permanently and totally disabled Medicaid category. Due to the significant savings expected from this population, by 2023 our projection shows the state's obligation actually declining compared to 2020. Thus, Figure 1 shows that, beginning with the "best estimate" values for 2020, and continuing to assume a 4.5% growth rate in prices and utilization, by 2024 the annual savings due to expansion is estimated to be about $932 million. The projection also includes an annual population growth rate of 0.66% for both scenarios.



Conclusion

This analysis has shown that expansion of Medicaid in Missouri is close to budget neutrality and actually has an estimated savings of $39 million. While this value is our best estimate, we also provide a range of -$95 million to +$42 million, which should be considered the lower and upper bounds of what the net impact to the state, within the MO Healthnet program, would be in FY2020. Other forms of savings across other departments, as well as increases to general revenue, are likely. There are numerous benefits in terms of health outcomes that have been documented in other states, many of which will likely generate economic dividends over time, as investment in a healthy workforce has been shown in other settings to create savings.

About Missouri Foundation for Health

This report is supported by Missouri Foundation for Health, a resource for the region, working with communities and nonprofits to generate and accelerate positive changes in health. As a catalyst for change, the Foundation improves the health of Missourians through partnership, experience, knowledge, and funding.

Analysis of the Fiscal Impact of Medicaid Expansion in Missouri

February 2019

To complete this analysis, Center researchers conducted reviews of all existing documentation of other states' experiences, including reports at the national level by the Urban Institute, Robert Wood Johnson Foundation, the Commonwealth Fund, and the Centers for Medicare and Medicaid Services. We relied upon published Missouri Medicaid enrollment and cost data as well as a prior fiscal analysis of Medicaid expansion conducted by the Department of Social Services in 2014. We also carried out independent analyses of American Community Survey data and Medical Expenditure Panel Survey data. Parts of the analysis were informed by a discussion with analysts at The Urban Institute. The key assumptions were vetted by health policy staff at the Missouri Foundation for Health, the Missouri Hospital Association, the Missouri Primary Care Association, and others.

Introduction

Although the Affordable Care Act (ACA) of 2010 directed all states and the District of Columbia to expand their Medicaid programs to cover all adults with incomes up to 138% of the Federal Poverty Level (FPL), a subsequent Supreme Court ruling in 2012 made this expansion optional. Initially, in 2014, 25 states expanded their programs. Subsequently, eight additional states expanded their programs through legislative action, and in 2017-18, four states passed ballot initiatives to expand.[1] Early evidence from multiple states indicates that expansion has a positive impact on state budgets; due to the increased federal match available for expansion populations, some states have even realized net cost savings.

The goal of this analysis is to estimate the impact of an expansion of Medicaid in Missouri (to 138% of the FPL) in 2020 for the first five years of expansion on the state budget. This report outlines the important background, sources of data, methods, and assumptions used to generate these estimates. The "best estimate" of the impact on the state budget is presented, along with some sensitivity analysis to show the impact of crucial assumptions on the estimate. A companion spreadsheet to this report allows the user to vary all assumptions as desired.

Background

In the first three years after the implementation of the ACA (2014-16), expansion states received 100% federal match on spending for newly eligible populations, which ensured that states' budgets would not be negatively impacted due to upfront costs or high pent-up demand. From 2017 to 2020, the federal matching rate is being gradually reduced to 90%. This was expected to have a minimal impact on state budgets, given the likelihood that cost savings would ultimately occur as better access to care would both decrease uncompensated care and

increase prevention and early intervention in the course of disease treatment, resulting in very little net cost to the states.[2] However, for states such as Missouri that did not expand Medicaid during that window, the challenge when considering a later expansion is that the federal match is initially set at 90%, meaning that the state budget must cover 10% of the costs of expansion, and any upfront costs or high pent-up demand are not fully covered.

Furthermore, prior to the ACA, Missouri's eligibility levels for parents were among the lowest in the United States. Although most states, like Missouri, previously offered no coverage to childless adults, this still creates some difficulty in applying other states' outcomes to Missouri, as the newly eligible population would contain a disproportionate share of extremely low-income parents. Conversely, because Missouri did not expand Medicaid in 2014, a large share of otherwise eligible people with slightly higher incomes (100% to 138% FPL) obtained highly subsidized coverage through health insurance marketplaces of the ACA, and these people may now be better managing their health conditions or have less pent-up demand for health care services. These caveats suggest that a range of values be considered as representative of the costs of the expansion population.

Finally, Missouri's reliance on provider taxes and other forms of revenue to finance its Medicaid program is much greater than in other states.[3] Because of the magnitude of the provider tax programs, it is important to consider the role these have played in drawing down federal dollars and how this might change in an environment of Medicaid expansion. Current federal law also specifies cuts to the Disproportionate Share Hospital (DSH) program beginning in 2020, and since Missouri's state share of DSH-eligible expenditures is financed through provider taxes, it is important to consider the potential impact of a cut to the cap on federal matching funds.

Data and Methods

Cost and financial data for this analysis come primarily from aggregation of MO HealthNet Monthly Management Reports for fiscal year 2017, as this was the last full fiscal year of data available at the start of the project.[4] These data have been supplemented by information on the Federal Reimbursement Allowance (FRA) from the Missouri Hospital Association (MHA), which administers that program.[5] Supplemental cost data have also been calculated using the Medical Expenditure Panel Survey (MEPS), 2015-16.

Information on the size and composition of the population that would potentially enroll in a MO HealthNet expansion comes from census data: the 2017 American Community Survey (ACS) has been analyzed for Missouri and checked against administrative (enrollment) counts. In certain cases, we relied on information from a 2014 Missouri Department of Social Services (DSS) analysis of the impact of Medicaid expansion, in particular for estimating proportions of existing Medicaid eligibility groups whose incomes would qualify them for coverage under an expansion.

Methods for processing the ACS data include restricting the sample to individuals in households earning at or below 138% FPL, then combining responses to a series of questions on insured status, removing those with Medicare and Medicaid while sorting others into categories. As detailed in the next section, we separate those with employer coverage, those with other private coverage, and those without insurance, because we assume different take-up rates will apply to these three groups.

Assumptions

There are about 18-20 assumptions made in creating this analysis for 2020, but several of them are quite minor, and most of them have very little impact on the state's overall financial obligation. We highlight and discuss the most influential assumptions below, including ways in which other states' experience may inform that of Missouri, and conclude with a list of other assumptions made.

- **How many adults will enroll?**

  The Kaiser Family Foundation (KFF) estimated for Missouri in 2016 that 199,000 uninsured adults would be eligible for Medicaid under an expansion, which excludes those currently buying Marketplace coverage (about 72,500 with incomes below 138% FPL in 2018[6]) as well as those already eligible but not enrolled.[7] This suggests a total of at least 271,500 adults *eligible*. The Urban Institute estimates a total of 352,000 new enrollees (non-elderly adults and children) in Missouri *will actually enroll* in the event of an expansion.[8]

  Our own analysis of ACS data indicates that roughly 458,000 nonelderly adult citizens of Missouri with incomes below 138% of the FPL are potentially eligible for expansion, including about 190,000 uninsured adults, 72,400 with private coverage from another source, and 195,750 adults with employer-sponsored insurance (ESI) coverage. Looking first at the currently uninsured population, there is some literature available on take-up rates: Urban Institute has found an average 73% take-up across existing expansion states, although they note that actual take-up rates have varied by state due to factors such as executive branch commitment, the role of private organizations, the political climate, etc. **We apply a 73% take-up rate to the ACS-based estimates of about 190,000 uninsured.**

  We assume that a small number of those with ESI may be willing to take up Medicaid and drop their ESI coverage, which is known as "crowd out." According to KFF, studies exploring the potential for Medicaid expansion to crowd out private insurance have found mixed results, with most showing no evidence of crowd out and some showing slight declines in private coverage in expansion states following expansion. **We use a 10% crowd-out rate.**

  As noted, the ACS indicates that about 72,400 adults age 18-64 below 138% of the FPL hold private non-ESI coverage, meaning they likely purchase it directly from an insurance company (potentially subsidized through the Health Insurance Marketplaces). Since all Medicaid coverage has a zero premium, making this the dominant choice for such individuals, **we assume that all (100%) of those with other private coverage would take up Medicaid coverage.**

  Combining these assumptions, we estimate that about 231,000 adults would take up Medicaid in 2020 and be part of the expansion population. (Note that this is equivalent to an average take-up rate of 73% applied to a combined potential adult population of about 315,000.)

- **How many kids will enroll?**

  Our estimate includes the possibility that some children who are currently eligible for Medicaid but are enrolled in private coverage or uninsured may enroll during an expansion, which is reflected in an

increased budget for kids at the standard match. Analysis of the data for children under age 18 and with family income below 138% of the FPL suggests that about 30,000 children are currently uninsured, that roughly 15,000 children have private, non-ESI coverage, and that 77,000 have ESI coverage derived from a parent. That there remain any uninsured children under 138% of the FPL may seem perplexing since all are currently eligible for Medicaid and have been for years. On the other hand, there are several reasons that some parents may have chosen not to sign their eligible children up for Medicaid. These include: stigma, lack of awareness that they are eligible, barriers to obtaining coverage (complexity of the system and many bureaucratic requirements), parents' immigration status, and the possibility that if the children are very healthy the parents may not see the need to obtain coverage.

Experience from ACA implementation has shown that a large number of children have obtained coverage due to ACA coverage expansions even though they were eligible prior to 2014, in what is often characterized as the "woodwork effect." For this and other reasons, we assume that some children will obtain coverage after a Medicaid expansion, but also that there remain some underlying reasons why some children will never be signed up for coverage. **We assume take-up rates of 66%, 9%, and 90% respectively (reducing the adult values of 73%, 10%, and 100% by 10%) for a total of about 40,000 kids being added to Medicaid at the standard match.** Note that a few higher-income kids would likely enroll in SCHIP, pay premiums, and be eligible for the enhanced FMAP associated with that program, which is not reflected in the model.

The assumptions made here imply that about 40,500 children who are citizens and in families with income below 138% of the FPL would be added to the Medicaid population in 2020. This brings the total estimate of the population that could be enrolled in an expansion to 271,500.

- **How much will the adult expansion population cost?**

As noted above, a range of information is available to address this question. One option is to use the average cost of a current adult, non-pregnant recipient who is not aged, blind, or disabled (ABD). In FY17, this was $459/month, including pharmacy, which represented about 25% of that cost. Evidence from other states suggests that the new enrollees will be less expensive, possibly not initially, but after the first couple of years. Since Missouri's eligibility level is so low, it suggests that the average cost may not be representative of the general Medicaid expansion population, who may be healthier.

Another approach is to analyze Medical Expenditure Panel Survey (MEPS) data, which is not Missouri specific, but which can generate average total health expenditures across demographic groups (age, gender) and self-reported health status. These average costs can then be combined with CPS data in which counts of the eligible population by age, gender, and self-reported health status in Missouri are specified. When analyzing costs for low-income Midwestern MEPS respondents with public insurance or no insurance, this method gives an estimated cost of about $340/month in 2018 dollars. This is likely a low estimate due to some uninsured people not seeking needed care.

Other states have reported data on this issue, but it is difficult to separate out the costs of the truly newly eligible, who are more likely to be relatively healthy, and the spend-down population, who are by

definition incurring unusually high costs. The latter group – or the subset who are eligible for expansion by reason of their income – typically becomes incorporated into the expansion cost data. We assess this group separately in the next section. To inform our estimate, we reviewed analyses from several Medicaid expansion states as well as considering a CMS report that summarizes data on expenditures for expansion states.[9] We expect that the newly eligible population will be slightly healthier and less expensive than the current adult non-ABD population, i.e., custodial parents with incomes less than 20% FPL.

We use a cost estimate of $425/PMPM for the newly eligible, but we consider a range from $350 to $525, noting that a bell-shaped distribution applies to this (and all) estimates and that the extreme ends of the range are considered unlikely.

- **How much can be saved on the spend-down population?**

FY2017 enrollment data show that about 8.5% of the ABD population is considered "spenddown." This category of individuals earns too much to qualify for Medicaid, but are able to gain Medicaid coverage by documenting their high out-of-pocket costs that effectively reduce their income to the qualifying level. Fiscal data show that total spending across the entire ABD population is about $5.7 billion. If we assume proportionality, then about $480 million is spent by this population. (In fact, it is likely much greater than this. A Kaiser report found in 2012 that on average, the medically needy population in 2009 was 5% of enrollment but incurred 11% of costs, and this is a similar group.)[10] Thus, when estimating spending on this population, we make the conservative assumption that they are 25% more expensive than proportionality would suggest.

Data from Arkansas show that their spend-down disabled population was actually reduced by 87.2% pre/post expansion (although the overall size of the population was much smaller to start), allowing significant savings to occur through the increased match.[11] Washington state expected savings of $35 million in FY2015 (year two of implementation)[12] on a pre-ACA spend-down population of about 12,000.[13] Missouri's population averages about 19,000, so a savings of $55 million by year two would be predicted on this basis.

Finally, an earlier DSS analysis found that about 14.5% of the spend-down population would qualify for expansion – because this subgroup of individuals are not on Medicare and have incomes between 85% and 138% FPL, so they would be immediately eligible under the Medicaid expansion without having to spend down first – so we use 14.5% of 8.5% of the original permanently and totally disabled (PT&D) spending, scaling up by 25% as mentioned above, to determine that **about $70.7 million in P&TD spending would be subject to the new 90% match, saving about $17.4 million.**

- **How much can be saved on the disabled population that never becomes dual eligible?**

Previous DSS analysis of enrollment patterns found that about 47% of persons who applied for Supplemental Security Income (SSI) benefits did not ever become disabled according to that standard and thus were not ultimately dually Medicare- and Medicaid-eligible. That analysis also made the assumption that about 25% of this group, on a rolling basis, would not elect to apply for Medicaid through obtaining P&TD eligibility if they were instead eligible through an expansion. This translates into about a 4.9%

annual rate of attrition from the standard match rate and to the 90% match rate: each year, 4.9% of the total P&TD enrollment will be replaced by expansion-population enrollment.[14] This is one key assumption in the model that has a cumulative impact over time, which will be reflected in the five-year horizon analysis. We do assume that the impact tapers off over the course of the five years.

Data from Arkansas show that their disabled SSI population was actually reduced by 6.6% pre/post expansion, allowing significant savings to occur through the increased match.[15] They expected to save $45 million in FY2016. Kentucky expected to save $8 million in FY2015. In Oregon, new enrollees seeking disability determinations dropped by 80% in one year.[16]

Of the 47% who never become dually eligible, **we assume 30% of them will forgo the P&TD pathway in the presence of an expansion**. This represents a slight increase from the assumption made in the previous DSS analysis, informed by the experiences of several states and resulting in an overall annual attrition rate of 4.9% and corresponding to about a $55 million savings in FY2020 (similar to Arkansas when adjusted for inflation and the size of its P&TD population). We also note that this is a key driver of cost savings, and every effort should be made to strategize the best way to create fiscal savings while ensuring that those with some level of disability are making the best choice for their situation.

- **What is the growth rate of spending (inflation) and of the population likely to be?**

Growth rates in Medicaid spending, not including growth due to enrollment changes, has averaged 4-5% over the past several years. This includes inflation, measured by the CPI, which is typically about 2%. The remainder of growth is due to what may be broadly termed "utilization" and refers to the amount and intensity of services needed by the enrolled population. **An annual spending growth rate of 4.5% is used**, and when projecting forward to 2024, we also add in a population growth rate of 0.66% annually to ensure that we adequately account for the fact that the much more inclusive "expansion population" eligibility category may increase proportional to Missouri's average population growth rate. We note that by 2024 and beyond, it is likely that utilization growth may be arrested and may even reverse slightly due to increased access to preventive care and primary care services, but this is not reflected in our estimates.

- **What other assumptions are needed?**

All programs for adults not required by law are subsumed into Medicaid expansion, and all spending on these programs receives the 90% match instead of the standard match. This includes Blind Pensions, Presumptive Eligibility, Ticket to Work Health Assurance, Breast/Cervical Cancer Treatment, and Women's Health Services. This generates significant savings, in particular, on Medicaid for Pregnant Women in Poverty, as 94% of participants (about 13,000) would be eligible under expansion according to prior DSS analysis. A total of about 19,000 beneficiaries would be converted to expansion and receive the 90% match (not counting the enrollment of about 68,000 in Women's Health Services).

We also assume that the FRA rate would decline somewhat due to an expansion, both because some of the funding is tied to uncompensated care and because of internal MHA formulas that ensure fairness across hospitals with varying Medicaid patient volume. A related assumption is that DSH allotments would be reduced further (based upon published information about DSH reduction methodology[17]) if

Missouri expands Medicaid and thus has less uncompensated care. Also related is our assumption regarding "direct Medicaid FRA" spending – spending that is administered by MHA outside the state budget and helps "top up" the low reimbursement rates to hospitals – which is that because about 4% of total hospital spending is made in relation to claims for P&TD patients who would become expansion population, this spending will also receive a higher match.

Results for 2020

Assuming a 4.5% annual growth rate in projecting FY2017 values to FY2020, and assuming that DSH cuts occur as currently specified in Federal law, **we find that a Medicaid expansion in Missouri is approximately revenue neutral and could create cost savings**. With the assumptions outlined in the previous section, we find that the total state obligation (general revenue plus other sources, excluding provider tax revenues) in 2020 is about $3.245 billion in the absence of expansion and $3.206 billion in the presence of an expansion, for **a savings of about $39 million**.

	Lower Bound	**Best Estimate**	**Upper Bound**
Total New Adult Eligible Population	270,000	315,000	360,000
Average Take-up Rate	68%	73%	78%
New Enrollee Cost, PMPM	$350	$425	$525
% Never-Dual Who Forgo P&TD Pathway	40%	30%	20%
State Obligation with Expansion	$3,150.4M	**$3,206.1M**	$3,287.3M
State Obligation without Expansion	$3,245.0M	$3,245.0M	$3,245.0M
Net Change	**-$94.6M**	**-$38.9M**	**+$42.3M**

In addition to our estimate, the table shows two additional estimates based on changes in the key assumptions discussed above. These estimates should be viewed as lower and upper bounds for the actual value, as many assumptions must be set at the extreme end of their likely ranges in order to obtain these values. **The most likely result, if assumptions vary moderately in either direction from our choices, is a value that is within +/- $30m of our best estimate.** Nonetheless, for transparency in communicating the importance of key assumptions, we show:

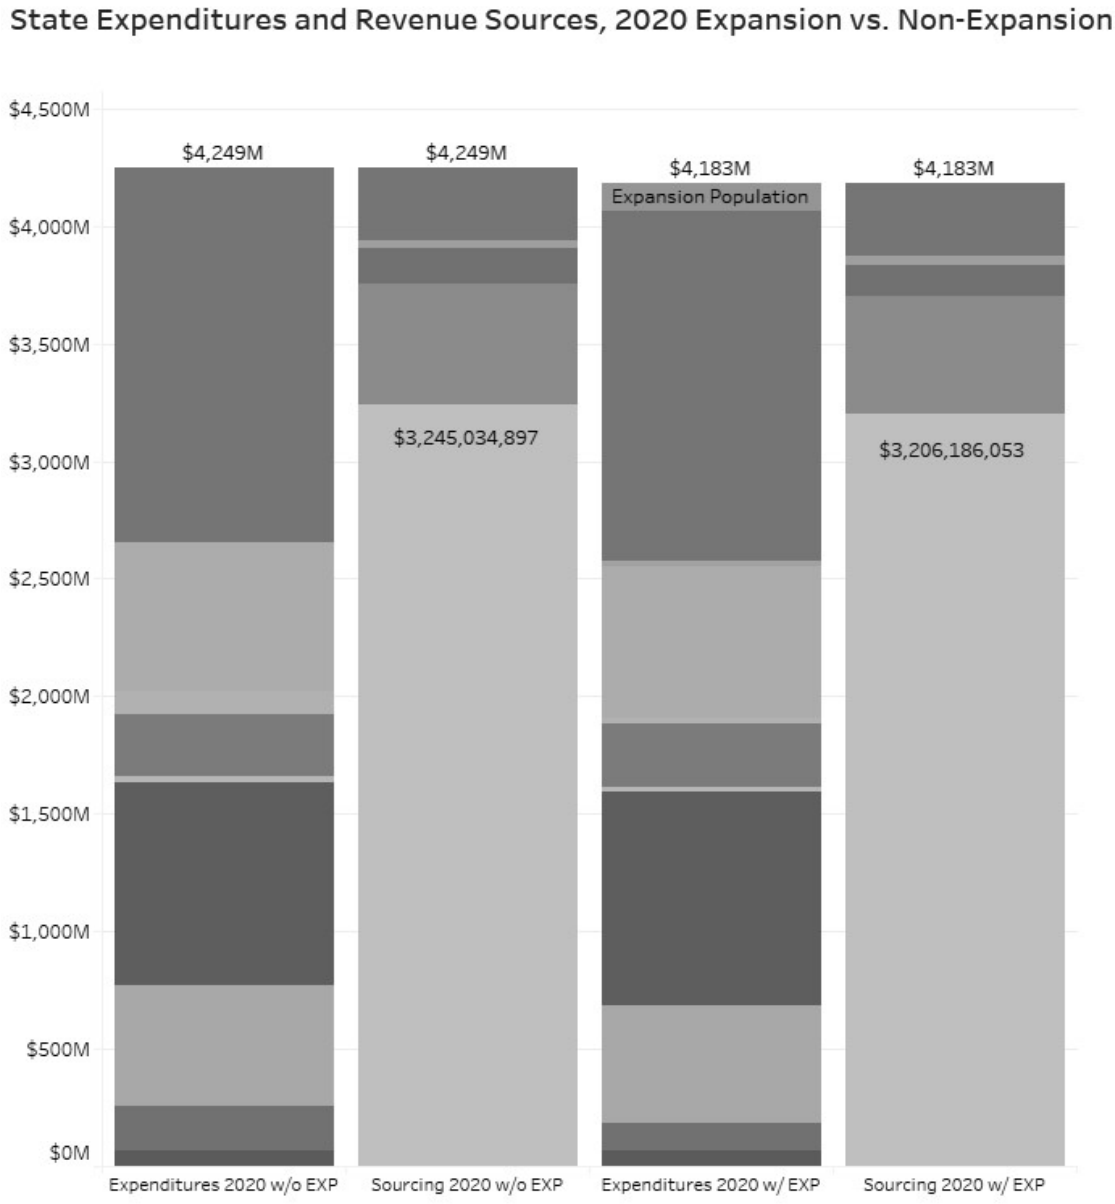
- A worst-case scenario, in terms of immediate fiscal impact, would occur due to higher than expected take-up rates and PMPM costs, along with lower numbers of P&TD applicants switching to the expansion eligibility pathway and smaller costs currently associated with the P&TD spenddown population. With all worst-case assumptions in place, the state obligation under expansion is estimated to be $3.287 billion, or $42 million higher than the $3.245 billion in the non-expansion case.
- A best-case scenario, in terms of immediate fiscal impact, would occur due to lower than expected take-up rates and PMPM costs, along with higher numbers of P&TD applicants switching to the expansion eligibility pathway and larger costs currently associated with the P&TD spenddown population. With all best-case assumptions in place, the state obligation under expansion is estimated to be $3.150 billion, or $95 million lower than the $3.245 billion in the non-expansion case.

Note that this is a very narrowly defined impact insofar as higher take-up rates are associated with more individuals obtaining coverage and needed medical services, which is likely to have social and economic benefits beyond the MO HealthNet program.

Finally, we consider the possibility that DSH cuts are postponed or eliminated, and we find that the state budget improves in both cases. The gap between expansion and non-expansion widens slightly – assuming that DSH cuts would be more dramatic in the case of expansion – but in general the outcomes are similar: costs are higher ($3.213 billion) without expansion than they are with expansion ($3.159 billion).

For the assumptions corresponding to our "best estimate," the resulting costs are compared in Figure 1. The first two columns are expenditures and sourcing in 2020 without expansion, and the last two columns are expenditures and sourcing with expansion. Of note are the labeled gold rectangles which represent the state's obligation from general revenue and other funds (not including provider taxes).

Figure 1.

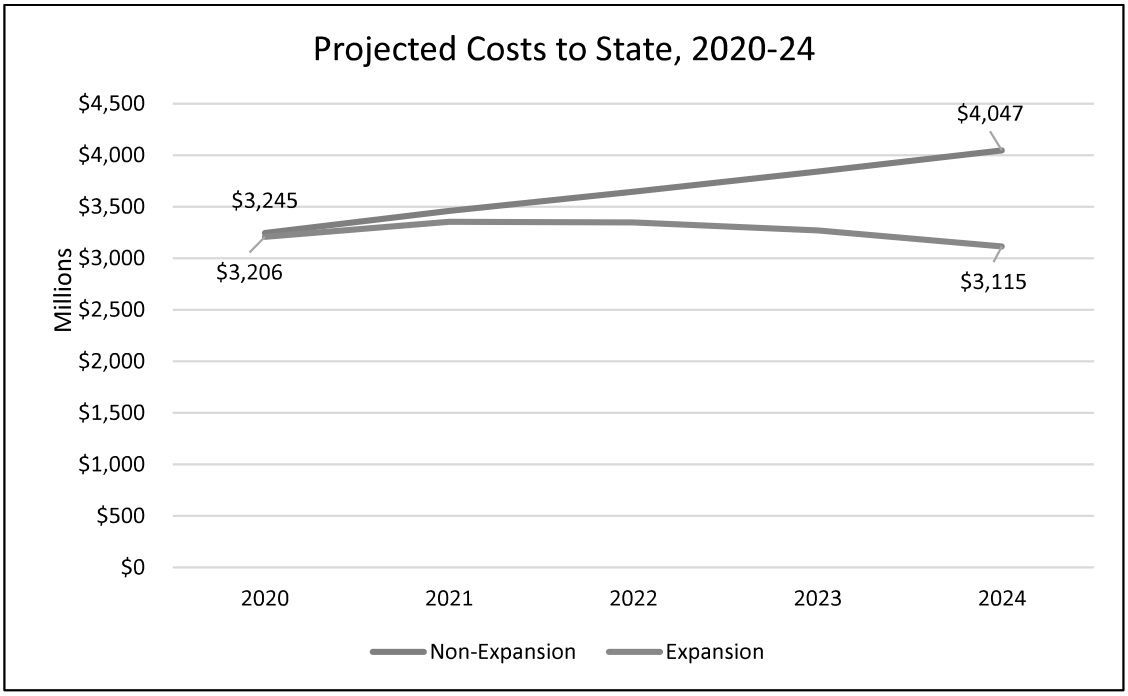


Projections, 2020-24

The last piece of the analysis is to extend these projections to 2024. As mentioned previously, we expect a cumulative effect to occur due to attrition from P&TD enrollment, which is included. Due to the significant savings expected from this population, by 2023 our projection shows the state's obligation actually declining compared to 2020. Another factor that also contributes is the DSH cuts, which in an expansion scenario are less challenging for the state budget due to more FRA provider tax revenues being able to be spent on expansion-eligible individuals, thereby receiving a 90% match that is not limited by the DSH cap, which applies to uncompensated care.

Thus, Figure 2 shows that, beginning with the "best estimate" values for 2020, and continuing to assume a 4.5% growth rate in prices and utilization, by 2024 the annual savings due to expansion is estimated to be about $932 million. The projection also includes an annual population growth rate of 0.66% for both scenarios.

Figure 2.



Not reflected in this projection is the likelihood that better access to care, especially access to prevention and management of chronic conditions, is likely to have a dampening effect on growth of costs for both the expansion population as well as the P&TD population over time. These effects may occur at significant rates after the first few years of expansion.

Also not reflected is the possibility that the Federal Matching Assistance Percentage (FMAP) may not be constant over the five years. Since the FMAP formula is determined based on a state's per capita income relative to the U.S. average, it is difficult to predict. However, it has fallen over the past few years, suggesting Missouri has been more stagnant than some other states, so it seems reasonable to make the neutral assumption that the FMAP does not change.

Additional Considerations

Although not explicitly modeled here, our review of other states' experience suggests a positive fiscal impact to the state budget due to savings within the Department of Corrections, savings within the Department of Mental Health, and increased tax revenues due to the increase in paid health care services.[18]

States that have expanded have seen health care-related savings in their correction budgets for newly Medicaid-eligible prisoners who are treated in an inpatient medical facility outside of the state correctional system. Kentucky has estimated savings of $5.4 million in SFY 2014 and $11.0 million in SFY2015 from replacing state general funds with Medicaid funds for hospital inpatient costs of prisoners. Though we are unable to find updated estimates, the Missouri Department of Corrections previously estimated (for the prior DSS expansion analysis) that inmates in Missouri incur an average of 150 inpatient bed days outside of a corrections facility per month, for a savings of about $3.1 million in 2020. That analysis also estimated savings of $6.9 million in 2020 due to reduced recidivism.

There is some concern about cost containment, with respect to the relatively healthy expansion population who would doubtless be enrolled in managed care, because of Missouri's limited ability to accurately assess – and compensate – managed care companies' exposure to and management of risks, and even to accurately convey enrollees' information to managed care companies. With current technology and staffing limitations, there is a chance that costs will not be well contained in a managed care setting. However, information technology upgrades are in the beginning stages of a six-to eight-year timeline, with significant funding in the governor's FY2020 budget recommendation to achieve the IT capabilities for modernizing existing payment methodologies, even in the context of an unexpanded program.

On this point, a recent Commonwealth Fund analysis of 10 Medicaid expansion states finds:

> "States have made health system reform a core element of their Medicaid expansions, with the aim of improving access, quality, efficiency, and population health. States have sought to incorporate evidence-based practice and payment strategies, with an emphasis on populations likely to benefit from improved care management and on better integration of treatment for physical and behavioral health problems. Seven of 10 are directly engaged in provider payment and delivery system reform. Agencies noted the importance of experienced provider networks in addressing complex health and social needs, along with managed care's role in quality improvement and payment reform. States embrace their roles as payers and health care innovators, identifying stability of both coverage and the underlying federal policy environment as key factors."[19]

It is our recommendation that these issues be brought to the forefront in any discussion of Medicaid expansion, with barriers to implementation of such innovations identified and addressed as far in advance as possible of the addition of new enrollees to the program. An ongoing commitment of resources, especially staffing, will be critical in realizing the potential savings from cost containment.

Conclusion

This analysis has shown that expansion of Medicaid in Missouri is close to budget neutrality and actually has an estimated savings of $39 million. While this value is our best estimate, we also provide a range of -$95 million to +$42 million, which should be considered the lower and upper bounds of what the net impact to the state, within the MO Healthnet program, would be in FY2020. Other forms of savings across other departments, as well as increases to general revenue, are likely. There are numerous benefits in terms of health outcomes that have been documented in other states, many of which will likely generate economic dividends over time, as investment in a healthy workforce has been shown in other settings to create.

Furthermore, there is a current net outflow of dollars from Missouri due to its lack of expansion. In 2015, Missouri residents sent a total of $64.1 billion to the Federal government in the form of income taxes, which was 1.95% of the U.S. total. In FY2015, Missouri received $6.28 billion back from the federal government for Medicaid, which was only 1.80% of the U.S. total. Roughly, this difference of 0.15% of total U.S. income taxes collected represents about $500 million leaving the state each year and is therefore an economic loss to the state. Conversely, spending within the state spurs job creation, increasing incomes and tax revenues in the state.

Although we find expansion to be roughly revenue neutral, we caution that some assumptions (in particular, the size of the new population) are fairly uncertain prior to implementation. Other estimates could be honed with recent data available internally to DSS analysts. The cost estimates for the newly eligible, however, really depend upon how well Missouri can commit to modernizing and improving its relationship with managed-care companies. Costs have the potential to be well contained, based upon evidence in other states, but modern infrastructure may be required to accomplish this in Missouri while maintaining and improving delivery of services for lower-income Missourians throughout the state.

About Missouri Foundation for Health

This report is supported by Missouri Foundation for Health, a resource for the region, working with communities and nonprofits to generate and accelerate positive changes in health. As a catalyst for change, the Foundation improves the health of Missourians through partnership, experience, knowledge, and funding.

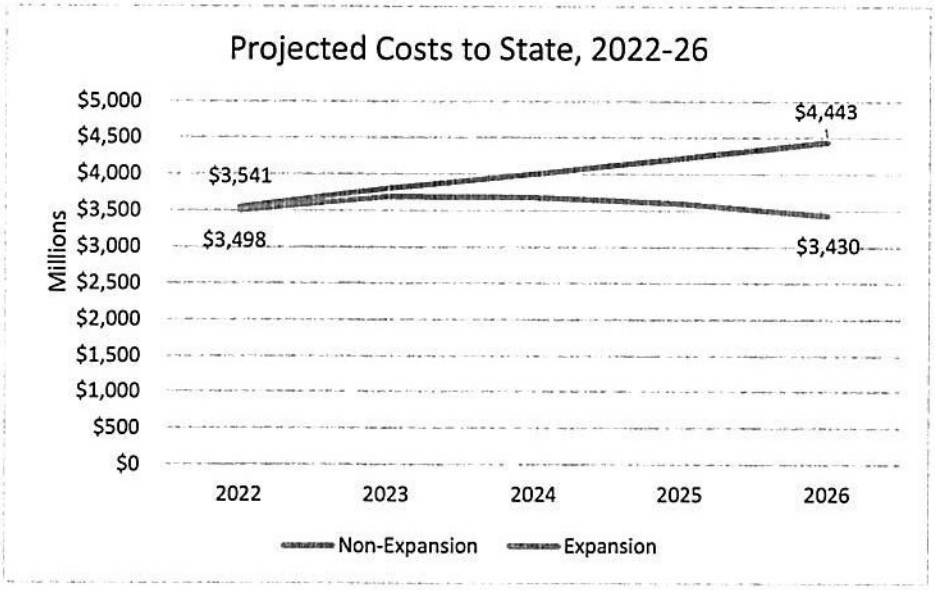
MEMORANDUM

To: Susan Beeler, Office of the Missouri State Auditor
From: Abigail Barker, PhD and Timothy McBride, PhD
Center for Health Economics and Policy, Washington University
Subject: Analysis of the Fiscal Impact of Medicaid Expansion in Missouri
Revised Projections for FY2022-26
Date: April 10, 2019

In our recent report analyzing the fiscal impact of a Medicaid expansion to the state's Medicaid budget, we produced estimates for FY2020 and extended these projections to 2024. Per your request, we have changed the timeframe of the projections to FY2022-26. The revised numbers reflect (1) trending forward the FY2017 fiscal data for 5 years rather than 3; (2) trending forward the assumed PMPM cost of newly eligible adults and newly enrolling children by 2 years; and (3) eliminating the phase-in of DSH cuts, which is slated to occur in FY2020, and assuming the full DSH cuts for all 5 years.

The figure below shows that, beginning with the "best estimate" values for 2022, and continuing to assume a 4.5% growth rate in prices and utilization, by 2026 the annual savings due to expansion is estimated to be about $1.013 billion. The projection also includes an annual population growth rate of 0.66% for both scenarios.



As mentioned previously, we expect a cumulative effect to occur due to attrition from P&TD enrollment. Due to the significant savings expected from this population, by 2023 our projection shows the state's obligation actually declining compared to 2022. By 2026, we assume a total decline of about 27% of the current P&TD population as individuals elect to obtain Medicaid coverage through expansion rather than application through the disability determination process. As P&TD enrollees incur very high costs on average, and the state can save about 25% of all costs associated with these individuals, this is a key driver of the savings over time.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Fiscal Note Summary

State government entities are estimated to have one-time costs of approximately $6.4 million and an unknown annual net fiscal impact by 2026 ranging from increased costs of at least $200 million to savings of $1 billion. Local governments expect costs to decrease by an unknown amount.

RE: Petition approval request from Heidi Miller regarding a proposed constitutional amendment to Article IV (2020-062)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Heidi Miller on April 26, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the State of Missouri that the Constitution be amended:

Article IV of the Constitution is revised by adding one new section to be known as Article IV, Section 36(c) to read as follows:

Section 36(c). 1. Notwithstanding any provision of law to the contrary, beginning July 1, 2021, individuals nineteen years of age or older and under sixty-five years of age who qualify for MO HealthNet services under 42 U.S.C. Section 1396a(a)(10)(A)(i)(VIII) and as set forth in 42 C.F.R. 435.119, and who have income at or below one hundred thirty-three percent of the federal poverty level plus five percent of the applicable family size as determined under 42 U.S.C. Section 1396a(e)(14) and as set forth in 42 C.F.R. 435.603, shall be eligible for medical assistance under MO HealthNet and shall receive coverage for the health benefits service package.

2. For purposes of this section, "health benefits service package" shall mean benefits covered by the MO HealthNet program as determined by the department of social services to meet the benchmark or benchmark-equivalent coverage requirement under 42 U.S.C. Section 1396a(k)(1) and any implementing regulations.

3. No later than March 1, 2021, the Department of Social Services and the MO HealthNet Division shall submit all state plan amendments necessary to implement this section to the United States Department of Health and Human Services, Centers for Medicare and Medicaid Services.

4. The Department of Social Services and the MO HealthNet Division shall take all actions necessary to maximize federal financial participation in funding medical assistance pursuant to this section.

5. No greater or additional burdens or restrictions on eligibility or enrollment standards, methodologies, or practices shall be imposed on persons eligible for MO HealthNet services pursuant to this section than on any other population eligible for medical assistance.

6. All references to federal or state statutes, regulations or rules in this section shall be to the version of those statutes, regulations or rules that existed on January 1, 2019.

BE IT RESOLVED BY THE PEOPLE OF THE STATE OF MISSOURI THAT THE CONSITUTION BE AMENDED:

Section 17 of article IV of the Constitution of Missouri is amended by adding Section 17(B). The new section includes the following underlined language:

MISSOURI CONSTITUTION

Section 17(b.) RECALL Elective State Officers

All political power is inherent in the people. Government is instituted for their protection, security, and benefit, and they have the right to alter or reform it when the public good may require. A voter who casts a vote in an election in accordance with the laws of this State shall have that vote counted.

Recall is the power of the electors to remove an elective officer. Recall of a state officer is initiated by delivering to the Secretary of State a petition alleging reason for recall. Sufficiency of reason is not reviewable. Proponents have 160 days to file signed petitions.

A petition to recall a statewide officer must be signed by electors equal in number to 12 percent of the last vote for the office, with signatures from each of 5 counties equal in number to 1 percent of the last vote for the office in the county.

The Secretary of State shall maintain a continuous count of the signatures certified to that office. An election to determine whether to recall an office rand, if appropriate, to elect a successor shall be called by the Governor and held not less than 60 days nor more than 80 days from the date of certification of sufficient signatures.

A recall election may be conducted within 180 days from the date of certification of sufficient signatures in order that the election may be consolidated with the next regularly scheduled election occurring wholly or partially within the same jurisdiction in which the recall election is held, if the number of voters eligible to vote at that next regularly scheduled election equal at least 50 percent of all the voters eligible to vote at the recall election.

If the majority vote on the question is to recall, the officer is removed and, if there is a candidate, the candidate who receives a plurality is the successor. The officer may not be a candidate, nor shall there be any candidacy for an office filled pursuant to subdivision (d) of Section 16 of Article VI.

The Legislature shall provide for circulation, filing, and certification of petitions, nomination of candidates, and the recall election. If recall of the Governor or Secretary of State is initiated, the recall duties of that office shall be performed by the Lieutenant Governor or Controller, respectively. A state officer who is not recalled shall be reimbursed by the State for the officer's recall election expenses legally and personally incurred. Another recall may not be initiated against the officer until six months after the election. The Legislature shall provide for recall of local officers. This section does not affect counties and cities whose charters provide for recall.

RE: Petition approval request from Charles Hurth regarding a proposed constitutional amendment to Article VIII (2020-060)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Charles Hurth on April 18, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft
